EXPLORERS MISSING IN CANYON OF COLORADO

Witnesses In Wreck Inquiry Discredit Radio Messages

Our City comment & discussion by THOMAS D. WATSON

"Shopping News' Proved Failure in Oakland. Does Glendale Want It?

ON September 10 there appeared in this column an editorial regarding the report of a movement which is on foot to start a "Shopping News" in Glendale.

In this article we mentioned that among the cities that had found the "Shopping News" a failure was Oakland, Calif.

* * *

SINCE writing this editorial we have received a wire from Mr. John S. Connors, editor of the Oakland Enquirer, which reads as follows:

"Oakland merchants tried the "Shopping News" experiment but were not satisfied with it. They contracted with a local man for one year to get out 50,000 copies per week. At the end of nine months they discontinued the "Shopping News" on the ground that it was a failure. The largest merchants who had been supporting the "Shopping News" declared in interviews that the only legitimate way of advertising was in the newspapers.

"Since a year ago the "Shopping News" has been a dead issue in Oakland."

* * *

WE are not writing about this matter entirely from a selfish standpoint, although we recognize that if any cutting in advertising is done the newspapers will suffer most. We do feel, however, that if the merchants decide to start a "Shopping News" it will prove a failure and the time it will take to find out will be a disastrous period to many of them.

* * *

IT is our belief that if the Glendale merchants would patronize their city papers to almost the exclusion of other modes of advertising their volume of business would be materially increased.

Also bearing in mind that Glendale is located within 20 minutes of Broadway and the large Los Angeles stores, they should arrange to carry stocks of merchandise to meet any reasonable demand of the shoppers.

Some of our stores are doing this right now and they are enjoying a good trade in consequence. It would be well for the others to follow suit.

LATE SPORTS

FOREST HILLS, N. Y., Sept. 22. Leading tennis players of the east and west met on the turf courts of the stadium today in their annual team championship matches, Vincent Richards, youthful member of the eastern team and Howard Kinsey of San Francisco were opponents in the opening match.

Richards defeated Kinsey 6-3, 6-2.

R. Norris Williams played for the east against Robert Kinsey in the second match. A drizzling rain fell during the play. About 500 spectators sat under umbrellas in the stands.

William T. Tilden of Philadelphia, defeated William M. Johnston of San Francisco, 8-6, 7-6, in the feature match. Tilden's victory, third straight for the eastern team, gave them the championship regardless of the result of the remaining singles and doubles.

Wallace Johnson, with a straight set victory over Clarence J. "Peck" Griffin, 7-5, 8-6, made a clean sweep for the east in the singles matches against the west. In the doubles event R. Norris Williams and Watson M. Washburn represented the east against William M. Johnston and Griffin of the west.

[By Associated Press]

CHICAGO, Sept. 22.—Max Marston of Philadelphia, carried Jess Sweetser, New York, defending champion, to the 38th hole and won the national amateur golf championship at Flossmoor today.

CHICAGO, Sept. 21. — Jess Sweetser of New York, got a step nearer the goal today in his defense of the amateur golf championship by defeating Bob Gardner of Chicago, twice holder of the title, 8 to 7, in the semi-finals.

CHICAGO, Sept. 22.—Max Marston of Philadelphia today managed to hold a champion, Jess Sweetser of New York to a lead of 2 up in the first 18 holes of the national amateur golf tournament at Flossmoor today.

ST. BERNARD DOG CHOSE MR. BERNARD FOR NEW MASTER

A beautiful big St. Bernard dog with a kingly head and lithe, strong body, lost his master. In searching for a new one he discriminatingly chose a man with a familiar name, Mr. Bernard, whose real estate office is at Canada boulevard and Glorietta. Then he doubtless reasoned that since that superior being, man, seemingly always turns to the real estate business when out of a job of any other kind (that is, in California) so he, having no master and no frozen travelers to resceue in this sunny land, naturally should annex a real estate office with his new master. While Mr. Bernard has become attached to the friendly canine and would like to keep him, still he knows that someone is lamenting the loss of his companionship, and he is anxious to restore him to his rightful master, if such will but come forth to claim him.

ANOTHER VERSION OF THE LETTER MUDDLE

A. M. Lawrence Says Hardwick Was Stranger; Not Offered Job

[By United Press]

SAN FRANCISCO, Sept. 22.—Still another version of how the now famous correspondence which passed between Senator Johnson, C. K. McClatchy and A. E. Boynton came to be published, was printed here today.

The correspondence was that in which Senator Johnson was quoted as admitting that he was losing ground in California.

Andrew S. Lawrence, publisher of the San Francisco Journal, which first printed the correspondence, today published in his paper a statement saying that Hardwick was an entire stranger to him when he first came to the Journal office seeking employment.

He said that he had been secretary to Albert Boynton, chairman of the Republican state central committee," Boynton declared. "He also told me that he had in his possession a very interesting letter from Hiram Johnson in which my name was mentioned in connection with that of Herbert Hoover and Harry Chandler of the Los Angeles Times.

"I told him I had heard of this letter several times but had not yet seen a copy of it.

"I asked Mr. Hardwick if he had any objection to its publication. He said there was no objection as far as he was concerned. He did not ask any compensation for the letter nor did I make any suggestion that he would receive any.

"I did not offer him money for any additional letters or suggest that he go back to Boynton to get any."

Governor Richardson made a statement reiterating what he first told the United Press yesterday—a denial that he had promised Hardwick a state position and an expression of willingness that any letter he has written be published.

GOV. WALTON OF OKLAHOMA SAYS KLAN IS BEATEN

[By Associated Press]

OKLAHOMA CITY, Sept. 22.—"The Ku Klux Klan is beaten," Governor Walton declared today following the arrest of N. C. Jewett, grand dragon for the organization in Oklahoma, and other sensational developments in the executive's warfare on the invisible empire.

Warrant for arrest of Jewett was issued by Prosecutor J. K. Wright who admitted he had personally paid an initiation fee into the Klan. Jewett was released on $1000 bond after pleading not guilty.

Evidence on which Jewett's arrest was based was given the military court of inquiry by Dr. A. A. Maupin, a dentist and former Klan member. He said Jewett admitted to him that he had "layed on the lash" personally in the flogging of E. R. Merriman.

WRECK INQUIRY IS NEARING END IS REPORT

Endeavoring to Prove That Radio Signals Were Inaccurate

SAN DIEGO, Calif., Sept. 22.—The question of why the seven destroyers went on the rocks off Point Arguello was nearer solution here today as it became apparent that attorneys for the defendant officers were basing a large portion of their case on the reported inaccuracies of radio compass bearings in the vicinity.

If it can be proved that no great stock was to be taken in the radio warnnigs and positions sent out by the Point Arguello compass station, a justification for the fleet officers ignoring them on the fatal night would be obtained.

By these legal tactics it appears that the navigating officers are conceding that their own orders, based on reckonings of position made solely by themselves, sent the ships on the rocks. Observers at the inquiry say that the defense case will rest on the basis that in view of alleged past inaccuracies the ship's officers did wisely in disregarding the advice given them by the shore station, even if it was correct.

Previous testimony shows that the ships were told by the radio station that the dangerous rocks were still ahead of them. The commanding officers aboard the destroyers refused to accept this bearing and insisting that the rocks had been passed, ordered the fleet to turn to shoreward, presumably to sweep into the open channel beyond. Fifteen minutes later the ships piled up on the rocks.

ACACIA AVENUE P.-T. A. ELECTS ITS YEAR'S OFFICERS

An important business session of the Acacia avenue P.-T. A. was held Friday afternoon at the school by new officers and members, with the new president, Mrs. L. D. Torrey, presiding.

One of the matters discussed was the furnishing of milk to the children of the school at the 10 o'clock recess and a decision was reached to try it for one month. Each child will receive one-half pint per day provided the mother pays 25c the Friday previous to cover the week's supply.

New officers are: President, Mrs. L. D. Torrey; vice-president, Mrs. W. B. Alexander; secretary, Mrs. Carrie Levey; treasurer, Mrs. A. C. Moll; auditor, Mrs. Wesley Bullis; historian, Mrs. J. A. Searles.

Four chairmen of committees were named, viz., Membership, Mrs. A. Holgate; publicity, Mrs. E. B. Sutton; finance, Mrs. William B. Alexander; patriotism, Mrs. E. F. Strong.

Other chairmen will probably be announced at the next meeting.

PUBLIC LANDS TO BE OPENED TO EX-SERVICE MEN

[By Associated Press]

WASHINGTON, Sept. 22.—Opening of more than 111,000 acres of public lands in California, Nevada, New Mexico and Utah to former service men of the World war was announced today at the interior department. Dates for filing will be made public later by local land offices. The lands comprised in the tracts opened under today's orders included 700 acres in San Diego county; 13,700 acres in Mineral county, Nevada; 19,700 acres in Chavos county, N. M., and 78,000 in Garfield county, Utah.

HENRY CANTOR CONCERT TONIGHT, T. A. CLUBHOUSE

Music lovers are being reminded that tonight the ways and means section of the Tuesday Afternoon club presents Henry Cantor, operatic tenor at a farewell recital before he leaves for the Orient. A wonderful program will be given by Mr. Cantor, who has a most unusual voice, and whose concert has the social support of the men and women most prominent in the social life of Glendale who were glad to act as patrons and patronesses.

TRUCK DRIVER IS RUN OVER AND KILLED

Foot Brake Fails, Swerves to Roadside, Thrown Under Wheels

A terrible accident which resulted fatally, occurred Friday on Verdugo road at a point opposite 2101 on that thoroughfare between 11 and 12 in the forenoon.

C. B. Miltenberger, of 1317 East Windsor road, hauling gravel for Gordon & Harrison, was driving south with a heavily loaded truck. The drive-shaft pinion gear broke, rendering his foot brake useless, and leaving him only the emergency brake. In an effort to stop the machine which was probably gaining in momentum he evidently tried to swing over to the side of the road into a ditch to stop the truck. No one witnessed the accident, but it is supposed that when the front wheels hit the bank, the steering gear jerked and he was thrown out, the rear left wheel passing over him and crushing him. The truck continued on approximately 129 feet from where it ran over its driver and 48 feet from where he started to turn to the left to get into soft dirt and thus stop the car.

William Mitzsehe of 1224 East Harvard, motoring north on Verdugo, reached the scene a few minutes after the accident occurred. H. and W. L. Gammill of 2101 Verdugo rendered all possible assistance, putting the dying man into a Ford truck and taking him to the Research hospital where he expired at 12:10 without regaining consciousness.

Mr. Miltenberger was 42 years of age and leaves a widow but no children. A coroner's inquest will be held at the Kiefer & Eyerick undertaking parlors Monday.

AI RLEVIATHAN SAILS IN MAJESTY OVER CAPITOL

WASHINGTON, Sept. 22.—Flying an hour late in a misty rain which enshrouded her, the ZR-1, the navy's new aerial Leviathan visited Washington today, flying over the capitol, the White House, Mount Vernon and the tomb of the Unknow Soldier at Arlington where she dropped a wreath.

The big ship made the flight from Lakehurst apparently without incident.

President and Mrs. Coolidge left their luncheon to go out in the White House grounds and get a better view of the passage of the monster. All official engagements —luncheons and otherwise—were interrupted while cabinet members, diplomats and others went out to get a brief glimpse of the spectacle.

The wasp-like craft of the air service were darting and tumbling about in the fog doing loops and turns and slips while the ZR-1 sailed majestically through their midst like a New Foundland dog being annoyed by a pack of pups.

Then after one more circle over the streets and the city she disappeared in the fog and headed back to her hangar at Lakehurst. A silver gray form slipped through the misty curtain which almost obscured her, thousands lined the streets and crowded the tops of the buildings to see her.

MORE NEW CITIZENS MADE IN CHICAGO

[By Associated Press]

CHICAGO, Sept. 22.—Despite the stringent immigration restrictions of the last few years, applications for naturalization here have increased to more than 30 daily, Deputy Clerk Thomas V. Sell has announced.

"Where formerly immigrants remained unnaturalized for years after arrival in this country, they now take out their papers as soon as they are eligible," Mr. Sell declared. "The reason for this is that manufacturers and other employers of immigrant labor are becoming increasingly insistent that their employes be American citizens, or at least that they shall have taken out first papers."

THE WEATHER

[By Associated Press]

Southern California: Unsettled weather with showers tonight and Sunday; moderate southwesterly winds.

SENIOR CLASS OF GLENDALE HIGH IN FIRST MEETING

The senior class at Glendale High, of which Theodore Haig is president, had its first meeting Friday and was addressed by Principal Moyse, who asked for the cooperation of the class in maintaining the esprit de corps of the school and maintaining creditable standards.

"You have planned," said he, "a very peppy year and the school authorities are glad to see it, but it must be kept well under control so it will work along constructive lines. We sympathize with your desire to make your last year in the school a fine and happy one.

"The first thing you must do is to determine whether you are seniors. By that I mean you must check up your grades and ascertain what is needed for graduation and whether the work you have laid out for the year will complete the graduation schedule. There will be no chance to get into college a year hence unless your grades are all of high rank.

"If you find your grades are below the recommending standard, the wise thing to do would be to add review work to your advanced work in other subjects so that at the end of the year everything to your credit will be positive asset towards getting into college. You should give yourselves the benefit of the doubt, even though at the present time it does not seem likely that you will be able to go to college. One never knows what may happen to change circumstances."

KIWANIANS ENJOY VENISON FEED BY AIRPLANE

A great big venison feed, furnished by "Doc" T. C. Young and Lon Baird, the re-al-tor, was enjoyed Friday noon by the members of the Kiwanias club of Glendale at the Tuesday Afternoon club dining room. The venison was killed by these husky hunters away up in the northern part of Santa Barbara county and was brought to Glendale via a flying trip in the Fiat. As a result of the announcement of a venison feed, there was an unusually good turnout of the "boys," and it was a rousing "go" from start to the last bell.

"Doc" was the winner of the attendance prize of the day. When he went forward to accept the prize, he was asked for an account of his trip.

"When we planned this trip we hoped to make it a whirlwind affair. For this reason we decided to leave our wives at home. When we landed on the job imagine our surprise to find the ladies there waiting for us with the Indian guide.

"I bet Baird we would get a buck before 6 o'clock the first night. We hunted hard all morning and all afternoon. When I was ready to give up I turned a corner in the hill and out jumped a buck. I killed it, but th fellows at camp declared the shot that brought it down was not fired until two minutes after 6 o'clock. They refused to pay the bet.

"We killed six deer, four of which we brought home with us. We had quite a time dodging from one game district to another, but finally landed in Glendale."

Lon Baird followed with a few "high lights" that were forgotten by Dr. Young.

The introduction of guests followed.

Coach Hayhurst of the High School invited th members present to witness football game to take place yesterday afternoon.

CHINA'S POST OFFICES AIDED

[By Associated Press]

SHANGHAI, Sept. 22.—Disturbed conditions in various parts of China are reflected in the country's postoffice report for 1922, which records general decreases in the quantity of postal matter handled. The financial returns for the year show a revenue of Mex. $17,100,719.33. Working expenses were Mex. $13,256,358.37.

Huge gains in all phases of the activities of the postoffice will be recorded this year since all foreign postal agencies closed on December 31 last and the burden of the work these did is shifted to the Chinese postoffice.

SUN DRUG CO. HAS PURCHASED THE JENSEN STORE

Usual Sun Policy Will Prevail Says Manager Millett

The Jensen Drug store, which since the completion of the Jensen building has been conducted by the Jensen Drug company, has been purchased by the Sun Drug company, which firm took charge of the establishment this morning.

Lester Francis Millet, who has been placed in charge of this store, stated this morning that the Sun company is gratified at being able to locate in Glendale, and that the firm will do everything possible to give the Glendale patrons the same high class service that it has given through its several stores in Los Angeles, during the past few years.

The personnel of the local store, with the exception of the manager, will remain the same as when it was operated by the Jensen company, according to Mr. Millet and the prompt service and courteous treatment that has been given by this concern in the past will continue.

The drug company opened its first store in Los Angeles about 20 years ago and at this time it is operating 34 stores in and around that city.

"The usual Sun policy will prevail in connection with this store," said Mr. Millet this morning. "We will give the same prices, the same quality of goods and the same efficient service that the Los Angeles stores are affording.

"No material change will be made in this store, as this establishment is as complete in stock and equipment as it could possibly be.

"We're going to practice the Golden Rule, that's all."

The time of opening on Sundays will hereafter be different than formerly. The store will open at noon and remain open the remainder of the day, stated Mr. Millet.

NEARLY TEN MILLIONS SUBSCRIBED FOR RELIEF

[By Associated Press]

WASHINGTON, Sept. 22.—Contributions to the Japanese relief fund jumped another $200,000 over night and the total reported today at national headquarters of the Red Cross was $9,257,700. Of that amount, almost $8,000,000 has been collected.

GENERAL RAINS IN NORTHLAND QUENCH FIRES

[By Associated Press]

SAN FRANCISCO, Sept. 22.—The first general rain of the season fell last night over Northern and Central California. Forest fires that had overrun mountain and hill districts for a week were quenched, but damage was threatened to grape, prune and pears drying in the fields.

In consequence of a warning sent out yesterday by the weather bureau, it is believed a greater portion of the drying fruit was covered and saved.

Santa Rosa recorded the greatest precipitation with .63 inches. Other figures were: Red Bluff, .56; San Jose, .34; Merced, .36; Paso Robles, .27; Stockton, .16; San Luis Obispo and Chico, .12; Sacramento and Colusa, .08; San Francisco, .01.

Showers are promised over the same area tonight, with clear skies tomorrow.

HI SCHOOL BOARD ACTS ON MANY MATTERS

School Equipment, Students' Transportation, New Teachers Are Confirmed

At the meeting of the High School board of trustees held Friday evening, four members were present, viz: H. W. Yarick, president; Albert Pearce, A. W. Tower and Thomas D. Watson.

A delegation from the Elks' club composed of W. B. Hunter, J. E. Wimmer and James F. McBryde appeared before the board in regard to the paving of frontage on Colorado between Louise and Brand, and City Attorney Morrow was also present. The matter was discussed at some length but no action was taken.

The bid of the Webber company for Venetian blind shades at 41½ cents was accepted by the board, the number purchased to be left to the discretion of the house committee.

Replies to inquiries sent out some time ago by the board to heads of families in Sunland and Tujunga asking whether they preferred to have their children transported to the high school by public buses, by their own private autos or by other private autos, showed a strong preference for the use of private autos, either their own or others. As the returns were not complete the board deferred its final decision on the matter until other heads of families could be heard from.

Bids for supplies and equipment for the new building from Parmelee & Dohrman and from Cass Manufacturing company, were brought before the board and taken under adisement. The business manager was asked to investigate in regard to the different pieces of equipment offered and report to the house committee, which was given authority to act in the matter.

Bids were also received from the Westinghouse Electric Co., for electric ranges and Mr. Oliver was instructed to confer with the Public Service department at the city hall to secure information in regard to other electric ranges on the market.

John E. Kienle having been engaged as a new teacher of history under instructions given Principal Moyse at a previous meeting to sesure any teachers needed to care for the extra enrollment, the board confirmed his election. Mr. Kienle taught in Colton high school for several years.

Diplomas were ordered by the board for Fred Peck and Eugene Flynn, who took summer school work and completed units required for graduation which they lacked when the school closed in June.

CANADA WHEAT CROP FORECAST

[By Associated Press]

OTTAWA, Ont., Sept. 22.—Canada's 1923 wheat crop will total 382,514,000 bushels, according to an official forecast by the Dominion Bureau of Statistics, based on reports from crop correspondents throughout the dominion. The average yield an acre of wheat will be 16 3-4 busheds, compared with 15 3-4 bushels, the average for the last ten years.

GRAVE FEARS EXPRESSED FOR LOST EXPLORERS

Ten Men of Government Party Missing, Wrecked Boat Found

[By Associated Press]

KINGMAN, Ariz., Sept. 22.—Somewhere in the rocky precipitous canyons of Arizona's uninhabited northern region, several hundred miles from a sign of civilization, ten men traveling in strong, wave-proof boats are struggling today against the turbulent flood waters of the Colorado river. The men are members of an exploration party of the United States Geological survey, charting the Colorado river.

Isolated completely from the outside world and walled in in the river channel with rugged peaks at places reaching 5000 feet into the sky on either side of them, the men, members of a survey party, coursing the unchartered river, are traveling a most dangerous region. For a hundred miles or more below Bright Angel, which the explorers passed three weeks ago, this canyon must be traveled.

The river is at flood stage, having in four days risen 29 feet and sent its waters over its banks at many places.

The mute evidence of a wreck, a battered boat, bearing the insignia "U. S. G. S.," reported to have been seen in the waters last Thursday at Katherine Mine, an isolated spot on the river 200 miles from where the narty now is supposed to be, held a story that none but the explorers themselves know.

Upside down and bearing marks of its plunging course through the rapids, the boat was sighted by R. L. Bimmick, superintendent of the mine who arrived in Kingman with his story yesterday. An attempt to recover the boat was unsuccessful, but the superintendent said he was positive the boat bore the survey's insignia.

There are men in Kingman who know the canyon country, veterans of the rocky region. Their opinion today as to the safety of the party was that "one guess is as good as another."

Landing the boats in the canyon through which the river flows is almost impossible except for a place now and then where a ledge or rock juts out from the side of a wall.

On the basis of traveling eight miles an hour in the current, the boat should by today have been carried far down the western course of the river near Yuma, Ariz. It was possible, however, that it may have become lodged in the boulders along its course, some of which are as large as houses and which are strewn along the river bed.

The acting governor sent a telegram to Sheriff Mahoney of Mojave county requesting him to detail men to patrol the canyon rim to try to locate the exploring party and to render assistance if needed.

PHOENIX, Ariz., Sept. 22.—Suggestion that the war department send an airplane to fly above the canyon through which the Colorado river flows to ascertain the plight of the exploration party sent by the U. S. Geological Survey to chart the river, was made in a telegram sent to Washington officials this afternoon by Acting Governor R. E. McGillan of Arizona.

LIQUOR FANATICS 'LIE ON EVERY SIDE'

Rev. Robert B. S. Hammond, of Australia, who recently made a trip to the United States says that he was astonished to find how little acquainted many individual Americans were with the remarkable achievements of the prohibition law. Going from city to city and village to village as Mr. Hammond did, he observed things which he says were not known by many of the Americans with whom he came in contact. "Thousands of Americans gaze at an isolated bootlegging fact and judge the entire prohibition situation by it," he said. "I read somewhere the advice of a medical man given to those who would sleep well. He said everybody should lie on the right side. The liquor advocates scornfully reject such advice and lie on every side. If what I saw in America were published to the people of Australia, the Commonwealth would go dry in less than two years."

DAMAGED

THE DISTRESS OF NATIONS

WHY? THE REMEDY

In a FREE LECTURE

AT THE

WOMAN'S CLUB

Monday Eve., Sept. 24th, 7:45 P. M.

Mr. Pollock will prove by prophecy fulfilled, and in course of fulfillment, that the greatest crisis of the age is upon the world; that all nations are mustering their forces for the great battle of Armageddon foretold by the prophet of God; that the Lord will cut short the terrible conflict and Millions Now Living Will Never Die.

The speaker accepts the challenge of a certain Eagle Rock clergyman who recently declaimed against Judge Rutherford's public declaration at the great Coliseum that—"All Nations Are Marching to Armageddon, But Millions Now Living Will Never Die."

Proof will be presented that Judge Rutherford's pronouncements are entirely in keeping with present day events, are consistent with reason, and fully substantiated by Holy Writ.

G. R. POLLOCK of New York City
A representative of the International Bible Students' Association
A lecturer of International reputation,
A Profound Bible Student,
A Gifted Orator

Mr. Pollock Says:—

"THE WORLD faces a condition never before experienced. Fear has taken hold upon all classes of people because they see in a measure the things coming upon the earth. The nations are in distress and perplexity.

"THE WAR did not make the world safe for democracy. The very foundations of civilization are now shaken by revolution, labor strikes, official lawlessness, profiteers, Bolshevism and anarchy. Both capital and labor are resorting to extreme measures. The common people have lost confidence in their leaders.

"THE CLERGY have abandoned the Word of God and joined hands with big business and big politicians in an attempt to control the world, and these are opposed by radical forces.

"EUROPE is completely bankrupt, with her restless host of unemployed and discontents hourly increasing. Belligerent organizations are rapidly numbering their men and taking account of their strength. All contending forces are hastening to the great battle of Armageddon (Revelation 16:16). The disaster resulting is beyond the description of human words.

"BUT let the people take heart. The Lord will cut short the trouble, bring order out of chaos, establish peace and righteousness; and millions of people now living will become obedient to His order of righteousness and will live on the earth forever in peace and happiness."

PRIZES RAIN DOWN FROM THE SKIES FOR 'RED BIRD'

Several Glendale residents are no doubt as surprised tonight as the little red hen was when the rose leaf fell on her tail and she thought that the sky was falling. For today, according to schedule, Charles Davis, a member of the Smith-Sloan, Inc., organization, of 228 South Brand, Willys-Overland agents, was to fly over the city and rain down on Glendale people a shower of valuable tickets. Some of these entitle the holders to substantial cash prizes, others to automobile accessories and still others to rebates on the popular Red Bird Overlands. Someone has surely been surprised to see the valuable tickets come fluttering down out of the gray sky and holders will share in the $500 prize awards.

No doubt persons who have been on the lookout for the plane remembers as a few stray drops spattered down on them, that "it isn't raining rain, you know; it rainging something for nothing!" And it is hoped that many of them were rewarded for their vigilance. The flight was scheduled to start at 2:30 from the Glendale flying field on San Fernando road, where Mr. Davis stables his plane.

LODGES — CLUBS — CHURCHES

THIRTY LADIES DO RED CROSSING SEWING

About thirty ladies responded to the call for workers to do Red Cross sewing at the Congregational church Thursday. Four more worked at the home of Mrs. John Robert White. Such efficient work was done at both places that Red Cross officers believe they can finish all work on hand at a meeting to be held at the home of Mrs. White next Thursday so that the products of their industry can be forwarded to headquarters in New York to be sent abroad.

MISSIONARY WOMEN MEET WITH MRS. WHITE

About fifteen members of the Women's Missionary Society of the Broadway Methodist Church South met at the home of Mrs. N. M. White on Jackson street Thursday afternoon and after devotional exercises had a business session in which plans were made for the work of the society the coming year, and for the furnishing of the building of which the church has just taken formal possession at the corner of Broadway and Cedar, formerly occupied by the Glendale Presbyterian Church. Mrs. Milliken, wife of the pastor, presided.

RABBI MAGNIN TO SPEAK IN LOCAL PULPIT

Sunday evening, September 30, Rabbi Edgar M. Magnin, of the B'nai B'rith Temple, Los Angeles, will speak at the First Congregational church. He is a modern Hebrew and a very forceful, eloquent speaker.

COLUMBUS P.-T. A. HAS BIG ATTENDANCE

A big attendance marked the first session of the Columbus avenue P.-T. A. Thursday afternoon at the school, not less than 125 mothers presenting themselves. A number of reports were given by chairmen of committees and Mrs. Lamb, who conducts a store near the school, told of the branch library to which she has given space and which was used by the school children during the summer vacation. It was inaugurated by the P.-T. A. which will continue to foster it. A social hour followed the reading of reports in which new members were introduced and old ones renewed acquaintance.

SCIOTS INITIATE SEVEN NEW MEMBERS

Sciots, enthusiastic to the last degree, to the number of 125, met at Odd Fellows' hall Friday night for their regular session and for the initiation of seven candidates. Arthur Dibbern presided as Toparch. Following the session refreshments were served.

At the meeting to be held next Friday it is understood that candidates to the number of 19 will be initiated. At the rate the organization is growing it will outgrow its meeting place before long.

Mr. and Mrs. Philip Meismandel and son Charles moved recently from 511 Raleigh to 1132 Winchester. Have sold their home at the former location and built at the latter place.

RECENT WEDDING IN EAGLE ROCK

On Saturday afternoon last, at the home of Mr. and Mrs. Irvine Oliver, in Eagle Rock, Rev. W. E. Edmonds, of the Glendale Presbyterian church, united in marriage Miss Helen June Hafner and Nils Thure Ljunquist, Mr. and Mrs. Oliver witnessing the ceremony.

BULLARD-BROOKS WEDDING THURSDAY

Miss Mary Beatrice Brooks and Homer Lee Bullard were married at the home of Mr. and Mrs. William H. Loucks, 449 Salem street, on Thursday evening at 7:30, September 20, Rev. W. E. Edmonds, of the Glendale Presbyterian church, being the officiating clergyman.

MADRIGAL CLUB DIRECTORS TO MEET

Members of the board of directors of the Madrigal club will hold their first meeting of the season at the home of the president, Mrs. Paul Hoffman, 227 North Maryland avenue, Tuesday afternoon next at 1:30 o'clock. At this meeting plans for the coming season will be outlined. The club will hold its first regular meeting the first week in October.

EPWORTH LEAGUE CABINET VISITS PASADENA

The cabinet of the Epworth League of the First Methodist church went to Pasadena Friday night to attend a rally of district cabinet officers. Tonight three members of the league of the district cabinet are going to San Bernardino, the members being Elwood Ingledue, Bessie Ross and Harry Malone. At the Sunday night meeting of the league at 6:30, Harold Wagner, president of the student body of Occidental college will act as leader.

SURVIVOR OF JAPAN'S QUAKE TO SPEAK

F. C. Gilbert, who, it was feared had perished in the Japan earthquake, has arrived in California and will speak in Glendale Sunday afternoon at 4 o'clock. As it is expected a large number will desire to hear him, the lecture will be given in a cove on the grounds of the new Glendale Sanitarium. His theme will be: "My Experience in the Earthquake." The public is invited to attend.

PAGEANT, "A NIGHT IN DREAMLAND" TO BE GIVEN SOON

"A Night in Dreamland," one of the most picturesque, artistic and diversified entertainments that has ever been offered Glendale residents will be staged here in about three weeks. Jay Wellington, nationally known producer, will arrive in Glendale on Monday, from Eureka, where he has just concluded a showing of the big dramatic success. He will begin rehearsals at once.

The pageant is to be produced under the auspices of the Ladies' Guild of St. Mark's Episcopal church, in the Tuesday Afternoon clubhouse. Director Wellington has presented it in such prominent California cities as Hollywood, San Diego, San Bernardino, Riverside and Long Beach, where over three thousand people crowded the huge auditorium to witness the spectacle. Three hundred people are required in the cast. It is a production that offers singular opportunities for talented people of the community. There is a wide variety of beautiful scenes, from the opening, in which scores of children appear in their night robes with candles, and the magnificent modern garden party with its beautiful lighting effects, with solo dances and musical selections which follows the introduction. There is humor in the "Fun at the Movies" act, in which people at the movies see themselves as others see them, and the specialty number, "Here Comes the Bride," in which the bride loses a shoe, falls in a sneezing spasm, and entertains the crowd in many ways. The "Rosebud" number at the end of the night, in which 18 of the city's most beautiful girls will appear, one of their loveliest in a royal purple robe enthroned above them all is perfect. Costumes for this scene will make of each girl an America beauty, and in closing, a beautiful solo, "Rose-Bud," will be featured by a local musician.

The production will be strictly a community affair, all rehearsals to be open to the public. As many as desire a part in the "Night in Dreamland" are urged to attend the first rehearsal, for adults, which is announced for Monday night at 7:30. The exact location cannot be decided upon until Mr. Wellington's arrival, and will be announced on Monday afternoon in the Glendale Daily Press. All musical, dancing and dramatic talent of Glendale is asked to take part.

BLUE LODGES TO TAKE PART

Every one of the 17,000 Blue Lodges in the United States will be officially represented at Alexandria, Va., on Thursday, November 1, when the cornerstone of the George Washington Masonic National Memorial is to be laid amid impressive scenes. All the Grand Lodges of Masons also will be represented at this ceremony, and the largest number of American Masons ever gathered at any one time is expected to be present. Alexandria is just across the Potomac river from Washington, D. S., and near Mount Vernon, General Washington's residence.

T. A. CLUB IS NOW ACTIVELY AT WORK

Members of the Tuesday Afternoon Club are requested to pay their dues and secure their tickets of membership for the coming year from Mrs. A. A. Barton, social secretary of the club, before the club opens if possible, to avoid congestion the opening day.

Mrs. Barton will be at the club house every morning from now until the club opens to receive the dues and issue the tickets. The dues are $10 per year or $5 for the first half year. The club will open October 2 with a luncheon.

Tuesday afternoon, September 25 another card party will be given at the Tuesday Afternoon Club house by the Hospitality Committee of which Mrs. Hollingsworth is chairman. The general public is welcome to attend these parties for which a charge of 25c is made. Bridge and Five Hundred will be played.

Mrs. Roy Ballagh, curator of the Fine Arts Section of the Tuesday Afternoo Club, announces that a section meeting will be held at the club house next Tuesday afternoon at 1:30 o'clock to organize for the year's work.

Mr. and Mrs. H. W. Bailey and four children, who recently resided in the vicinity of Shelby, Montana, arrived in Glendale Thursday afternoon and are visiting with Mr. and Mrs. C. F. Stewart, 120 South Belmont street, who are parents of Mrs. Bailey. The jaunt of 2,000 miles was made in three weeks, the party camping out en route. Mr. and Mrs. Bailey were driven out of Montana by the grasshoppers. They, went to that state about 10 years ago, and since landing there they have experienced a series of crop failures. They will make their permanent home in Glendale.

C. L. Peckham is in Nogales on business and is expected home Sunday.

CITY PRINTING

RESOLUTION NO. 2106

A RESOLUTION OF THE COUNCIL OF THE CITY OF GLENDALE ORDERING CERTAIN IMPROVEMENTS TO BE MADE ON A PORTION OF HILLSIDE DRIVE AND CERTAIN STREETS AND ALLEYS INTERSECTING OR TERMINATING THEREWITH IN THE CITY OF GLENDALE.

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF GLENDALE:

SECTION 1. That the improvement herein described is required by the public interest and convenience, and the Council of the City of Glendale, State of California, hereby orders the improvement to be made on a portion of

HILLSIDE DRIVE

and certain streets and alleys intersecting or terminating therewith in the City of Glendale, described in Resolution of Intention No. 2066, passed by said Council on the 16th day of August, 1923, to which Resolution reference is hereby made for a description of said work.

SECTION 2. The district to be assessed to pay the cost and expenses of said work and improvement is described in said Resolution of Intention No. 2066, to which said Resolution reference is hereby made for further description of said assessment district.

SECTION 3. Bonds will be issued as provided for in said Resolution of Intention No. 2066.

SECTION 4. The Glendale Daily Press, a daily newspaper of general circulation, published and circulated in said City of Glendale, is hereby designated as the newspaper in which this Resolution and notice inviting street work proposals shall be published in the manner and form and by the persons required by law.

SECTION 5. The City Clerk of the City of Glendale is hereby directed to post conspicuously for five days on or near the chamber door of the Council, in the manner and form required by law, a notice with Specifications, inviting street work proposals or bids for doing said work; and said City Clerk is hereby directed to publish for two days in said newspaper hereby designated for that purpose as aforesaid, in the manner and in the form required by law, a notice of said work inviting sealed proposals or bids for

CITY PRINTING

doing said work, and referring to the Specifications posted or on file.

Said notice shall require all proposals or bids offered to be accompanied by a certified check or bond, either, as prescribed by law, and for an amount not less than ten per cent of the aggregate of the proposal. Said City Clerk is also hereby directed to publish this Resolution for two days, in the manner required by law, in said newspaper designated for that purpose, as aforesaid.

Adopted and approved this 20th day of September, 1923.

S. A. DAVIS,
Mayor, pro. tem., of the
City of Glendale.

Attest: A. J. VAN WIE,
City Clerk of the City of Glendale.
STATE OF CALIFORNIA)
COUNTY OF LOS ANGELES) ss.
CITY OF GLENDALE)

I, A. J. Van Wie, City Clerk of the City of Glendale, do hereby certify that the foregoing Resolution was duly adopted by the Council of the City of Glendale, State of California, and signed by the Mayor, pro. tem., at a regular meeting thereof, held on the 20th day of September, 1923.

Ayes: Hall, Horn, Davis, Kimlin.
Noes: None.
Absent: Robinson.

A. J. VAN WIE,
City Clerk of the City of Glendale.
9-22-23—2t

NOTICE OF AWARD OF CONTRACT

Pursuant to Statute and to Resolution of Award of the Council of the City of Glendale, California, adopted the 20th day of September, 1923, directing this notice, notice is hereby given that the said Council, in open session, on the 6th day of September, 1923, opened, examined and publicly declared all sealed proposals offered for the following improvement, to-wit:

Portions of Park Avenue, Acacia Avenue, Florence Place and Virginia Place and of certain streets and alleys intersecting and terminating therewith in the City of Glendale

as described in Resolution of Intention No. 2018, passed by said Council on the 12th day of July, 1923, to which said Resolution reference is hereby made for a description of said work, and of the district to be assessed therefor.

The Council of the City of Glendale determines that serial bonds shall be issued to represent assessments of twenty-five ($25.00) dollars or over for the costs of said work or improvement; said serial bonds shall extend over a period ending nine (9) years from and after the second day of January next succeeding the date of said bonds, and an even annual proportion of the principal sum thereof shall be payable by coupon on the second day of January every year after their date until the whole is paid; and the interest shall be payable semi-annually by coupon on the second days of January and July, respectively, of each year at the rate of seven per cent per annum on all sums unpaid until the whole of said principal and interest is paid.

Said bonds shall be issued in accordance with the provisions of an Act of the Legislature of the State of California, entitled "An Act to provide a system of street improvement bonds to represent certain assessments for the cost of street work and improvements within municipalities and also for the payment of such bonds," approved February 27, 1893, and of all Acts supplementary thereto and amendatory thereof.

And thereafter, to-wit: On the 20th day of September, 1923, awarded the contract for said work to the lowest regular responsible bidder, to-wit: City of Glendale, at the prices specified for said improvement in its proposal, on file for said improvement, to-wit:

Cast Iron Pipe, as per plan..$6,450.00

And that said award has been approved by the Mayor, pro. tem., of the said City of Glendale.

Clerk's office, City of Glendale, California, 21st day of September, 1923.

A. J. VAN WIE,
City Clerk of the City of Glendale.
9-22-23—2t

"A real friend is willing to share disgrace with you. If you break down at last in the stress of some temptation, if you go to pieces morally, a friend does not turn on his heel and go away. He is willing to go down into the deep dark places by your side."—Rev. M. J. Savage.

Truths in Epigram

Dare to be true: nothing can need a lie.—Herbert.

To know that which before us lies in daily life is the prime wisdom.—Milton.

Great wits are sure to madness near allied.—Dryden.

It is not necessary to light a candle to the sun.—Sidney.

ON THE ROAD

The ease with which the person of ordinary income may procure an automobile, has created a new type of traveler. The highways of the country are dotted with machines almost invariably with more than a single occupant. Some of the machines convey a family. Others hold members of a congenial party out in quest of venture. In the moving caravan across plains and over mountains are many who deliberately seek to learn the country, and who are on the lookout for an abiding place, or for a chance to enter business or get a job. It is seldom that any group is purposeless, or without definite objective.

So large is this new class that study and analysis of it has been undertaken by observers. The observations seem to have been made by those not entering into the variagated movement themselves, but looking on merely as spectators. They therefore fail to catch the spirit of the nomadic procession. The fact is that the people traveling thus are much like the rest of humanity. They want to see the country. They are seeing it better by automobile than they possibly could from the window of a Pullman. They experience close contact with the strangers they meet. More than getting a mere glimpse of landscape and city as they fleet by, they may see what the land produces, the method of cultivation; become aware of the character of the inhabitants. They are learning through methods that years ago had not been dreamed of, and these methods are within reach of moderate purses.

Among these highway travelers themselves are many exchanges of courtesy, and the beginning of many fine friendships. There are only a few who seek to impose on good nature, to sponge off fellow tourists. In the group at any representative automobile camp will be found skilled laborers, professional men, or vacationists looking for change and health. They are not tramps nor irresponsibles, but representative citizens of a useful class. When a family desires to see the Pacific coast, or to learn of the California concerning which its members have heard much, and is willing to endure the hardships of the long trip, the presumption is fair that the family is made up of the stuff that results in good citizenship.

There is no probabiilty that the social structure is to be much changed by the tide of cross-country travel. Modern conditions permit people to go far to see places they always had wanted to see. Now they can do that which had been denied them, as they are doing it.

WARNED OF DANGER

Last winter was dry. The summer has been more than usually warm. The rains of the wet season have not yet set in. As a result the forest reserve embracing the wooded heights back of the community of cities adjacent to Los Angeles is in a tinder-like condition. It could be started to flaming by the act of a careless hiker or camper. A match cast aside, the smouldering spark in cigarette or cigar dropped into the rubbish, the campfire left unquenched, might be sufficient to start a conflagration as disastrous and as uncontrollable as that which has just visited Berkeley. With such a blaze once started, and the wind in the right direction, thousands of beautiful and costly homes might be destroyed, the damage running into millions, and in many respects being irreparable. Houses could be replaced, but the denuded hills no longer would constitute an adequate watershed.

To exercise the utmost caution ought to be the invariable practice. Probably there had not for many years been a summer so marked by forest fires in California. The material injury wrought is beyond calculation. There is reason to believe that most of these fires were started by carelessness, and thus were without excuse. Such carelessness is difficult to check. The individual who does not hesitate at conduct likely to caused widespread ruin, is not to be reformed by the possibility of arrest and fine.

None save a lunatic would deliberately start a fire if there existed any doubt in his mind of his ability to keep it in bounds, and extinguish it as soon as its purpose had been accomplished. Yet many persons, ordinarily quite sane in deportment, use no discretion in a matter so vitally important. They don't think. It is to be hoped that something less than a vast catastrophe may arouse them from their mental languor and cause them to act as reasoning human beings.

A MATTER OF COURSE

Hardly could it be necessary to announce that Berkeley will rebuild. Any other reaction would not be in accord with the American spirit as manifested in every community smitten by great catastrophe. Many American cities have had loss through enormous fires. Chicago, Boston and Baltimore underwent such experience on a scale that threatened for a time to efface them from the map, physically and financially. Today they do not show a scar. Often the path of a furious blaze proves to be the path of progress.

How San Francisco came back will never be forgotten, for it forms a proud chapter in Pacific coast histohy. Out of the ruins sprang finer structures than had stood before. The new city was in all respects greater than the old one. So, doubtless, will it be with Berkeley. A long time may be required to restore the former beauty, but so far as human endeavor and artistry may accomplish this, there will be no delay. The processes of nature are slower.

Berkeley was early assured of the sympathy of all the region about. To students from all over the state it has seemed the center of events marking college life. For a period of years it has been a home to thousands of young men and women, and second in affection only to the homes from which they had gathered.

The people of Berkeley still feel desolated. Yet in a short time visitors will be asking "Where was that big fire? I can't see any sign of it."

SCIENCE GIVES FIGURES

Prof. Larkin, director of Mt. Lowe observatory, has been writing a series of lucid and informative articles from the standpoint of the scientist. These are so phrased as to be plain to the understanding of the layman. In one of them the opening sentence is "Since man appeared on earth 1,500,000 years ago," etc.

At the same time a visiting scientist of distinction, Dr. John C. Merriam of the Carnegie Institution, has been examining the La Brea beds, and he classes the fauna discovered there as having flourished 300,000 years ago. Thus the two scientists have in mind periods that reach far into the past, and yet that may be traced to the present day. In both lines of investigation the searchers find evidence of evolution. They so state with utmost frankness, giving the essential details. All of this is very interesting. To most intelligences it is sure to carry conviction. Perhaps it is fortunate for Mr. Bryan that he happens to be hereabouts at present. He has set up the theory that evolution is a figment. The situation affords him an opportunity to acquire knowledge. Or, if he prove wiser that the scientists, of teaching them the error of their ways.

One-armed automobile drivers at Santa Barbara are to be placed in jail. The order of the police is not to be taken literally. A driver with but a single army might be safe and sane. It is the driver who has two good arms, but wastes one by encircling his fair companion as they roll along heedlessly, who is in danger of being pinched.

Interest in baseball is far from dead, as attested by the recent mobbing of umpires at Sacramento. The umpire who fails to take out riot insurance is neglecting his personal welfare.

"ENTITLED TO LOVE"

By ESTELLE LAWTON LINDSEY

Some things can't be bought, and one of them is love.

When I say love can not be bought I have no reference to its often attempted purchase with money as a medium of exchange.

Estelle Lawton Lindsey

If lovable qualities are absent no amount of care will coax love from a child, though the child may recognize a parent's claim to a return in care, if the parents are sick, old or in any way incapacitated.

The matter is mentioned just now because of a discussion I heard a day of so ago, one in which a mother declared with an emphasis bordering on the vicious that parents were "entitled to love in return for care extended their children in their helpless years."

Incidentally she had not gotten what she felt herself entitled to and was embittered against her children, nor could she be made to see that she might have had their love if she had not by continuous and irritating admonition tried to make them deliver it as her right in return for the care she had given them.

In short the children felt that she had cared for them not because she loved or wanted them, but because she expected the care to later return her a profit. Her eagerness to assure this profit through the pressure of duty resulted in a condition that simply killed love.

Love is something that can't be commanded; it can only be invited, inticed or attracted. It's curious that parents of all people seem unable to realize this palpable truth.

Next to parents as offenders come husbands and wives. I've heard men sitting by my desk declare:

"But she must love me; she is my wife."

Which means, dear man, that she is so close to you that you should be very careful not to frighten love away or revolt it by filthy or careless habits. The one who oftenest loses love is he or she who depends on duty to round the little god up and keep him within the confines where they wish him to be after they have, as they think, bought and paid for him with money or service.

We may all be "entitled to love," but if we are it is only as we are entitled to food and warmth after we are born. In both cases it takes work, wisdom and tact to secure our heritage.

True we all must pay for love, but in the peculiar coin that love insists on and the only coin it recognizes; and that coin can not be the base coin of commercial exchange.

WATCHING THE PARADE

By JOHN PILGRIM

I have said it before—and I want to say it again—that no man should hold a job he does not like.

"Piffle!" the reader is apt to sneer. "A man holds a job because it is his job. What would become of most of us if we went around changing jobs, in search of the ideal one we could be happy in?"

All right. Now, once more—

"No man has a right to keep a job he doesn't like."

I know a man who was a miserable, incompetent, ill-paid professor of Greek. He was fired because he was of no account whatever, and dropped out of sight. Now he is the happiest man I know as proprietor of a poultry farm which he literally built up from the eggs. He has a wife, children, a place in society, contentment.

A man who used to fire an engine on the Erie is a floorwalker in a big city. He likes the work. He hated the engine.

A former minister is an art photographer. The man whose gallery he bought is happy as the owner of an inn in the north woods.

Some of us are tied to jobs, of course, by reason of debt and family and conditions. But nine out of ten of us could break the shackles of uncongenial employment and get into work we would like if we would just exert our energy and our will.

Next time you meet a man who is happy—whose face glows—who is frankly pleased with life and not afraid of the future—don't say the good chap doesn't know he has a liver.

Very probably he doesn't. But what is sure is that he is happy in his job. And that sort of a man is the sort of a workman his mates and his town can be proud of.

THE LISTENING POST

By James W. Foley

JAMES W. FOLEY

Nature expresses herself in many ways.

In an infinite number of ways.

In sea and sky and earth and air, and in the things that people them all.

In a widely varied assortment of things beautiful and useful.

And in some things not beautiful or useful.

The struggle against which make for purpose in life.

* * *

Who shall say what is most beautiful in the forest?

The oak, the birch, the sycamore, the elm?

The vine?

The shrub with its flowers.

The creepers that adorn and beautify.

* * *

All forms of expression.

Each serving its purpose of beauty and shade and flower and foliage.

Many serving utilitarian purpose in the lumber that is cut and polished.

The logs for the building of the house.

The leaves for thatching as our forefathers did.

* * *

So who goes into the wood will find the many forms of nature's expression.

Each lending its presence to the scheme of creation.

All making the forest.

And inspiring us to look about the world of living things for beauty.

For the forest is a living thing.

* * *

It has its youth and age.

It has its rise and decay and fall.

It has its life and death.

For Nature repeats herself in all of her living things.

The forest parallels human life.

As perhaps does the solar system.

* * *

For we know that there was a time when planets were not.

When little was as it exists today.

Before the flaming masses were whirled into space from—what?

A central sun?

A flaming mass?

Who knows?

* * *

There was a time when forests were not.

Whether from heat or cold, living things did not exist.

And then with the change in conditions upon earth came flora and fauna that could withstand the atmospheric conditions.

How?

Who can say?

* * *

We can say a thing exists by fiat.

But that is to think lazily.

The scientist looks for the origin of things.

Of germs and spores and seeds and kinds.

And from his study of causes he is able to promote the good and attack and destroy the bad.

* * *

Lazy thinking would destroy the world.

Lazy thinking about epidemics and diseases would have resulted in the depopulation of the world.

It is a fair view of life and its causes that we need.

And only by this can we build.

If science had not ventured boldly to study and discover we should still believe the world flat.

Songs of the Poets

There Is a Pool On Garda.—By Clinton Scollard

There is a pool on Garda,
'Tis fashioned by the moon
That climbs above the mountain's crest
What time the night birds croon;
The pool is paved with silver
Inwrought with burnished gold,
And in its deeps a treasure sleeps
The goblins stored of old.

There is a pool on Garda,
It will elude you still
Ply you howe'er strong a will;
'Twill flee you like a phantom,
'Twill lead you on and on;
A luring light 'twill fade from sight
What time the moon is gone.

There is a pool on Garda,
You'll see it in your dreams;
'Tis shaped of silvery glamor,
'Tis fused of golden beams.
Once you have caught the vision,
The fair elusive ray,
'Twill haunt your brain like some sweet strain
Forever and a day!

SABATINI

By DR. FRANK CRANE

WHEN a man recommends anything he likes to his friends, he is in danger of being a nuisance, whether the particular thing is a kind of smoking tobacco, a necktie, a brand of religion, or a new book. At the same time, when one strikes something which pleases immensely, it does not seem to be quite fair to keep it to himself.

I read many books, swarms of them, galaxies of them, oodles of them. Some I read because I am expected to read them, some because other people are reading them, some because I want to find out something in them, and some because I like them. The latter, however, are few. To come across a book that takes one by storm, holds him, fascinates him and gives him that rare intoxication that meets the inmost passion, is an event.

Recently I went upon a long journey and spent many days upon the train and steamboat. Upon this journey I found a book. It was entitled "Captain Blood," by Rafael Sabatini.

I read it, at first languidly, then interestedly, and at last went at it as a drunkard consumes his liquor or a child devours sweets.

I passed it on to the other members of my family. Each read it and each was consumed by the same flame that had consumed me.

I do not hesitate to say that this is the best story I have read since "The Count of Monte Cristo."

I do not judge of it as literature. All I know of it is that it is good, swift, clean English. But it is not of its style that I would speak.

It had something more than style, something rare, the rarest thing indeed I know of in writing. It had Creative Imagination.

A magazine editor once said to me that he wished he could get hold of a good story every month, something in the best manner of Conan Doyle. I replied to him that his wishes were modest, and that he probably failed to realize that out of the billion or so population of the world there were probably not over three or four individuals who could create a story, a really fresh, vivid, gripping story.

In "Captain Blood" Sabatini has proven that he is one of these few.

It is a story of buccaneering days in the Spanish Main, one of the most romantic and adventurous epochs of the world, and the reader is taken into the atmosphere of the time and is made to realize all its vivid charm, yet is skillfully kept from being nauseated by its brutality.

The best thing about it is that it is an imposing tale, a wonderful yarn. The reader is not interested in its descriptions, in its literary values, in its English, in this or that; he is interested in "Captain Blood" and before he gets through he is better acquainted with "Captain Blood" then he is with his neighbor who lives next door.

Whether this is a recently published book or not, I have not taken the pains to inquire. All I know is that I have just read it and I count it one of the great books of the world.

It took me out of myself. It opened a door through which I escaped from all the commonplace things of life. I am a thousand years old more or less, and it is very rarely that one can tell me a story interesting enough to blot out all my surroundings.

All I can say is that when I read "Captain Blood" I had the same sort of an experience that I had when I was a little boy and I heard for the first time the story of "Jack the Giant Killer" or "Little Red Riding Hood."

Visiting scientists are bent on recreation, for they didn't get much fun out of the eclipse.

* * *

Murders growing out of bootlegging transactions are now classed as incidents, and get newspaper space accordingly.

* * *

Martial law is not very desirable, but is considerably better than the absence of all law.

* * *

Some Chicago breweries are reported to be acting precisely as though they regarded prohibition as a vague rumor.

EASTERN POINT OF VIEW

A LUDICROUS ANOMALY

[Springfield Republican]

Reports from central Nebraska say that the Chinese pheasant, which is being propagated there under legal protection as a game bird, is causing damage to corn, and the Nebraska State Journal cites the Maine farmers who are "in perennial revolt" against game laws which protect deer. There is no anomaly more ludicrous than that of a state protecting game for the sport of hunters in a certain season and forbidding farmers or gardeners to guard crops at other seasons of the year against the same animal or bird. Massachusetts laws permit the shooting of deer that are found damaging, or apparently about to damage, "crops, fruit or ornamental trees." Has not Maine given its farmers this right?

COMMENT ON DAY'S NEWS

By HENRY JAMES

HENRY JAMES

Out of Japan for a long time there will be coming tales of individual heroism. Every returning traveler will add to the quota.

No people nor no race has any monopoly of that distinguished type of courage that in emergency elevates the human unit to the plane of valor.

Among the little stories thus far related, that of Prof. Katherine Cranor of the University of Iowa is unique. It brings out oriental traits. The statement often has been made that in the occident, oriental character is not comprehended; that it is different, formed on a strange system of ethics.

Prof. Cranor was riding in a rickshaw in Tokio at the instant that buildings on both sides of the street began to fall. The rickshaw driver grabbed her, thrust her under the rickshaw, as the only available protection, and superimposed his own body so as to catch the brunt of what might fall.

Nothing strange about the system of ethics that guided his activities. He was quick-witted, courageous, determined. In fact, on the instant the coolie became the hero. Perhaps it is hard to understand the oriental at times, but when he is brave and loyal to his trust, the color of his skin does not count, and he is no puzzle at all.

* * *

A Texan named Norfleet has won fame in a peculiar fashion. In the first place he was duped by confidence men, who thought he was a rube, and who seemed to be right about it. The experience rubbed the crudity from Norfleet, and suddenly he became worldly wise.

In his new and becoming role he has caused the arrest of sixty-eight swindlers of the type that had taken him in, including all that had a part in that particular game.

Perhaps if the average detective were to lose heavily on a fake horse race, it would so brighten the wits of sleuths in general as to break up the bunko business entirely.

* * *

A woman living in America left $12,000 to her native town in Germany. That gives it a chance to pay all its debts, or to invest the sum so that the income would meet all municipal expenses.

In the land of the mark, even a solitary dollar is a pile of money.

* * *

Rumors concerning a red revolt in Germany continue. The significance of such rumors may not be estimated just now. Possibly they are without significance.

* * *

In Berlin there is said to be a tax on automobiles, and no owner of an automobile paying the least attention to the tax. In the old days German municipal government was pointed to as a model. The system must have broken down.

* * *

Never, probably will the loss of life in the Japanese earthquake be reduced to figures.

After the count had been supposed to be reasonably complete, comes straggling from the region of Yokosuka the rumor that that city, a place of 100,000, has been obliterated.

* * *

A member of the I. W. W. has come all the way from Siberia to begin serving his sentence of one to fourteen years, an appeal having been decided against him.

The man evidently has a code of honor that ought to make Big Bill Haywood blush. Bill, it will be remembered, did not come back.

If the courts were to let the service of the returned man's term count so as to include his time in Siberia, there probably would be no objection. He deserves credit for gentlemanly behavior.

OUR CHILDREN

By ANGELO PATRI

A SURPRISE HARVEST

For nine years his mother had tried to teach Charlie some manners and as far as she could see she could keep on teaching him good manners for the rest of his life without troubling him in the least about it. Charlie always forgot.

"Let him come with us, Minnie," urged kind Aunt Trot. "He'll be such company for Ben. They'll be company for each other. And it will be a rest for you as well as a change for him. Let him come for two weeks."

"I'm ashamed to have him visit anybody," confided mother to father that night. "I'm afraid of what he'll do at the table. And he never remembers to take off his hat or to say thank you or to give a lady a chair or anything. I hate to keep him home. He wants to go so much."

"Ah, let him go," said father. "Suppose he does make a few breaks. He's only a kid. He won't do anything so terrible."

"You don't know him," said mother darkly. "The things he does and does not do! If I've told him once I've told him a thousand times to keep his fingers out of his plate. Will he? Not if he wants to put them in, he won't."

But Charlie was allowed to go with many cautions as to hats and hands and sitting down and getting up and firsts and lasts and prayers and tooth brushes and muddy feet.

At the end of the two lonely weeks Aunt Trot brought him back. "I'm glad you let him come, Minnie. If it was only as an example to Ben. That's the best mannered child I ever saw in my life."

Minnie looked at her good sister, never given to spoofing, not known for sharpness of tongue. The kindly face was earnest, the eyes serious as she went on.

"He never forgot to say please or thank you or excuse me once the whole time he was there. At the table he used his knife and fork and spoon as nicely as anybody could and never forgot his napkin or wiped his hands on his clothes or anything. Really he was wonderful. How do you do it? If only Ben was half as well mannered I'd be happy."

"I'm very pleased to hear that he was a nice boy," said mother looking about cautiously. "I hope he will continue to be so, I'm sure. You must have been a fine influence for him, Trot."

That evening when Charlie was getting into bed his mother said, "Charlie, did you brush your teeth and why didn't you hang up your bath robe?"

"Oh mother, let me alone. I'm tired to death doing all those things. I never worked so hard at being polite and not disgracing you in all my life. What's the good of being home if I have to keep that up?"

And mother picked up a bath towel that bore the mark of two black hands and smiled and sighed. Anyway he knew manners if he didn't use them overmuch, she thought. Perhaps some day he would remember for good.

DO YOU KNOW THAT—?

On account of injurious plant diseases and insect pests, the importation of seed rice into this country from all foreign countries, except Mexico, has been prohibited.

The New Jersey Agricultural Experiment Stations have published a mosquito manual for use in New Jersey schools.

Due to scientific methods of control, only about four in every 100 straws of wheat just harvested in Ohio were infested with the Hessian fly, whereas in 1921, 17 out of every 100 straws were damaged by that pest.

A factory large enough to supply the whole Canadian market with artificial silk is to be established in that dominion by a large British manufacturer.

The Mexican government has organized a commission to study the water power problem and the desirability of electrifying certain Mexican railroad and street car lines.

The total volume of all the oceans and seas is about 325,000,000 cubic miles.

An aerial pageant was recently held by the British Royal Air Force in Palestine and excursion trains from Jerusalem, Jaffa, and other neighboring cities of the Holy Land carried spectators to the exhibition.

CITY PRINTING

RESOLUTION NO. 2107

A RESOLUTION OF THE COUNCIL OF THE CITY OF GLENDALE ORDERING CERTAIN IMPROVEMENTS TO BE MADE ON PORTIONS OF VISTA COURT, GREEN STREET, AND CERTAIN STREETS AND ALLEYS INTERSECTING OR TERMINATING THEREWITH IN THE CITY OF GLENDALE.

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF GLENDALE:

SECTION 1. That the improvement herein described is required by the public interest and convenience, and the Council of the City of Glendale, State of California, hereby orders the improvement to be made on portions of

VISTA COURT
GREEN STREET

and certain streets and alleys intersecting or terminating therewith in the City of Glendale, described in Resolution of Intention No. 2068, passed by said Council on the 16th day of August, 1923, to which Resolution reference is hereby made for a description of said work.

SECTION 2. The district to be assessed to pay the cost and expenses of said work and improvement is described in said Resolution of Intention No. 2068, to which said Resolution reference is hereby made for further description of said assessment district.

SECTION 3. Bonds will be issued as provided for in said Resolution of Intention No. 2068.

SECTION 4. The Glendale Daily Press, a daily newspaper of general circulation, published and circulated in said City of Glendale, is hereby designated as the newspaper in which this Resolution and notice inviting street work proposals shall be published in the manner and form and by the persons required by law.

SECTION 5. The City Clerk of the City of Glendale is hereby directed to post conspicuously for five days on or near the chamber door of the Council, in the manner and form required by law, a notice with Specifications, inviting street work proposals or bids for doing said work; and said City Clerk is hereby directed to publish for two days in said newspaper hereby designated for that purpose as aforesaid, in the manner and in the form required by law, a notice of said work inviting sealed proposals or bids for doing said work, and referring to the Specifications posted or on file.

Said notice shall require all proposals or bids offered to be accompanied by a certified check or bond, either, as prescribed by law, and for an amount not less than ten per cent of the aggregate of the proposal. Said City Clerk is also hereby directed to published this Resolution for two days, in the manner required by law, in said newspaper designated for that purpose, as aforesaid.

Adopted and approved this 20th day of September, 1923.

S. A. DAVIS,
Mayor, pro. tem., of the City of Glendale.

Attest: A. J. VAN WIE,
City Clerk of the City of Glendale.

STATE OF CALIFORNIA)
COUNTY OF LOS ANGELES) ss.
CITY OF GLENDALE)

I, A. J. Van Wie, City Clerk of the City of Glendale, do hereby certify that the foregoing Resolution was duly adopted by the Council of the City of Glendale, State of California, and signed by the Mayor, pro. tem., at a regular meeting thereof, held on the 20th day of September, 1923.

Ayes: Hall, Horn, Davis, Kimlin,
Noes: None.
Absent: Robinson.

A. J. VAN WIE,
City Clerk of the City of Glendale.

Belvedere Gardens Square Mecca of Homeseekers

Two years ago a peaceful dairy farm. Today a hustling crew of workers turning idle pasture land into spacious streets and building homes. This is the story of Belvedere Gardens Square, a story that clearly shows the need for more homes to accommodate the many newcomers to Southern California, and as clearly demonstrates what is being done to care for the rapid expansion in this territory.

But it is not often that property can be found conveniently close to the center of activity. However, Belvedere Gardens Square is one of the few exceptions. Only 6.2 miles from Seventh and Broadway, and at the same time located close to an established community of 20,000 persons, this property of Snyder & Winston offers all the advantages of being conveniently close to Los Angeles and places of employment with the added advantage of being ideal homesite property.

Though only recently placed on sale the property has established a remarkable sales record, sales to date totaling well over $500,000. Correspondingly there has been pronounced building activity, and a rush on the part of the company to install improvements to accommodate the many lot purchasers who contemplate immediate building. To encourage this home building all improvements are being installed as rapidly as possible. They include water, gas, electricity, curbs and oiled and crushed rock streets, all of which are to be installed at no additional cost to the purchaser.

At the present time there are more than 20 homes scattered throughout the tract, with many more in the process of construction. However, with work being rushed, the new Union Pacific industrial center, which is only a stone's throw from the tract, many buyers, appreciating that the thousands to be employed in this new industrial center will need accommodations, plan to build in the near future. The fact that the property is conveniently close and at the same time far enough away to provide a real home atmosphere, inclines many to think that it will be the most acceptable location for the big majority of men and women employed in this new manufacturing district.

The fact that the proposed new major boulevard connecting Pasadena and Long Beach is to intersect whittier boulevard at Belvedere Gardens Square, has assured purchasers of the security of their investment.

Pasadena boulevard has been described as the Western avenue of the East Side, and we are endeavoring to make it more than come up to the expectations. For instance, throughout the property we will pave it from curb to curb, 90 feet wide, with concrete and light it every 150 feet with beautiful ornamental lights. All the public utilities will be installed in the alleys in the rear to prevent the tearing up of the streets. These alleys will of course expedite traffic considerably.

HARVEST MOON TO LIGHT PARTY AT BALLAGH HOME

Choosing the old happy harvest home days as a motif, Mrs. James Henry Ballagh of 308 North Louise will be hostess tonight to over three hundred prominent social leaders and club members of Los Angeles at a harvest moon dance.

Out of doors, in the perfect garden setting, the scene of the party will be as attractive as the genius of modern electricity and artistic designing can make it. There will be countless orange gold pumpkins, great sheaves of corn stalks and all the other trimmings that from days uncounted have been synonymous with festive occasions in the horn-of-plenty days of fall. So the moon, tonight, if it shines, will shed a silver glow over a harvest home festival as nearly resembling the scenes of festivities in the old days as it is possible to reproduce them in modern ways. Although the harmonious, enticing strains of Kelly's Shrine Orchestra, Glendale's popular music dispensers, will be unlike the "fiddler's three" that used to play for the old barn frolics in the golden season "way down east," there will be many of the same old pieces played, set to a new syncopation all the more conducive to grace and nimbleness. The guests will partake of real harvest home refreshments, sweet cider, cakes and other good things.

The honor guest will be Mr. J. C. Gerry, a distinguished man of letters prominent in Chicago society, who is a guest at the Ballagh home. He is owner of the People's Hospital in the eastern city and a brilliant speaker, much in demand there as an after-dinner orator.

The guests will be entertained during the evening by some of the finest professional singers and dancers to be secured in the country.

This feature of the party will be a rare treat, as such famous artists as Janeski Robenoff, great Russian ballet master, will appear.

Assisting Mrs. Ballagh in receiving will be Mrs. Charles Sumner Kent, Mrs. Emmaline Bancroft Harmon, Mrs. Courtney Ballagh, Mrs. Roy Kent, Mrs. Spencer Kelly, Miss Ruth Schaffner, all of Los Angeles, and Mrs. Frankie Webb of Glendale.

In its moonlight garden setting, this affair promises to be one of the most brilliant of the season.

W. C. T. U. HOLDS A BUSINESS AND SOCIAL SESSION

The Glendale W. C. T. U. met yesterday with Mrs. Clifford A. Cole, 132 South Kenwood, for the regular business and social session. Mrs. Cole's home was artistically and colorfully decorated with huge bouquets of waxen dahlias, and every one of the crowd present voted it one of the most enjoyable sessions possible.

During the business session the invitation from the Central Union of Los Angeles was announced. This requested the attendance of the local group at the reception in honor of Mrs. Eva Wheeler, the state president, who has recently returned from the national convention, the Fiftieth Crusade Convention, at Columbus, Ohio. Announcemet was already made of the W. C. T. U. County institute to be held at Eagle Rock, all day, September 28, and the local union was urged to attend and bring lunches.

Yesterday's program was in charge of Mrs. George Lemon of the department of temperance and missions. The churches were represented by Mrs. Cole, First Christian; Mrs. McDill, Presbyterian; Mrs. Dockeray, Baptist; Mrs. Rumble, South Methodist, and Mrs. Smart, First Methodist. As state superintendent of departments, Mrs. Smart also gave enlightening extracts from the address of the national president at the convention, showing the value of the W. C. T. U. work in foreign lands.

RELIEF BENEFIT AT HOLLYWOOD NEXT SATURDAY

A benefit program for Japanese relief will be given by Miss Edith Lindsay and the pupils of her Glendale and Hollywood dancing classes in the auditorium of the Hollywod Woman's Club, 7078 Hollywood boulevard, on Saturday evening, September 29, beginning at 8:15.

MISS SARAH CHANDLER

Will present "A Japanese Study," "A Polish Bride," and will assist Miss Lindsay in a Spanish ensemble. Misses Lois Naudain, Edna May La Point, Barbara and Meta Chandler, Gwendolyn Shattuck and many other Glendale girls will take part.

MISSIONARY WOMEN TO MEET AT FIRST M. E.

The Mrs. Geo. O. Robinson group of the Woman's Home Missionary society of Glendale First M. E. church, will have an all-day meeting at the home of Mrs. Bahme, 807 E. Elk street, on Wednesday, September 26. All ladies east of Glendale avenue are cordially invited.

COURTESY COMMITTEE T. A. CLUB MEETS

The courtesy committee of the Tuesday Afternoon Club met on the east terrace yesterday for a pleasant business and social session. About twenty-eight were present and plans were perfected for the year's work. During the social hour delicious punch and wafers were served by Mrs. A. Mitchell, chairman.

BUILDING PERMITS

The following building permits were issued up to noon today:

G. H. Seal, 1312 South Central, office	$ 100
E. L. Schuyler, 330 Ivy, addition	100
Thomas Pratt, 405 Porter, 5 rooms and garage, Boydston Brothers, contractors	3,500
Andrew Johnson, 1146 East Lexington, garage	235
C. L. Thorpe, 1053 Western, garage	150
A. W. Fordsham, 719 Wing, duplex and garage	4,500

ART ASSOCIATION MEETS AT CITY LIBRARY

Talks Made by Walter Cheever, John Cotton, Miss Beth Abel

Mr. Cheever was the chief speaker at the regular social meeting of the Glendale Art association Friday evening at the city library, which was well attended. His theme was "What Art Means to the Layman," and he made it clear that the greater knowledge of art the layman possesses, the more critical he will be in regard to what constitutes art and also, the more he will enjoy art.

Miss Beth Abel, head of the department of art in the Glendale Union high school, also made a talk in which she set forth the effort of her department to make an orderly program of organized art work from the premise of design. She announced that in the new school a room will be set apart for art exhibits which all the pupils in the school will be permitted to enjoy as a means of stimulating their interest in art. She likewise expressed the desire of her department, to co-operate with the association.

John Cotton, who is again a resident of Glendale, gave a talk on "Industrial Art," and what it means to take art into a factory and lift the lives of factory workers.

Mrs. Roy Ballagh, president, who conducted the meeting, announced that the association will be entertained at a moonlight festival in Tujunga the evening of September 29 by Miss Laura Sweet in her new studio there. All association members were requested to meet at the city library the evening of the 29th, at 7:15.

REBEKAHS ACTIVE IN GOOD WORK FOR THE ORDER

Mrs. C. T. Coghlin of 425 Hawthorne was hostess on Friday to about 25 members of the social club of Carnation Rebekah lodge. Plans were completed for the consignment of rag dolls which the club is sending to orphan children at Gilroy at Christmas time. Following the business session delicious refreshments were served by the hostess and a program was given which included musical selections by Mrs. Coghlin and Mrs. Loretta Schwitters.

Friday evening Mrs. Rosella Strother of this city, district deputy president Rebekah lodges, paid her official visit to Edelweis lodge in Los Angeles. She was accompanied by about twenty members of Carnation lodge of Glendale.

September 29 a dance and box party will be given in Odd Fellows hall by Carnation Rebekah lodge. The boxes will be auctioned off after the dance and a prize will be given for the prettiest box.

Dr. Jack Stood Up; Then Dr. Jack Sat Down

When Dr. Jack Anderson met his old cronies "back east" they were all ready for him with this little ditty, which they roared into his ears till he struggled to his feet in the endeavor to obey the insistent command to "Stand Up." Then they all delightfully yelled "Sit down." He sat.

Tune: "My Bonnie Lies Over the Ocean

We've heard that you've been on a visit,
We've heard that you've been on a train;
We've heard that you've been to the east coast,
We're glad that you're with us again.

Stand up, stand up.
Stand up just a minute—stand up, stand up.
Stand up, stand up,
Stand up, Jack Anderson, stand up!

BIG OPENING OF CUMBERLAND HEIGHTS

Ingledue Realty Co. Places Its First Subdivision on the Market

Cumberland Heights, a beautiful hillside subdivision, comprising 12 charming homesites, is just being opened by the Ingledue Realty company, 201 Ingledue building, located at the corner of Glendale avenue and Broadway.

This tract is located right in the heart of the most exclusive hillside section in the entire San Fernando valley. It extends from Grand View eastward, along Cumberland way. It is located just north of Kenneth road and east of Grand View, directly in the path of Glendale's most exclusive home location.

"These lots will not last long," said Mr. Ingledue this morning. "A very few days will see this subdivision entirely sold out. The home locations we are offering are real buys. No better value, we believe, is offered in or around Glendale, or in fact, in the entirety Southern California. These lots, we confidently believe, will double in value within a few months, thereby proving an excellent financial investment for the present buyers."

The lots in this tract average about $2200. The terms are very easy and within the reach of all.

During the past few months quite a number of the better class of homes have been erected in the region of Cumberland Heights. These have set the pace—many others will doubtless follow as the weeks and months wear away.

To reach this tract, drive up Central to Kenneth, then to Grand View, then north to Cumberland Heights.

THE BOY SCOUTS COURT OF HONOR AT FIRST M. E.

"The Boy Scout District Court of Honor of the Verdugo Hills council will be held Sunday evening, September 23, in the First Methodist Episcopal church of Glendale, at 7:30 o'clock," stated Captain William C. Wattles this morning, Captain Wattles is chairman of the Court of Honor.

A program fittingly in keeping with the day and the occasion has been arranged which it is said will be of a most interesting nature. The meeting will open with the hymn, "America." Dr. Henry I. Rasmus, Sr., will make the opening prayer. The Junior department chorus will sing the anthems, "The Earth is the Lord's" and "The Creation."

"Scouting for Character" is the theme of a talk which will be given by Rev. H. I. Rasmus, Jr. A large number of second and first class badges will be awarded at this session of the Court of Honor in addition to nearly forty merit badges. A Life and Star Scout badge will also be awarded by Captain Wattles.

Professor Alfred Cookman, instructor of natural science at Polytechnic High School, will talk on "The Birds of Southern California." Mr. Cookman has made almost a life study of the natural life about us and has a very valuable collection of wild California birds in their natural state which he will have with him.

Prizes for the second period of the Troop Achievement contest will be awarded. The meeting will be closed by the scout oath and benediction which will be followed by taps by bugler.

The Court of Honor sessions of the Boy Scouts are always open to the general public; in fact everybody is heartily invited to attend the meetings so that they may not only enjoy the program but also may become better informed as to the purposes and aims of the Boy Scout movement.

CITY PRINTING

NOTICE FOR BIDS FOR CITY PRINTING

Notice is hereby given that the undersigned invites and will receive at his office in the City Hall, No 619 East Broadway, in the City of Glendale, up to 7 o'clock of October 1, 1923, sealed bids for City legal printing and advertising for the ensuing year, beginning October 1, 1923, in accordance with specifications adopted by the Council of the City of Glendale at a regular meeting held on September 20, 1923, and on file in the office of the City Clerk.

By order of the Council of the City of Glendale.

Glendale, Calif., September 21, 1923.
A. J. VAN WIE,
City Clerk.
9-21-23—2t

The establishment of the Glendale office of the Julian corporation with Mark A. Denman, a Glendale man as its head, is a recognition of the importance of Glendale and a compliment to the scores of Glendale people who are now patronizing their local headquarters. The fact that an over-subscription to the current $5,000,000 Refining issue is certain within the brief space of eight weeks is a fine tribute to the popular faith in C. C. Julian. The basic industry in the world is oil, and the oil fields of the world are at our door. It required a new Henry Ford to vision, visualize and organize the commercial potentialities of these facts. That man is C. C. Julian. In a brief year he has amazed the country with a success at once spectacular and substantial—so human and so generous that he is the center of the biggest army of boosters in California. The Refinery issue closes soon. The physical assets of the whole outfit will function in a few weeks. The dream of Julian and the "folks" is a splendid reality. Glendale office until 9 p. m. Cash or terms. 213 North Brand Blvd. Glen. 535. Mark A. Denman.—(Adv.)

Down at San Antonio this spring, where the Giants were training for the opening of the season, the final running about the field on the part of the pitchers meant the strengthening of their legs and wind. And it was taken mighty seriously. But to Zachary Abraham Lincoln Johnson it was simply a never-ending cause for wonderment.

"Whuffo, dem young men'mans runnin?" old Zach used to ruminate nightly, scratching his cottony thach. "Dey ain' fixin' to get nowheres. How come all de hurry?"

Coming Tomorrow!
Positively Three
Days Only!

JAMES CRUZE'S LATEST PARAMOUNT SUCCESS
featuring Ernest Torrence, Lois Wilson, Edward Horton, Fritzi Ridgeway, Louise Dresser and Charles Ogle:

"RUGGLES OF RED GAP"

By Harry Leon Wilson, the author of "Merton of the Movies." An established classic of American humor. You'll roar at Ernest Torrence (hit of "The Covered Wagon) as "Cousin Egbert," and Edward Horton as "Ruggles." James Cruze, producer of "The Covered Wagon" and "Hollywood," proves again he is the greatest director of comedy on the screen today.

T. D. & L. THEATRE
DIRECTION TURNER, DAHNKEN & LANGLEY OF WEST COAST THEATRES

AT THE THEATERS

RAWLINSON TO BE SEEN HERE IN NEW ROLE

Herbert Rawlinson, who has won the underworld a lot more sympathy than it probably deserves by the human quality that he has displayed in the many crook parts that he has portrayed on the screen, will be seen in the role far afield from the type in which he is so well known at the Glendale theater today.

The Universal star makes his bow to the motion picture public in the role of a knight of the squared circle. The title of the play is "The Victor," so there's no masking the outcome of his fistic engagements. He wins the crown hands down.

The Hon. Cecil Fitzhugh Waring is the "titled moniker" under which he battles and despite the handicap of his being a penniless member of the British aristocracy he wields a left hook that is a terror to all opposition.

Rawlinson is a wonderful all-around athlete and a clever boxer, but this is his first screen appearance in a prize-fight role.

Beginning Sunday

"'The White Rose' is of added interest in that it serves to bring Mae Marsh back to the screen after a long absence," said a reviewer.

"We are glad Mae Marsh is back. She has matured and at the same time she has developed artistically. She has always been a delight on the screen and is more so now than ever. We have never seen more exquisite motion picture photography nor a better blending of plot and setting."

"Miss Mae Marsh moves across the screen in one of the finest cinema performances which we have ever seen," said Quinn Martin in the New York World. "A powerful human drama of life has been pictured. The triumphant return of Miss Marsh to the silver screen after several years of retirement from her profession is a most important phase of the latest Griffith film. She appears here, it seems to us, even a more compelling and finished actress than in the days of Mr. Griffith's first bid for fame. If you want to see real art in the cinema see Mae Marsh as 'Teazie.'"

The "White Rose" has its first showings Sunday at the Glendale theater.

HOPE HAMPTON UPSETS THEATER TRADITION OF OLD

Hope Hampton, the pretty Paramount screen player who is featured in the Paramount picture, "Lawful Larceny," which will be shown at the Gateway for the last time today, is fast gaining a name for herself as an upsetter of photoplay traditions. Winner in a New Orleans beauty contest, she was given an opportunity to appear in pictures and, without any previous screen experience, was soon shining with success in feature roles.

Now Miss Hampton has declared war on that accessory of the movies, heretofore deemed a necessity—grease paint.

"I used grease paint in my first picture," declared Miss Hampton recently, "because everybody told me it was the only thing to do, and I didn't know any better. The result was a caricature of my face on the screen. There were shadows and blotches that I had never seen in the looking glass. I was frightened, actually, for a time. Then I learned that it was the fault of the grease paint. I never used it again. In "Lawful Larceny." I relied entirely upon talcum powder for make-up, and the results were more than satisfactory. I'm sure grease paint is a enemy, not an aid to the screen actress."

Jackie Coogan's unexpected rise to be star clown of a circus furnishes one of the biggest laughs in his delightful vehicle, "Circus Days," which is the picture on display at the Gateway Theater Sunday.

Jackie plays the part of Toby Tyler, a peanut butcher, who casts admiring glances at a certain tiny equestrienne. During a terrific storm at night while the circus is moving from one town to another, the little equestrienne sprains her foot. The owner of the circus declares that he will discharge both the girl and her uncle, an aged clown, if she fails to do her act at the next performance. Toby decides to substitute for her. He puts on her ballet costume and tights and, because he has never ridden horseback before, dons a safety belt with wire mechanics attached. He then sallies bravely forth, but it is a spirited horse and Toby has great difficulty in maintaining his seat.

When finally dislodged, he hangs suspended in mid-air, and the circus audience goes into hysterical laughter. Toby is the hit of the show, and as a result of this reception the owner makes him the star clown.

DEAL OF ACTION CONFINED TO ONE ROOM IN "DULCY"

Isben liked to confine the action of his tragedies to one room.

And Constance Talmadge, when she made her comedy, "Dulcy," worked a whole month in a one-room set of a suburban home.

"Dulcy" is essentially a comedy of the home. While it is a satire on domestic complications, it can almost be called a tragedy, because its humor and pathos are developed from a situation which has all the elements of the tragic.

"Dulcy" was directed for Producer Joseph M. Schenck by Sidney Franklin, and is a First National picture. It is now showing at the T. D. Q L. theater for the last times.

Others in the cast of "Dulcy" are Jack Mulhall, Claude Gillingwater, May Wilson, Johnny Harron, Anne Cornwall, Frederick Esmelton, Andre de Beranger, Gilbert Douglas and Milla Davenport.

Lois Wilson is praised by all critics for her excellent work with Ernest Torrence, Edward Horton, Fritzi Ridgeway, Louise Dresser and Charles Ogle in the Paramount production, "Ruggles From Red Gap," by Harry Leon Wilson, the author of "Merton of the Movies," is an established classic of American humor. You'll roar at Ernest Torrence (hit of "The Covered Wagon" as "Cousin Egbert," and Edward Horton as "Ruggles." James Cruze, producer of "The Covered Wagon" and "Hollywood" proves again he is the greatest director of comedy on the screen today. The screen classic opens tomorrow at the T. D. & L. theater.

K. OF C. SLATED TO MEET SALT LAKE BALL NINE

Glendale Knights of Columbus will meet one of the strongest semi-pro ball teams in Southern California tomorrow, when they cross bats with the Salt Lake Playground nine. The game will be played on the Park avenue diamond, and is cheduled to start at 2:30.

The Caseys have been going in great shape of late, and will give the Salt Lake team a real battle. Lefty Bacon will be on the mound for the locals, and is expected to put up his usual classy brand of ball. If the Knights are able to swat the old apple as they have done in the last few games, they should hand the visitors the proverbial raspberries.

GLENDALE HIGH DEFEATS VAN NUYS, 31-0

Glendale High school defeated Van Nuys Thursday, 31 to 0, in the first football game of the season. The contest was staged on the local gridiron, and attended by a good sized crowd of fans and rooters.

The locals got off to an early start, scoring the first touchdown in four minutes of play. A long run around right end by Bud Elliot followed by a touchdown by his brother Howard, brought the first score. A successful place kick resulted in one more point. By the end of the first half the Glendalians lead by a 13-0 score.

If the first half was a killing, the second was a slaughter. Glendale went through the Van Nuys line time after time for yards, ran around the ends, completed passes, and gained ground in every conceivable fashion. Jim Crow, recently arrived from the wilds of New Mexico, pulled off a long run during the second half, resulting in a couple of plays later in another score.

Toward the end of the game the score piled up so fast that the spectators had a difficult time to keep track of the tallies. Final statistics, compiled at the end of the game, showed that the home boys had piled up 31 markers, while the Van Nuys score resembled a round doughnut.

Coach Hayhurst expressed himself as being well satisfied with the work of his men, and the manner in which they conducted themselves while in action. On the offensive they were all there, gaining ground in every way imaginable, and tearing right through the Van Nuys line like it was so much air. On the defensive, Glendale put up a real fight, and prevented the valley lads from scoring during the entire encounter. Rarely was Van Nuys in possession of the ball, and then only for a few minutes at a time. Glendale kept the pigskin most of the time, and when the opposition was on the offensive stopped them in a few plays. Only once or twice did Van Nuys make their downs during the game.

Hayhurst used nearly every man on his squad some time or another during the encounter. He wanted to give as many of them as possible a chance to get into the fray, and show their stuff in action. To give the line up of the local team would be to enumerate the entire list of Glendale players.

Glendale has quite a number of practice games to play before the Central League opens October 19. Next Friday they will meet the Filmore High school team at Glendale, while on Saturday they will journey to Oxnard to take on the eleven of that city. There will also be games with some of the teams in the Los Angeles City League and schools that will not meet Glendale in the Central League schedule.

CITRUS ELEVEN IS DEFEATED BY ALUMNI SQUAD

AZUSA, Sept. 22.—In the opening game of the 1923 football season here Friday the Citrus Union High Alumni team defeated Coach (Det' Sturgis' school squad, 12 to 3. An unusually large crowd turned out to watch the annual battle, played on the new Citrus field.

The old-timers showed that they had lost little of their cunning and ability and they gave Sturgis' lads a good preliminary workout. The school team showed great promise and local fans are jubilant over the prospects of winning a Central League championship.

Captain Munson stood out by his steady work at2 tacgle. Left End Piper gained glory by booting a drop kick for the three points which saved the school team from a shutout.

Knieling scored the first touchdown for the Alumni when he intercepted a forward pass and trotted over the line after eluding a couple of young tacklers. Renie scored the other six points for the veterans on a line buck. Chenoweth, last year's Citrus captain, played well at fullback for the Alumni.

TROJAN VARSITY WILL CLASH WITH FRESHMAN SQUAD

Gloomy Gus to Hold Secret Workout This Afternoon

Bovard field will be the scene of some real action this afternoon when the U. S. C. varsity clash with their peagreen brothers in the first mixup of the season. It will be only a scrimmage, and the public will be barred from admittance, but it will be a test for the Trojans even at that.

Both the varsity and peagreen grid squads will open up and a warm afternoon is expected. Henderson has three elevens he will shoot at the yearlings, while Calland plans to trot out two freshman elevens for the varsity to amuse itself with.

According to the present dope, Henderson's first team to face the frosh today will be composed of the following men: Hayden Pythian, left end; Norm Anderson, left tackle; "Honey" Earle, left guard; Cot Rice, center: John Hawkins, right guard; Ralph Cummings, right tackle; Newt Stark, right end; Capt. Chet Dolley, quarterback; Otto Anderson, left half; Wallace Newman, right half, and Gordon Campbell, fullback. These eleven men average 184 pounds on the instep. Yes, the Trojans have no avoirdupois!

Against this bunch of Crimson and Gold clad moose Calland will probably shoot the following: Kaer, right end; Friend, right tackle; Cox, right guard; Cravath, center; Brite, left guard; Behrendt, left tackle; Lewis, left end: Wilcox, quarterback: Laraneta, right half; Thompson, left half, and Taylor, fullback. Against this squad, which averages 161 pounds, the varsity will have a weight advantage of steady work at tackle Left End However, the peagreeners are expected to make a good showing because of their great speed.

BALTIMORE, Mr., Sept. 22.—Pancho Villa, world's flyweight champion, will risk his title in the first fifteen round bout since he won the crown from Jimmy Wilde of England when he meets Benny Schwartz of Baltimore, Ohio, southern flyweight champion, on October 8, it was announced.

ST. PAUL, Minn., Sept. 22.—Dave Shade of California, aspirant for the world's welterweight title, won the decision over Dago Joe Gans of St. Paul in ten rounds, according to newspaper men.

GLENDALE, CALIFORNIA, SATURDAY, SEPTEMBER 22, 1923

MR. LEIMERT AGAIN OFFERS GLENDALE 1ST CHOICE

FINAL SALE OF HOMESITES IN BEAUTIFUL BELLEHURST STARTS WITH A BANG!

Cleanup of Some of Choicest Pieces of Residential Property in Glendale and All Southern California Is Put on by Walter H. Leimert Co. Today

LOCAL BUYERS ARE GIVEN PREFERENCE

"Prices of Lots in This Tract Have Not Been Raised," Says Beattie, Sales Manager, "and Terms on All Lots Are Unusually Easy"

Today's announcement of the final clean-up sale on Bellehurst Park in Glendale papers is only another indication of the consideration given by the Walter H. Leimert company to the local buyers of this city.

It will be remembered that last spring when Bellehurst Park was first opened a pre-opening sale lasting two weeks was conducted in Glendale prior to the tremendous advertising program so successfully conducted in all the Los Angeles papers following this pre-opening. Glendale people responded at that time by buying over $200,000 worth of Bellehurst Park property before the first announcement was made in Los Angeles.

It will also be remembered that the entire first unit of Bellehurst Park, over a million dollars in value, was sold out clean in six weeks, setting a sensational record even for this city of marvelous growth. In fact, the response was so tremendous that the Walter H. Leimert Company was entirely unprepared to handle the demand.

The second unit of Bellehurst Park was not ready in time for this sale and it was fully a month after the complete disposal of the first unit before any lots in the second unit could be placed on the market.

Since that time the sale of lots in the second unit of Bellehurst Park has progressed very steadily throughout the summer without any advertising or especial effort on the part of the sub-dividers. Week after week Glendale people and outside buyers have driven through the tract, and lot after lot has been snapped up.

Today the Walter H. Leimert company advises that less than 14 per cent of Bellehurst Park property is still available. The few remaining lots in the second unit are all in the gently sloping elevated orchard section close to the foothills. Without exception there are beautiful views of the city and distant mountains from each of these lots. Fine old olive, orange, lemon, grape fruit and pomegranate trees exist in this section, comprising portions of the famous Bellehurst Orchard, kept up in beautiful condition for so many years, by the Thom family who formerly owned this whole estate.

According to Mr. Leimert the purchaser of any of these lots today will be making a very exceptional investment as well as securing a beautiful home site. In any case, according to Leimert, the last few lots in this tract constitute the best investment of all because the former buyers are already starting to build, improvements are nearly completed and the entire property is rapidly becoming an integral part of the city of Glendale.

"Prices on the remaining lots in Bellehurst Park have not been raised," is the emphatic statement of Earle Beattie, sales manager for this tract.

Prices on all this property were set months ago before sidewalks, curbs or other improvements had been started, and while streets through the orange groves had merely been cleared and not even graded. These prices were considered exceptionally low even at that time; today, according to the concurrence of opinion of many good judges of real estate they offer the finest investment bargain in the city of Glendale.

Complete confidence in the future of this tract is best demonstrated by the fact that most of the early buyers are still hanging on to their lots, feeling sure that higher prices will come this fall.

This is quite in accord with the almost universal opinion throughout the southland that Southern California is facing today the most active real estate market ever known in its history. Even under normal conditions the purchase of such beautiful property as this in the very heart and center of a progressive city like Glendale would be a wise investment. Under present market conditions and at clean-up prices the Walter H. Leimert Company feel that every citizen of Glendale will immediately recognize the unusual opportunity now offered by this great and final sale of Bellehurst Park.

HIDDEN VIRTUES OF CARROTS TOLD

Long, slow cooking, starting with the water lukewarm, is the secret of making the mature carrot a palatable and very attractive segetable. Otherwise it is likely to be hard and woody, the slices or cubes having a hard and distinct individuality. Cooked properly, the carrot may be mashed. Young carrots will cook much more quickly. Dressed with melted butter when thoroughly cooked, the carrot is a revelation. Unfortunately, it is seldom thoroughly cooked. When the carrot is mature, a little sugar added to the water often improves the flavor.

Carrots are so cheap that a small gardener seldom wastes much space on growing a crop to mature for winter storage, but a few rows are always needed for the delicious young carrots, either boiled with butter sauce, creamed or cooked in combination with green peas. They need a good soil and much the same treatment as radishes or other root crops.

While orothodox gardening directions invariably say that carrots should be planted thinly, or thinned to three inches apart, practical experience has shown gardeners that they will produce crops when allowed to grow more thickly than almost any other vegetable. As they are pulled, the thinning is done automatically. When allowed to grow fairly thick, some will make good roots and crowd out the others, giving an uneven growth. These, of course, will be first pulled and the others will then get a chance.

The carrot is the one vegetable where departing from the orthodox directions doesn't make a great deal of difference. If the carrot alone is not fancied as a vegetable, it is indispensable for stews and soups and is one of the standards of the garden. The early strains of Chantenay, Danvers and Ox Heart are all good, the shorter growth being better for early carrots. In small gardens it is a good plan to mix carrot and radish seeds, sowing them together, the radishes' germination being well on its way before the carrot seed sprouts. The raddishes mature and are pulled in time to get out of the way of the carrots, which are also thinned in the process.

Witloof chickory, or French endive, should be shown early in the spring to produce large roots which forced in the dark next winter will provide the most delicious salad of the cold season.

TORRENS TITLE LAW CONSIDERED BY REALTY BOARD

By It Sale Can Be Closed in 24 Hours With Only $1 Cost

The method of operation and the purposes of the Torrens title law in conection with the conveying of real estate from one owner to another were clearly defined at the weekly meeting of the Glendale Realty board Wednesday noon at Jensen's Egyptian Village cafe by James W. Bell, president of the State Torrens Title company with headquarters in Los Angeles.

"The Torrens title law," said Mr. Bell, "was passed by the state legislature in 1897, but as originally passed it was impractical. There were only a few pieces of property registered under the law.

"Legal talent was employed to weed out the defects in the law. When this was done it was submitted through the referendum to the people and was adopted in 1914. The new law has never been successfully attacked since its adoption.

"There are more pieces of property operating under the Torrens title law in Glendale than in any community of similar size in California.

"When it is desired to start a piece of property under this title, all of the facts must be taken before the court, which hands it down either clear or with the incumbrance stated.

"It costs nothing to transfer property under the Torrens title.

"If a man holding a piece of property under a Torrens title wants to sell to me all he has to do is produce his certificate and provide me with a deed conveying the property to me. That's all there is to it. He simply has it sworn to before a notary and I pay $1 for the registration.

"I can close any escrow inside of 24 hours. It sometimes takes three or four months to effect the registration and costs from $35 up. In the meantime the property can be sold as many times as desired.

"Just as soon as I am able to secure the license to guarantee a title I will promise to take care of the guaranteeing for $10 on any piece of property.

"In the event of every sale under the Torrens title law one dollar per thousand of the last assessed valuation of the property is placed with the state treasurer to take care o fany claims that may be made upon any property that are unknown at the time of the transfer from the old system. There is $40,000 in the state treasury at this time for this purpose and thus far in the operation of this law in California no claims of this character have been made.

"The state Torrens title law does not require the furnishing of a map of the property in the event of a transfer, but I always make it a point to furnish such a map.

"We hope to open a Torrens title office in Glendale within a short time. I find this system has a lot of friends in Glendale."

Peter Hanson, chairman of the advertising committee, reported a great deal of activity by that committee during the past few months. Among the things accomplished by this organization were the securing of the June, 1923 issue of the Arrowhead magazine, which was circulated throughout the United States. The issue of June, 1924, of this magazine has been contracted for by the board.

The committee also placed many pieces of news matter concerning Glendale in the Los Angeles papers, and took care of other work along this and other lines. The report was accepted.

As chairman of the education committee W. P. McMullin reported that the home town contest to be held under the auspices of the board for the purpose of selecting a speaker for the state realty convention in Sacramento in October, will be held in the chamber of commerce auditorium on Thursday evening of next week. Ten speakers have already expressed their intention of entering this contest, which will be open to the public.

That twenty-three outside realtors had signed cards of application for admission to the board members was reported by W. L. Truitt, chairman of the membership committee. He stated that he expected to have 50 new members by October 1. Among the new members admitted to the board recently are W. E. Mercer, Patterson & Meadin, Ingledue Realty company, Russell & Bolen, J. M. Boland, H. J. Blackmore, H. M. Allardice and Philips & Horn.

Splendid improvements rapidly being carried to completion in Bellehurst Park

SPEAKERS' BUREAU READY TO HELP

Help of the speakers' bureau maintained by the National Association of Real Estate Boards is available to all member boards in connection with their program building for the season of renewed activity opening everywhere with the first weeks of fall. The bureau has suggestive lists of subjects valuable for discussion as well as lists of speakers available in each territory who can deal with real estate topics authoritatively.

SUBDIVISION AD PLAN SUGGESTED

Circulation of a library of subdivision advertising through the Homebuilders and Subdividers Division of the National Association of Real Estate Boards is a plan now being put into effect for pooling on a national scale the advertising ideas of the men who are developing new home and industrial areas. At the division headquarters in Amaha samples of subdivision advertising booklets, pamphlets and circulars in quantity are being collected. From this supply a constantly increasing body of suggestive material will be available for circulation from member to member.

The ideas for the divisional traveling library of advertising methods grew from the demand shown for copies of successful ad plans exhibited at the recent Cleveland convention.

BIG THINGS AHEAD FOR REALTORS

President of National Boards Says as Much

BIG FALL FORECAST

Operations of Different Organizations Are Explained

L. F. Eppich, president of the National Association of Real Estate boards, has issued the following letter to the real estate boards in the country:

In these first fall days there is opening for real estate boards throughout the National Association a new year of work. Groups which have relaxed their activities during the summer or, in some cases, suspended meetings altogether for a few weeks, are now resuming their regular schedules.

And with the coming of this new year there opens for every board in our international membership a new opportunity for achievement. Now is the time to put into shape plans for the year's accomplishment. The tide of general activity has passed its seasonal ebb and is running in again toward a new flood. In this flood tide big things can be launched, and launched well.

The whole tremendous potentiality which we are just beginning to see within the National Association for the development of real estate in a new professional era comes wholly from the union in the Association of the potentialities within each of its member boards. The national body is a great clearing house for our professional activities, but is is only in each local board as a unit that these activities can find life.

These are some of the ways in which boards of our Association are finding high usefulness to their individual members, to their communities, and to that spirit of professional responsibility of which they are the expression; they are building in their meetings a strong bond of professional fellowship. They are making plain to the general public what the Association stands for in matters of professional fellowship. They are upholding one standard of professional conduct. They are making plain to the general public what the Association stands for in matters of professional ethics.

Arbitration committees are bringing about solution of intra-professional disputes. Membership committees are building up strength. Rules committees are bringing in the forms of organization best fitted for smooth board functioning. Legislation committees are working toward the enactment of ordinances and state laws of importance to the great interests which our profession represents, and are a stay against the enactment of vicious legislation.

Appraisal committees are furnishing the machinery for securing accurate professional judgments. Multiple listing bureaus are utilizing the power of co-operation in the sale process. Committees are engaged in a multitude of civic services in the planning and development of their communities.

Whatever the plans which your board may have or may be working out for the new business year the National Association stands ready to help in any way it can. Through it members may draw on a general fund of board experience. We have good work behind us, but there is good work to be done ahead. I urge on every member real estate board the fullest possible realization for the coming year of the notable functions for which it was created.

GROWING CABBAGE FROM JULY TO NOVEMBER

Young cabbage may be harvested in the garden from July until hard freezing, given a little care and planning in sowing seed and transplanting.

The selection of proper varieties has much to do with success and the best quality of early cabbage seed should be secured from a salesman of known reliability and reputation. The cabbage needs plenty of room and the richest soil available. It needs plenty of moisture and also good drainage.

The seedlings should be transplanted as soon as they have made two true leaves; if the ground isn't ready for them transplant them into a box or frame. They will be stockier for the second transplanting. When they are to be set into the ground, set the plants almost up to the true leaves. Long-legged cabbages seldom make good heads. It is the squat, close to the ground growers that give the solid heads and proper setting when the plants are transplanted has much to do with this feature.

The plants of early cabbage may be set out by April 15, over a large section of the country, as they will stand quite a little frost without damage. The smaller growing, extra early sorts should be set two feet apart, in rows from 2 1-2 to 3 feet apart for best results. The Wakefield types are standard early cabbage. Nitrite of soda in spoonful quantities when the plants are set out, making the nitrite fine and not applying it too close to the plant and at from two to three weeks intervals during the growing season is a fine stimulant for firm, vigorous heads.

The cabbage worm is always present. Various insecticides will control this pest and any dealer can recommend an effective one. Those which are nonpoisonous are best in the home garden. They should be applied frequently to keep down the green worms. Arsenical poisons are more effective and may be used without fear in the early stages of growth, as the poison cannot get into the head then.

COUNCIL TANGLES ON SIXTY-DAY PERMITS

Finds It Has No Power to Remove Temporary Structures

The city council session last night was a lively affair and considerable business was transacted in addition to the consideration of the Calla Lily Creamery situation, which is related elsewhere. A detailed report of the further proceedings follows:

May Install Another Gas Tank

The proprietor of the gasoline station at the corner of Broadway and Central was granted permission by the council to install an additional gasoline tank in the parkway in front of his station. Building Superintendent Vandewater stated that he saw no reason why a permit for this tank should not be given, as there was considerable space between it and the ones that are now in place. On motion of Councilman Kimlin it was decided to amend the ordinance governing matters of this kind so as to permit larger tanks to be used in connection with oil stations.

May Build Offices

L. A. LaFountain was granted permission to build a real estate office on his property on East Acacia avenue, the understanding building that this permit would expire in 60 days.

George Seal, 1312 South San Fernando road was also granted a permit to construct a real estate office on his property and to maintain it for a period of 60 days.

In the discussion over the granting of the permits Acting Mayor Davis asked if the city could compel these people to remove the buildings at the expiration of the 60 days. City Attorney Morrow stated that he did not see how they could be compelled to move them.

"We have been granting these permits with the understanding and belief that when the time stated expires we will be able to make these people take the buildings down. If I had known that we cannot compel their removal I would have never voted to permit any of them."

"Let's stop granting any of these permits right now, then," stated Councilman Kimlin.

This the council verbally agreed to do.

Newport to Open Street

The F. P. Newport company, owners of Verdugo Woodlands, asked permission to open Canada boulevard from Glorietta to Verdugo road. This permission was granted with the understanding that the work should be checked before being done.

Petition for Residential District

A petition was received from the property owners on the north and south side of Pioneer Drive from Central to Columbus, asking that that stretch be made a residential district. The hearing on this matter was set for October 4.

Want Business District

The property owners on Fourth street between Raymond and Thompson asked the council that their street be made a business district. The hearing on this matter was set for October 11.

Temporary Office Allowed

The T. W. Watson company, realtors, was granted a permit to construct a real estate office on the Woodbury Heights tract at the corner of Verdugo road and Lexington street.

Ford is Paid For

The council authorized the payment of $375 to the Jesse Smith company for a Ford truck that was purchased some time ago for use of the street department.

Accept Auditing Offer

The offer of the Marwick-Mitchell company of Los Angeles to audit the books of the city monthly for $600 per year and to submit a final report at the close of the fiscal year for $100 was accepted.

Transfer of Money

A sum of $3,700 was ordered transferred from the Public Service budget fund to the 1922 Street Bond Interest and Redemption fund, this being as a temporary loan.

Special Meeting Tuesday

The council decided to hold a special meeting next Tuesday evening for the purpose of considering with Attorney W. E. Evans the matter of conveying certain Verdugo Canyon water rights now held by the Bellehurst property owners to the city of Glendale.

Tract Maps Accepted

Maps of Tracts Nos. 1722, 6779 and 7279 were accepted.

Rest Home Permits Granted

Mrs. Ada Roberts, 112 North Adams was granted a permit to care for and board two children at her home.

A permit to care for convalescents was granted to Mrs P. Rosenfeld, 1011 South Central avenue.

One Application Denied

The application of Mrs. Myrtle Billings, 810 East Raleigh street, to care for eight children, was, on suggestion of the city health department, denied.

Hill Awarded Contract

C. L. Hill was awarded the contract for the improvement of the first alley east of Louise street between Lexington and Doran.

Contracts Awarded to City

A contract to lay water pipe on Sierra, Merrill and Hill streets was awarded to the city of Glendale, as was another to lay pipes on portions of Park, Acacia, Florence Place and Virginia Place.

Improvement Bids Opened

Bids for the following improvement work were opened and referred to the city engineer for checking and report:

For the furnishing of a carload of poles to the city of Glendale.

For the improvement of Colorado street.

For the improvement of Sycamore Canyon road.

For the improvement of business district alleys.

For the improvement of Dorothy Drive and Stocker street.

For the improvement of Kenneth road and Sonora avenue.

For the improvement of Raymond avenue.

For the improvement of Raleigh and Adams streets.

Protests Received

A protest was received from C. P. Nesselroad against the improvement of Chilton Drive and the hearing of this mater was set for October 4.

The protest against the assessment for the opening and widening of Garfield avenue was denied and the assessment was confirmed.

There were no protests against the improvement of Luton Drive and the next step in this work was ordered taken.

The continued hearing on the setting aside of Happiland Park as a commercial district was laid over for one week, and the city clerk was instructed to ask Mr. Haddock, one of the ownesr of the park, to appear before the city council and evplain his side of the question.

Several Petitions Received

A petition was received asking that Del Valle avenue be improved with paving, sidewalks, and curbs, but as this contained only 36% of the property owners' names, it was referred back for more names.

A 56% petition was received from the property owners on El Rito avenue and the city engineer was instructed to draw up the necessary proceedings for this work.

A petition was received for the improvement of Justin avenue from Keneth to Tenth and the council ordered proceedings for this work started.

Grade on Cerritos Named

An ordinance was adopted establishing the grade on Cerritos avenue.

Resolutions Adopted

The following resolutions were adopted:

A resolution adopting a plan for the widening of Central avenue.

A resolution ordering the work on Fourth street.

A resolution ordering improvement work on Hillside Drive.

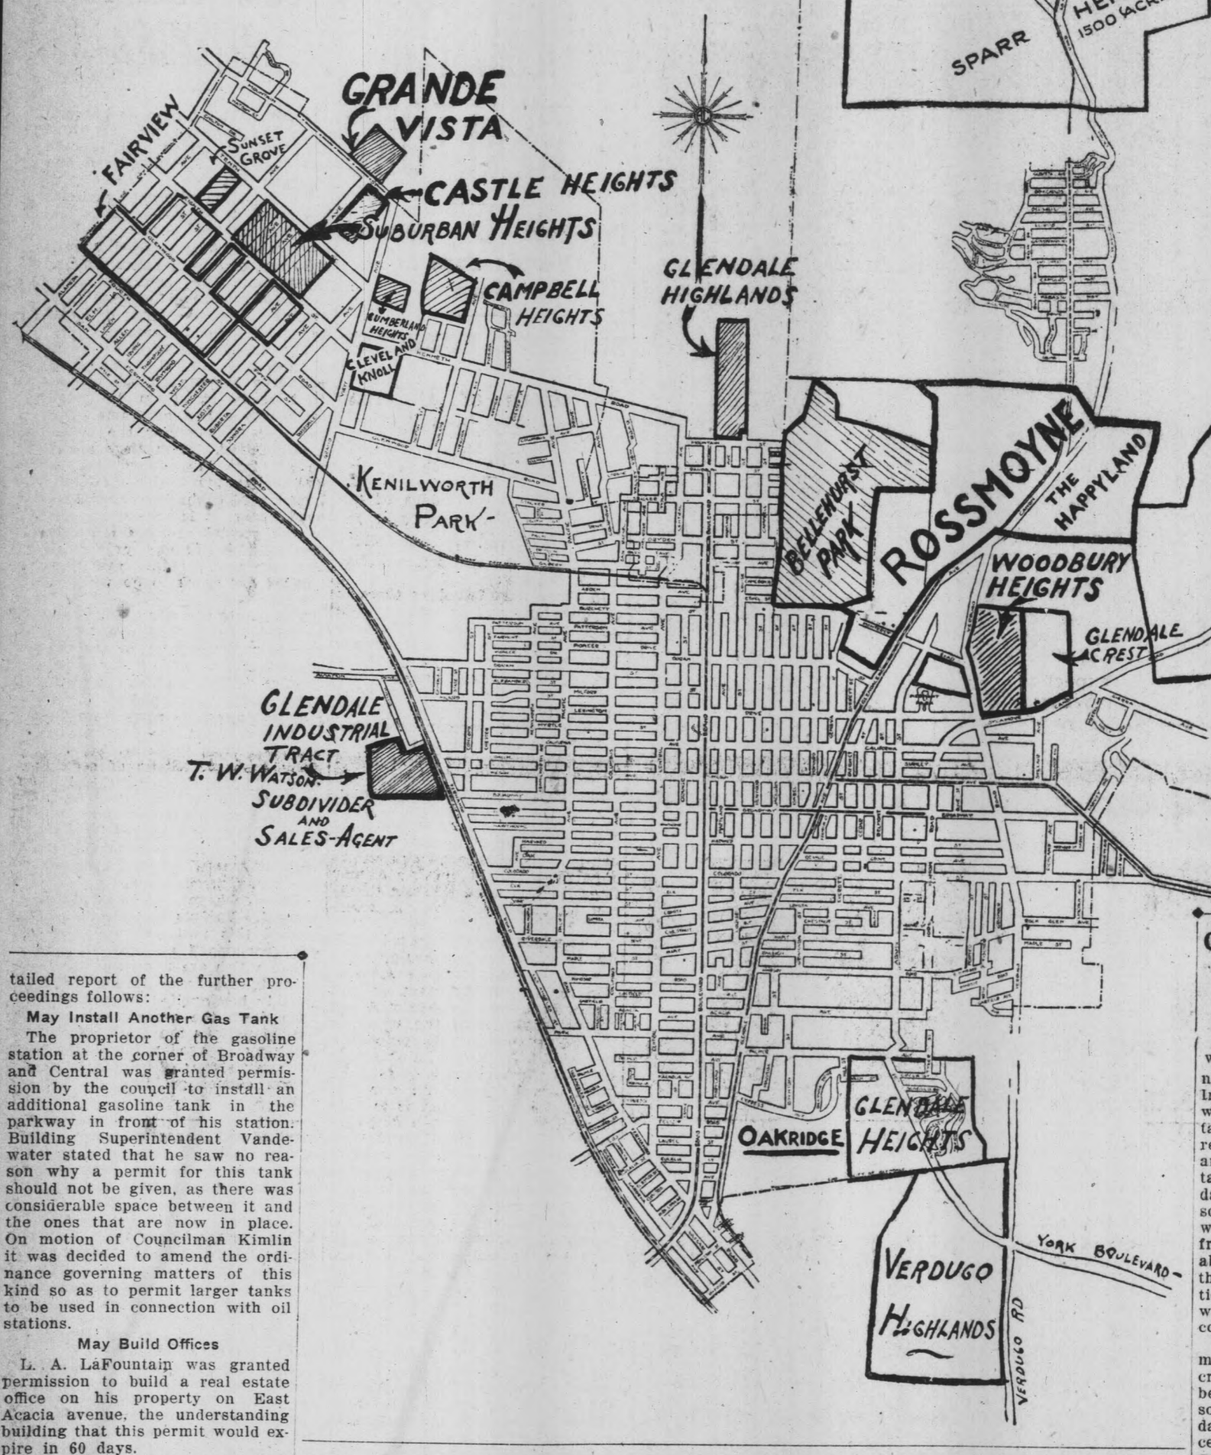
A resolution ordering work on Vista Court and Green street.

A resolution setting the time for two weeks from last night for the hearing of the protests against the improvement of Concord street.

A resolution adopting certain diagrams in the office of the city engineer.

A resolution adopting specifications for printing and publishing in the city of Glendale.

An ordinance was introduced declaring the intention of the council to widen Central avenue.



APPRAISAL BOARD WORK IS TELLING

Rapid growth in interest nationally in expert appraisal methods helping to put the handling of real estate on a scientific basis is indicated in reports coming to the National Association of Real Estate Boards from member boards studying the subject. Recent building up of a notable body of literature on the subject is another measure of importance which formal expert appraisal is coming to have in all forms of dealing in real estate. While only about one-fourth of the boards having membership in the national association have regular appraisal committees, reports from boards who have appointed such committees primarily as study groups show that wherever committees are formed business comes in.

CALIFORNIA CROP REPORT FOR FIRST HALF OF MONTH

Temperatures during the first week of September were above normal for this season of the year. In many localities extreme heat was recorded. The only detrimental effects to crops that have been reported were confined to limited areas and consisted of sunburn to table grapes and tomatoes and damage to beans that were in blossom. However, weather conditions were desirable for the drying of fruit. Light showers and considerable cloudy weather occurred in the southern counties. A precipitation of 44 hundredths of an inch was reported in southern Imperial county.

Grape shipments to eastern markets have been steadily increasing although prices have not been profitable to the grower from some shipments. At the present date the trend of prices being received for dark juice grapes shows some advance. The cooler temperatures of the past few nights have improved the coloring of Tokay grapes in San Joaquin county; shipments of this variety now beginning to move in volume. A total of 743 cars of all varieties of grapes was shipped on September 13, which brings the total for the season to 12,467 cars as compared with 11,083 cars at this date one year ago. Most of the raisin grapes except muscats and also a large part of the prune crop are now on drying trays.

The bean harvest is well advanced in the early maturing sections; the yields being somewhat below original expectations. The harvest of grapes, prunes, almonds, figs, canning tomatoes, and hops has advanced satisfactorily. Grain and hay harvest in the northern mountain counties has also been in progress.

There has been little change in the condition of pasture or livestock during the past fortnight. The advanced drying of most pastures is normal for this time of year. Pastures still afford sufficient feed for carrying livestock. Sales of fat cattle were reported most extensively from the mountainous counties where green feed has been available to date. The milk production of dairy cattle has been somewhat retarded

TURNIPS AND PEAS MAKE TASTY DISH

Early turnips and green peas, maturing at the same time, provide material for an attractive dish. Boil the turnips whole until tender. Scoop out the center and fill with green peas, cutting the bottom of the turnip square so it will stand upright. Fill the hollow with green peas, placing a few peas about the turnip in the dish. Pour hot cream and butter over the combination.

Turnips seeds for a crop to mature with the peas, should be sown is soon as the ground can be worked. They should be thined early to six inches apart to secure fast growth. Sow the seed thinly and half an inch deep, and give them at least 18 inches apart in the rows. Tomato plants may be set at three-foot intervals between the rows to take the place of the turnips when they are harvested and allowed to grow along without interfering with the turnips. Cultivate frequently.

These early season white turnips grown rapidly are usually of finer quality, milder in flavor and tenderer of flesh than the late maturing crop for winter use. The turnip is not grown as frequently for an early crop as it deserves, usually being planted in July and broadcasted then. The old casting method is a waste of seed and ground space for a very considerable portion of the seed thus sown will not produce plants with roots worth pulling as they will not have room to develop.

The turnip likes rich, well worked soil with commercial fertilizer applied from time to time sparingly if the soil has not been previously well manured. The tops of early turnips make excellent greens having much the same flavor as mustard. The thinning of turnips is perhaps more important than that of other root crops as the plants will soon be a disappointment if left crowded and will not do themselves justice when given space later. They should be thinned as soon as they are up far enough to develop their second leaves, taking out the weaker appearing seedlings. Too late thinning is one of the causes of strong woody roots in the matured vegetable. It must have fast, unchecked growth, to be mild and tender.

"Murphy," yelled the sergeant, when he discovered him lying breathless onthe ground, "you dismounted!"

"I did."

"Did you have orders?"

"I did."

"From headquarters?"

"No sir; from hindquarters."

GLENGARRY PARK IS DEMANDING ATTENTION

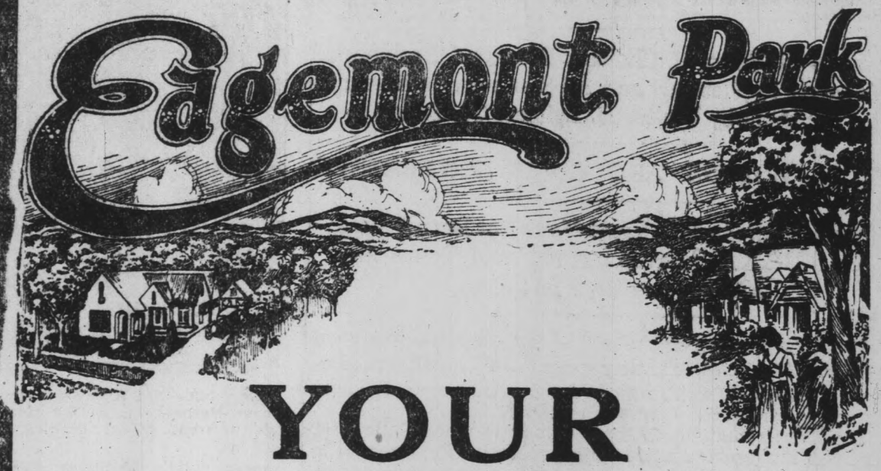
Glengarry Park, an unusual subdivision lying at the intersection of Glendale avenue and Los Felis road, is proving popular among the realty buyers of this section. This park has many features that make it unusually desirable. That this fact is appreciated is proven by the demand that is being evidenced for the lots.

This tract is " in the heart of Glendale," combining the elements of a park and natural rustic beauty. The tract is near cars, schools, churches and stores. The prices of the lots in this tract range from $1,700 up, all of them being sold on terms that will fit the pocketbook of every buyer. This tract is being handled by Garnette Campbell, the tract office being at the corner of Los Feliz and Glendale.

As a man grows older his bump of conceit gradually becomes a dent.

It takes a smart woman to listen when she can't talk.

Edgemont Park



YOUR HOME

$100 DOWN

Lots Only $50 Down Lumber Only $50 Down

To you who are struggling against the tyranny of rent and the heart-breaking hopelessness of making the usual big, first payment on a home, we say—

Come to Edgemont Park—build your home in the cool green of its wide alfalfa fields or under its great spreading walnut trees—come here where the "kiddies" will be happy in the freedom from conjested, dangerous city streets—where a magnificent school is close by. Come where gas, water and electricity will serve you—where all the streets are graded and some of them have walks and curbs.

See the model home we have built—only $50 down will supply the rough lumber to build one like it—pay the remainder on easy monthly terms—a few days' work and your home—your **own** home is ready for you. When you have made substantial payments on your lot we will finance your fine new home for you.

The lots are large, the smallest are 45 by 135. Think of the money you have paid for rent in the past five years—think of the fine home it will build for **you**. Here is opportunity—your Lot—one of the surest, swift profit makers we know of, only 5 minutes from Burbank, 5 minutes from Lankershim and 10 minutes from Hollywood, in the finest section of the San Fernando Valley for only $50 down, very easy terms on the balance. The rough lumber for your home only $50 down and easy terms—again we say. Here is opportunity, but you must act NOW before this offer is withdrawn.

Lots 45x135 and 50x150

$495 to $1300

Every lot in Edgemont Park offers you a splendid profit. Burbank and Lankershim, the two fastest growing cities in the Valley, are crowding in on the east and west. Los Angeles in her giant strides, coming from the south, soon will envelope the entire southern section of the Valley far beyond Edgemont Park and a sure, swift profit is certain to be yours in a very short time—YOURS if you act NOW—because Edgemont Park has a tremendous appeal to home lovers, and when you realize that you can have your OWN home for only $100 down you must KNOW that this is a REAL opportunity—don't let it slip.

Come out tomorrow. Enjoy the refreshing quiet, the splendid view of the mountains, see the fine new school close by and you will certainly realize the inevitable increase in values and the desirability of Edgemont Park for YOUR home, which we make available to everyone for only $100 down!

HAMLIN & HEPBURN

Telephone Glendale 996-J

203 WEST BROADWAY

GRANDE VISTA, DE LUXE TRACT OF GLENDALE IS ATTRACTING ATTENTION

Discriminating Home Buyers Are Turning Their Eyes Toward This Tract Which Is Considered One of the Finest In This Section of the Country

HIGH CLASS IMPROVEMENTS ARE INSTALLED

High Restrictions Assure Only Homes of Real Quality —H. N. Landon, Subdivider, Says Things At Tract Are Rosy

Grande Vista, the de luxe tract of Glendale, lying snugly up against the wonderful Verdugo foothills, is being flattered by the attention of an unusually large amount of discriminating realty buyers at this time. In fact, during the past few weeks, those desiring homesites of unusual value have been giving marked consideration to the beautiful building locations that are to be secured in this most exclusive of subdivisions.

Everything in this tract will be high class. For instance, the water, gas, electricity and telephones are to be constructed underground, and there will be ornamental lights on each side of Vista drive. This road will run to the top of the hill, where a home to cost $50,000 will be constructed. Water pressure will be maintained to the highest homesite. A community tennis court and a practice golf course will be established in the canyon, with a fountain playground for the children.

Another feature that will assure this tract being kept high class property is the high restrictions. These range from $7,500 on the flat land to $15,000 to $20,000 on the hillsides.

This tract is located only two minutes' drive from the beautiful Sunset canyon country club. The view of the San Fernando valley from this tract could not be improved upon.

The prices of the lots in this tract range from $3,000 to $20,000, and the terms are exceedingly inviting.

This tract is handled by H. N. Landon, 213 West Broadway.

Murphy, a cavalry recruit, was given one of the worst horses in the company.

"Remember, said the sergeant, "no one is allowed to dismount without orders."

Murphy was no sooner in the saddle than the horse kicked, and Murphy went over his head.

DAHLIA RAISING AS SIDE LINE

As a side line to farming, Mrs. Wilmer Kearns, writes in the Farm Journal for July, that she finds dahlias profitable.

"I did not advertise any of my flowers till five weeks before frost, and then in two days I did $200 worth of business, and $600 for the five weeks. Of course, that wasn't all profit, but it was a start, and I made many friends. I have clean stock and latest in prize winners.

"I found that city people will buy luxuries where they won't buy vegetables. Many women consumers would rather go to a cut-rate store and lug home stale produce, than buy fresh from the farmer at the door, even at the same price. It's a condition of mind to be reckoned with.

"I also found some will pay from 50 cents to $5 for a dahlia tuber and never say a word, and I've seen those same folks try to haggle with my husband to get a bunch of beets from six to five cents."

When the wise guy fails he considers the man who succeeds a lucky fool.

GAINING SUCCESS BY GROWING ASTERS

The rivalry among gardners to produce the largest and fluffiest asters is one of the most interesting features of the garden season and cultural skill is the chief factor which must be depended upon to produce the desired results.

The selection of seed will in large measure tell the size of the flowers, relatively, as some varieties naturally are larger flowering than others. As a rule the later flowering types are larger than the earliest. Asters will thrive in any soil which will produce good vegetables and they will repay any extra attention in the way of fertilizing. They also need cultivation all summer to be kept in unchecked and vigorous growth. Commercial fertilizer, particulary bone meal hoed around them at intervals of two or three weeks, is a great help.

The addition of wood ashes or air-slacked lime when the bed is prepared is coming to be considered an essential. It not only adds valuable fertilizer to the soil in the case of the ashes and sweetens the soil and releases plant food in the case of lime, but these two act as a check to the stem rot which has given aster growers no end of trouble during the last season or two.

The root aphis or plant louse also is troublesome but if the soil is rich, has been limed or given wood ashes, the pest is not so likely to give trouble. For August and later flowering it is quite as advisable to start the seed in the open ground as in the house or frame. The plants will be more vigorous in most cases. They may be sown until well into May to continue the succession of flowers until frost.

If asters are desired with long stems for cutting they should be given at least a foot apart in rows two feet apart. If for massing in beds for a sheet of color nine inches to a foot each way is the closest they should be placed dependent upon the variety and its style of growth.

The succession of asters is about the following: earliest of all, July, Queen of the Market and Royal types; August, Ostrich Plume and Victoria; September, Late Branching Crego and King types; September and October, American Beauty type.

Imagination doth make liars of us all.

BOOKS OF E XPERIENCE

By H. ADDINGTON BRUCE

Author of "The Riddle of Personality," "Self-Development," Etc.

(Copyright, 1923, by The Associated Newspapers)

Young man about to begin the earning of your livelihood, it is quite true, as you have often been told, that you can progress only in proportion as you profit from the lessons of experience. But it by no means follows that you need depend wholly on your own experiences to learn those lessons.

Other men, remember, have preceded you in life, and many of them have left records of their experiences to illumine the way for you.

Not one of these other men, to be sure, has trod the identical path you will have to tread. Happenings unknown to all of them are certain to befall you. You will have problems and perplexities, anxieties and setbacks distinctively your own.

But also you will be required to overcome difficulties they have had to overcome. You will be called upon to make decisions in situations similar to those in which they, your predecessors, from time to time found themselves. And from time to time you will be under the necessity of applying principles of conduct which they found serviceable, perhaps indispensable.

Clearly, then, it will profit you to turn to them for guidance and advice, so far as they have made guidance and advice available to you through their own writings or writings inspired by their life experiences.

It will profit you, that is to say, to study the biographies and autobiographies of great men, to read attentively collections of letters by them or relating to them. No truer words have been penned than the recent statement of an American educator in endorsing a project for the publication of a series of the outstanding autobiographies of all ages:

"We graduate thousands of young men and women from the universities every year. They go forth to face the world and fight the battles of life alone. They have knowledge, yes, all that we can give them. But they have not wisdom, for wisdom is knowledge ripened by experience.

"We cannot give them experience; they must get that for themselves, and in no other way can they learn more of experience than by reading these great autobiographies. . . . If we were asked to suggest a post-graduate course of reading to be continued through life, our opinion would be:

" 'Read and re-read the experiences of the world's leaders as revealed in their autobiographies.' "

Many men, to their immense advantage, have tested for themselves the help to be derived from persistent reading, not of autobiographies only, but of biographies, memoirs and other books of human experience. Many, alas, have never thought it worth while to do any reading of this sort.

Don't fall into their miserable error.

It would, of course, be foolish to expect that merely by reading and studying books of experience—or any other books—you will have success insured to you.

SALPIGLOSSIS MAY BE GROWN HERE

For gorgeous crimsons, purples, roses and scarlets there is no annual to compare with the Painted Tongue or Salpiglossis, which came to our gardens many years ago, from Chile, but still gives considerable trouble to those who try to grow it without understanding its nature. It is a notional plant, and one of its notions is that it objects to sharp changes in temperature and has a habit of standing absolutely still for long stretches, especially in the early stages of its growth, if set out in the ground too early.

Its gorgeous trumpets, which are often veined and marbled with a glint of gold, the only flower showing this trait, are equally fine for garden display or for cutting. The seeds planted in the house for early flowering are not difficult to handle, but the trouble comes in setting in the open ground at too early a date. If a warm day is followed by a sudden cool spell, the salpiglossis will remain practically stationary until it settles down to warm weather, then it will sprint ahead and flourish, but in the meantime a number of the plants in a bed will have died.

The safest way to have a sure success with this beautiful plant is to sow the seed in the open ground when the weather is fairly settled, using the same signs that tell lima bean time, the full leaving of the trees. It is best to sow them where they are to remain and thin to the required distance of a foot or eighteen inches for the most robust strains rather than to transplant. They like a rich rather light soil and resent extremes of moisture and drought as much as they do hot and cold spells. They should be well watered in hot weather. They are such gorgeous plants that they are well worth a little extra care. The gloxinia-flowered strain is one of the finest both in size and in the marbling of the flowers, which is one of their most attractive features. They have been doubled in size by modern plant breeders.

When plants growing in doors turn yellow the first fault to look for is poor drainage. Water must run off readily to prevent trouble.

After the first kiss a young man, kicks himself for having wasted so much time.

Old Mechanics Says:

"Ever notice how you can ride around the town on weak tires for a long time and never have a puncture, yet when you start on a trip they are sure to blow out-

"Most folks believe that it pays to travel with good tires, and they're right. But if you've got one or two well-worn shoes that could stand a few more miles with proper attention it may pay to try to make them do—if you know how.

"If old tires can be driven around town without blowin' out there must be somethin' about ordinary ridin' that's different from travelin'. When you've discovered what this is perhaps you can change your method of travelin' so as to save rubber.

"From my observation of the number of punctures and blow outs I see along this road I can tell you truthfully that it's speed and constant, drivin' that brings your weak tires to an untimely end. When you ride about town you don't burn the road, and you stop frequently enough to give the tires a chance to cool. You go in and out of holes more gingerly, and there is less slidin' of the tires in sudden acceleration and in erratic stoppin'.

"If you would travel in the same moderate way you ride about town your tires wouldn't be likely to give trouble, even if they are weak. And, between you and me, a little more town drivin' applied to tourin' would make for happier trips and a lot less mechanical trouble en route, and after."

TO COVER BRASS WITH PAINT

Before attempting to paint over polished brass the metal should first be scoured with a mixture of salt and vinegar to remove all grease, after which the surface should be washed with hot soapsuds and wiped dry with a clean rag.

MAKING MONEY

Study the triangle formed by San Fernando Blvd., Glendale Ave. and Los Feliz Road, with Brand and Central within its borders. Then think of the tremendous and ever increasing traffic traversing these streets, a traffic that cannot be diverted.

Note that the new $85,000 Southern Pacific Station is directly below this triangle, and that our new office, furnished and equipped second to none in the city, is located in the very heart of this favored "White Spot," where we will center our activities. We have made big money for others and we can do it for you. Come in and look over the excellent investments we have to offer.

WOODBURY HEIGHTS HOMETRACT IS PLACED ON MARKET

ONE OF GLENDALE'S MOST ATTRACTIVE PROPERTIES IS OFFERED LOCAL BUYERS

Ninety-five of the Choicest Building Lots in This Section Are Available; the Improvements Will Be of the Highest Type Possible

TRACT WILL HAVE ELECTROLIER SYSTEM

This Dream Subdivision, Located on Verdugo Road, Overlooking the San Fernando Valley, Promises to Be Disposed of in Record Time

Woodbury Heights, one of the most wonderfully scenic and admirably located pieces of foothill property in Glendale, situated on Verdugo road between Lexington and Monterey, was thrown open for reservations Friday morning. At that time the people of this city and the surrounding country were given an opportunity of selecting their future homesites, of choosing the piece of realty on which their homes during the coming months and years will be located.

That the value of the sites in this tract is appreciated by every person who visited the tract, a number of reservations were made and things look promising for the tract being disposed of within a reasonable length of time.

Woodbury Heights is one of those tracts of real estate that one finds but once in a lifetime. Without doubt it is one of the most choice subdivisions that has been opened in Glendale for years, every lot being a jewel—a piece of realty that could serve as a location for a mansion.

This property is located on the west side of Verdugo road, just a short distance north of Sycamore Canyon road. It was on this property that the old Kalem film studio was located. From Verdugo road the property rises gradually to the eastward, there being just enough grade to make it ideal for hillside homesite purposes. The streets are being cut through the property so that each tier or row of homesites will rise sufficiently high above the one below to give the owners of every lot an unobstructed view of the entire San Fernando valley, one of the most fertile valleys in the world.

In this tract there are 95 lots. These range in width from 60 to 90 feet. The building restrictions in this tract are from $6,000 to $7,500, and the prices of the lots run from $1,500 to $7,000.

The prices include the very highest type of street improvements. In this entire tract there will be 3-inch macadam streets, sidewalks, curbings and the like, and in addition there will be an elaborate system of ornamental electroliers, this being the first tract opened in Glendale with features of this kind.

Terms on the lots of this tract are one-fifth cash, with four years to pay the balance. Interest on deferred payments is at the rate of 7 per cent. One feature in connection with the sale of these lots is that 10 per cent discount will be allowed to purchasers who build in this tract within one year from the date of purchase.

While owned by G. B. Woodbury, this tract is presented by the T. W. Watson company, 708 East Broadway, which firm has handled some very important properties in Glendale recently.

Mr. Watson, the tract salesmanager, is one of the old-timers of Glendale. He came to Glendale more than 20 years ago and has always had his finger on the commercial and political life of the city. For several years he was city manager of Glendale, and during his term of office some of the most important things ever done for Glendale were executed.

"This tract is close to things," said Mr. Watson, when discussing the tract this morning. "It is only four blocks from the high school and three blocks from transportation, both of which are important factors in connection with any subdivision.

"In presenting this tract to the public we are not endeavoring to 'burn things up,' as they say. We plan to make this one of the most beautiful and substantial subdivisions ever offered in Glendale. By this we mean that we believe the improvements that we are offering will, in very case, result in increased valuation. Our aim will be to have every purchaser in this tract make money. We are putting a premium on the placing of improvements in the way of homes on this tract, by giving a discount of 10 per cent of the price of the lots to those building within a year after the date of purchase. This we are doing in an effort to produce a gradual increase in the value of every lot on the tract. The homes will be of high character and everything will be done to keep up to the highest point the quality and standing of the subdivision.

"This tract has a frontage of 1200 feet on Verdugo road, from which it runs back into the hills, constituting one of the most charming home locations, we think, in the entire extent of Southern California.

Mr. and Mrs. G. B. Woodbury have owned this property for nearly 40 years. They have held on to it through thick and thin, their faith in the ultimate success and advancement of Glendale having never been shaken by the "stormy sessions" that this community in the years gone by have experienced.

For their faith in Glendale Mr. and Mrs. Woodbury are being repaid. On one of the most sightly lots in their tract they have erected for themselves a very beautiful home, and one that is a real credit to Glendale. Everything about the home is plain but homelike. There has been no attempt at a "gingerbread effect." It is a "regular" home for "regular" folks.

OAKRIDGE HOME SITES ARE IN DEMAND

Scenic home sites in the Oakridge tract are proving in considerable demand, according to the manager of this tract. These sites, which range from $1,650 up, are real values, and it is this feature that is attracting the attention of home buyers.

Here are a few of the features that are making this tract popular A splendid place for the home, ideal climatic conditions, protective restrictions, close to transportation, schools and business, six miles to Third and Broadway, Los Angeles.

The tract is being handled by the Guillemin Investment Company, with local offices at 812 South Brand Boulevard.

TEN WEEKS' STOCK APPEALS

Attractive both for its fragrance and for its handsome flowers, in many soft shades, the ten weeks' stock is a favorite bedding plant. However, it has developed a trick which has caused many gardeners to discard it. During the last few years some of the strains sold develop a habit of forming great tufts of leaves and failing to show a flower during the season, or until very late.

These plants, one authority says, are the result of crossing with some of the biennial forms of stock, which have spoiled the purity of the annual strain, and they are being weaned out as fast as they can be found. This may or may not be the case, but several growers say they have solved this trouble by cutting the tap root when they transplant the seedling plants and that, by checking the rather thick central root and developing a more fibrous root system, the habit of running to leaves is conquered.

However, even if a few plants show this weakness, the majority of a planting is not at all likely to do so, and the double spikes, which give a continuous display above gray-green foliage, make it a favorite wherever it is grown. The purple and lavender shades with the soft pinks and yellows are particularly attractive.

These plants are very easily raised annuals from seed. One essential is to secure a first-class strain of seed from a reliable seed house. These seeds are selected from free-flowering types and least likely to give the leafy non-blooming plants.

The dwarf ten weeks' stocks are less likely to develop the leaf plants than the "cut-and-come-again" type. The latter have more biennial blood in them. The stocks like an open situation, where they will have plenty of sun, and like fairly rich soil, but will flourish in soil having less food supply than some other annuals. The dwarf ten weeks' stocks planted to beds of single colors can furnish a very beautiful all-summer garden in themselves.

CITY PRINTING

PUBLIC NOTICE

WHEREAS, The City Council of the City of Glendale, has heretofore by Ordinance No. 570, established a certain Industrial District in the City of Glendale; and

WHEREAS, pursuant to the provisions of Section 2, Article XV of the Charter of the City of Glendale, a petition has been filed with the City Clerk of said City by C. B. Hill and others, asking that the Commercial District established by said Ordinance No. 570, be amended and changed so as to remove from said Commercial District said property described in said petition and more particularly hereinafter described; and

WHEREAS, said City Clerk has presented said petition to the City Council; and

WHEREAS, before any change can be made in said Commercial District as requested in said Petition it is necessary under said Section 2 of Article XV of the Charter of said City, and said Council has directed that public notice of a hearing upon said petition be given by the City Clerk by one publication in the official newspaper of said city, at least ten days before the time of such hearing.

NOW, THEREFORE, and pursuant to the requirements of said Section 2, Article XV of the Charter of the City of Glendale, and the direction of said City Council,

PUBLIC NOTICE IS HEREBY GIVEN

that at the hour of 7 o'clock P. M. of the 4th day of October, 1923, at the Council Chamber in the City of Glendale, a public hearing will be given and had on said proposed amendment or change of said Commendment or change of said Commercial District, when and where all persons having any objections to said amendment or change in said Commercial District, may appear before said City Council and present any objection, or objections, which they may have to said proposed amendment or change in said Commercial District. Any person having an interest in any of the frontage of property which will be directly affected by said proposed amendment or change, may file with the City Clerk a written protest or objection to said proposed amendment or change in said Commercial District. Said protest must be filed not later than the hour set for hearing, when all protestants may appear before the Council at said hearing, either in person or by counsel, and be heard in support of their protests or objections.

That property described in said petition and sought to be excluded from said Commercial District, is described as follows:

All of Lots 1 to 8 inclusive of Tract 4411 as per map recorded in Book 47, Page 77, of Maps, Records of Los Angeles County, California.

The petition above referred to is on file in the office of the City Clerk of the City of Glendale and is hereby referred to for further particulars.

This notice shall be published once in the Glendale Daily Press, the official newspaper of said City, at least ten days before the date of the hearing hereinabove mentioned.

Dated, September 21, 1923.

A. J. VAN WIE,
City Clerk of the City of Glendale.

NOTICE INVITING STREET WORK PROPOSALS

Pursuant to Statute and to Resolution No. 2106 of the Council of the City of Glendale, California, adopted the 20th day of September, 1923, directing this notice, the undersigned invites and will receive at his office in the City Hall, No. 619 East Broadway, near Glendale Avenue, up to 7:00 P. M. of the 4th day of October, 1923, sealed proposals or bids for the following improvement, to be done according to Specifications and Plans adopted for the said work, on file, to-wit:

The work on a portion of

HILLSIDE DRIVE

and certain streets and alleys intersecting or terminating therewith in the City of Glendale, described in Resolution of Intention No. 2066, passed by the Council of the City of Glendale, on the 16th day of August, 1923, to which said Resolution reference is hereby made for a description of said work. Specifications Nos. 31, 36, and 42, referred to in said description, are on file in the office of the City Clerk and also posted near the chamber door of the Council.

Bonds will be issued as provided for in said Resolution of Intention No. 2066.

Bidders must file with each proposal or bid a check payable to the Mayor of the City of Glendale, certified by a responsible bank, for an amount which shall not be less than ten per cent of the aggregate of the proposal or a bond for the said amount and so payable, signed by the bidder and two sureties, who shall justify before any officer competent to administer oaths, for double the said amount, and over and above all statutory exemptions.

In bidding use blanks which will be furnished by the City Clerk upon application.

Glendale, California. Clerk's Office, this 22nd day of September, 1923.

A. J. VAN WIE,
City Clerk of the City of Glendale.

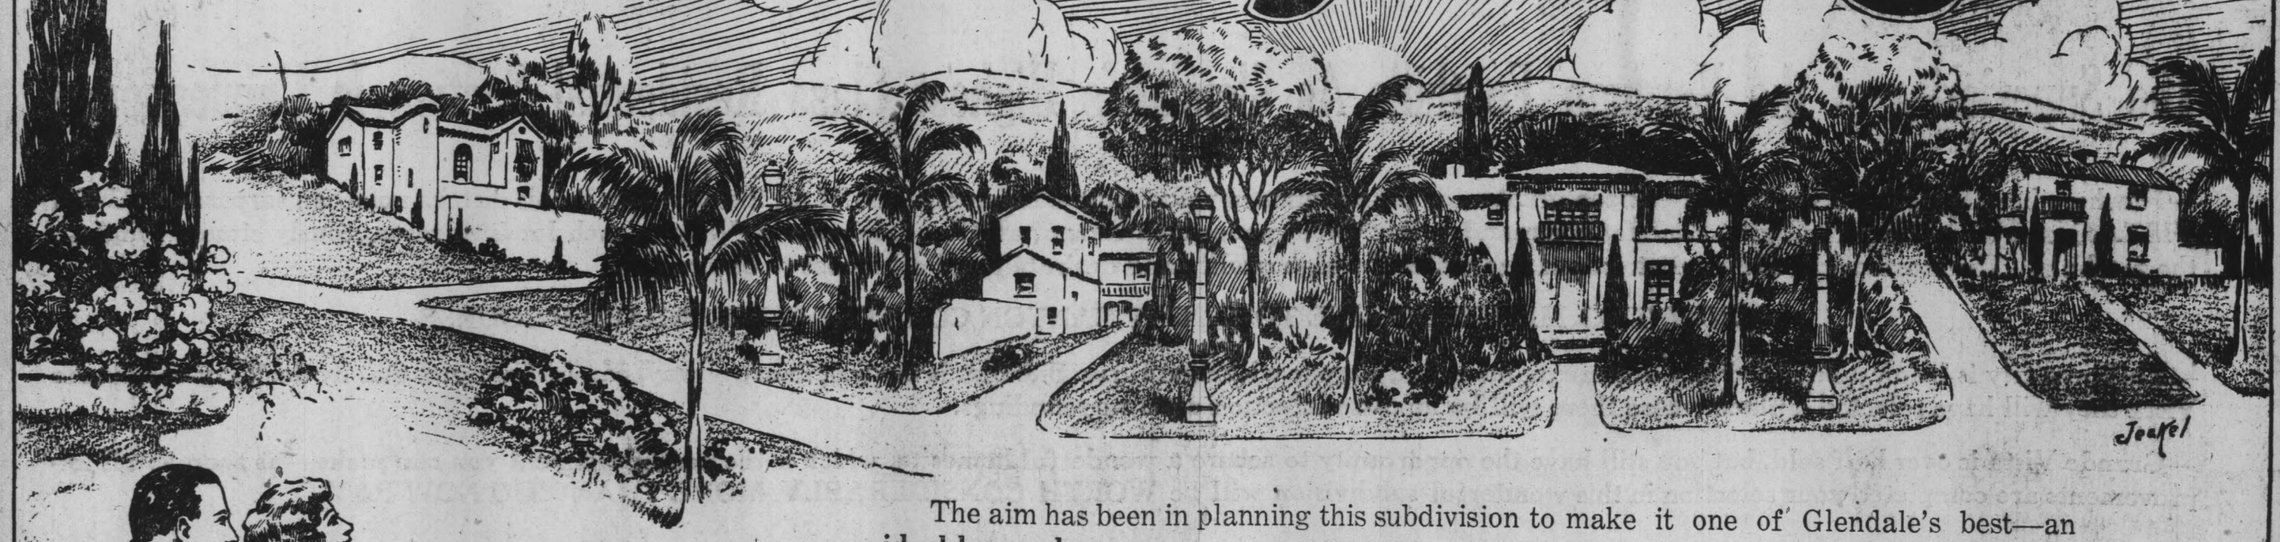
Woodbury Heights



The Joy of owning your "HOME".

The aim has been in planning this subdivision to make it one of Glendale's best—an **ideal home place.**

It is indeed a pleasure to offer this attractive property to the discriminating seekers of homes in Glendale. **Each lot is a jewel—charming location,** beautiful view, complete improvements, carefully planned restrictions and nearness to **business center, high school, street cars, bus lines** and **main boulevards** are some of the many attractive features. Twelve hundred feet of frontage on Verdugo Boulevard gives accessibility, and a gentle rise toward the east and north gives each lot a commanding position and an **unobstructed view,** while encircling hills on the north and east provide a degree of seclusion that gives the tract an **individuality** of its own.

If you are looking toward the hills for a future **home site,** or an **investment** where **Glendale values** will surely increase, you are invited to let us show you this attractive property.

TRACT OFFICE will be open for RESERVATIONS FRIDAY, September 21

View Shows Location of Castle Heights

This Beautiful Tract is located right in the heart of the wonderful foothill section, where homeplaces are in demand

WONDERFUL VIEW OF THE SAN FERNAN DO VALLEY IS GAINED FRO M CASTLE HEIGHTS

Beautiful Homesite Subdivision, Situated Close to the Stately Brand Castle, Is Attracting Many Home Buyers of This City

ALL IMPROVEMENTS IN TRACT HIGH CLASS

Edgemont Park Also Comes In For Considerable Attention—Located Between Burbank and Lankershim, It Is In Path of Advancement

A magnificent panoramic view of the San Fernando valley from Eagle Rock on the east to Lankershim on the west, with Glendale in the foreground and the fertile acres of the valley beyond, is secured from Castle Heights, one of the most exclusive home tracts in Glendale. This tract is located at the corner of Mountain and Western, immediately adjoining the Brand castle on the west. It is situated one block from Tenth street and three blocks from the car line. Within a short time adequate buses will be running very close to this tract.

Mr. Hamlin of the firm of Hamlin & Hepburn, 203 West Broadway, that is putting on this tract, said this morning:

"We do not know where more real value for the money can be obtained than right in Castle Heights. We have priced the lots in this tract so hat they will sell rapidly. These prices range from $1,750 to $4,250, and are being sold on terms of 20 per cent down and the remainder at 2 per cent per month. The lots in this tract are 50x165, 60x165 and 64x170 feet in size, plenty large for the better type of home. We believe we are offering real values in this tract, and we are confident, also, that those buying lots in this tract will make some real money during the next few months."

Everything in the way of improvement is being installed in this tract, including water, gas, electricity, telephones, paved streets, curbs, sidewalks, etc. Nothing along this line is being omitted.

To reach Castle Heights drive out San Fernando road or Kenneth road to Grand View and look for the company's sign on Mountain street, adjoining Brand's golf course.

Another tract that was put on by the Hamlin & Hepburn company recently and that is proving popular among real estate buyers is Edgemont Park. This tract is located on the Dark canyon road, between Burbank and Lankershim.

"Scores of thrifty home lovers," said Mr. Hepburn, "have grasped this opportunity to own their own home in the finest section of San Fernando valley. In your home, in the cool, green stretches or under the great trees of Edgemont Park, you will be only five minutes from Burbank and the same from Lankershim, two of the fastest growing cities of the valley.

"Every lot in Edgemont Park offers the buyer a sure, swift profit. Soon the rapid growth of Los Angeles will stretch far beyond Edgemont Park, will enfold this section of the valley and the Edgemont Park lots will soar in value as the city strides forward.

"One of the operations of this company is that the firm will build for the buyer a dandy little home and will sell the home and the lots on a small payment down and reasonable payments per month.

Lots in this tract range from $495 to $1,300 and the terms are unusually easy.

HOME NURSING AND HEALTH HINTS

By M . . SIE LEITCH

Do Your Feet Hurt?

Mrs. Stone went into her back yard groaningly and began to take the clothes off the line. Every step she took was torture to her. Her feet had always troubled her. She said she had tried everything, and she believed that she had. The only thing she had not tried was something that cost nothing but time and effort. It sounded so simple that when people suggested it to her she looked at them pityingly—almost scornfully—and said, "I've tried everything, my dear. I suppose I'll just have to endure aching feet for the rest of my life."

Mrs. Stone liked pretty shoes. That was the beginning of the trouble. From early girlhood she had sacrificed comfort for beauty, and the process of "breaking in new shoes" was one of the things one associated with Mabel Stone just as one associates vanilla flavoring with cream pie, and ants and spiders with Sunday school picnics.

She maddened shoe salesmen by her indecision. She refused to take their advice as to widths and lengths in shoes. She always said that she knew her own feet best. Perhaps she did. Mabel was always putting her tightly covered feet up on chair rungs when no one was looking, and furtively removing her slippers in theatres and concerts.

Then she had suddenly turned to the opposite extreme. She went in for foot comfort on a large scale, wearing ugly shoes and sacrificing beauty altogether. In her broad, flat heeled shoes that were loosely fitted her feet ached and she walked with difficulty. There was always pain in her ankles and her heels and the back of her leg. Little flashes of pain in the calf of her leg made her quite sure that she was getting a thrombosis. Not that she knew what a thrombosis was.

She had been wearing high heels for years and the Achilles tendons in her heels had tightened because her body had been constantly thrown out of position. In flat heels the tendons were stretched and undue tension placed upon them. This was the real reason for the pains in the backs of the legs.

Then her knees were stiff and her ankles bothered her.

Mabel had a tendency to rheumatism. She was carcless about food.

Altogether she was very miserable.

Mrs. Stone's doctor son came home and sternly took up the matter of foot comfort with his mother.

"Those shoes are too loose and the heels are too low," he said. "What you need is a well-fitted shoe, a moderate, sensible heel, thin cashmere stockings instead of harsh, thin silk ones, and foot exercises.

"The circulation in your feet is sluggish. Instead of soaking your feet in almost boiling water when they ache, and making them most sensitive and tender, you should bathe them with warm water, relaxing the while with every nerve and muscle in your body. Then a spray of cold salt water and a brisk rubbing with warm towels will do much toward stimulating circulation in your feet.

"At least fifteen minutes rest in the middle of the day, with your head low and your feet elevated, will help.

"Foot exercises and massage night and morning are valuable. A little more attention to your food—less rich pastries, fewer fats, and starches, more drinking water and vitamines, fresh fruits and vegetables. These are the things that are going to take the ache out of your feet."

And at the end of several months Mabel Stone's feet scarcely ever bothered her.

CONCRETE STREETS ELECTROLIERS IN ROSSMOYNE

Five-inch concrete streets and electroliers will be among the features of the wonderful Rossmoyne tract, according to a statement made this week by Lon H. Haddock, member of the firm of Haddock-Nibley Company, owners and subdividers of the tract.

"So far as we know this is the first tract in Glendale to have concrete streets," said Mr. Haddock. "We intend to make all of these streets five inches of concrete, constituting the strongest roads in any tract in this valley.

"In addition to these beautiful and durable streets, we are going to install an electrolier system that will be second to none in this part of the country.

"In this tract there will be about 15 miles of streets. In the first unit there are 281,757 feet of street, while in the second unit there are 418,776 feet of roads. The improvement of streets in this tract will cost about $350,000.

"Sales in this tract are averaging about $5,000 per day. About one million dollars worth of lots have already been sold. Seven homes are in course of construction at this time and within thirty days I expect that a new home will be started on the tract every day. Gas and water mains have been completed in unit No. 1, and the work on the extension of these will be started in No. 2 immediately.

'SUBDIVISIONS' IS SUBJECT OF LAST LECTURE BY COOK

The last lecture in the series to be given during the Landscape Architects' exhibit will occur next Sunday afternoon, September 23d, at 3 o'clock, in the Assembly Hall of the Southwest Museum, Los Angeles. The speaker of the afternoon will be W. David Cook, president Pacific Coast chapter, American Institute of Landscape Architects, and his subject is "Subdivisions," illustrated with lantern slides. Mr. Cook will also dwell on the honorable mention awarded by the jury of awards on September 20th, on which Sumner P. Hunt, chairman of the jury; Myron Hunt, J. R. Prince, Emanuel Tillman Mische and James G. Langdon are serving. The exhibit will continue until September 30 and the public is cordially invited to view this unique handling of difficult civic problems.

A traveler called at a Paris hotel and asked what the rates were.

"Vun moment, sare," replied the porter, in his best English, "I will call the proprietaire."

When the landlord arrived on the scene the traveler repeated his question.

"Thirty francs for a room on the first floor, twenty francs for the second, and ten francs for the third," said the landlord.

"Thank you," said the traveler courteously and turned to go.

"Doesn't that please you?" asked the landlord, unwilling to lose a guest.

"Yes, your prices are all right," answered the traveler, "but your hotel isn't high enough."

NOTICE OF AWARD OF CONTRACT

Pursuant to Statute and to Resolution of Award of the Council of the City of Glendale, California, adopted the 20th day of September, 1923, directing this notice, notice is hereby given that the said Council, in open session, on the 6th day of September, 1923, opened, examined, and publicly declared all sealed proposals offered for the following improvement, to-wit:

Portions of Sierra Avenue, Merrill Avenue, Hill Drive and of certain streets and alleys intersecting and terminating therewith in the City of Glendale

as described in Resolution of Intention No. 2019, passed by said Council on the 12th day of July, 1923, to which said Resolution reference is hereby made for a description of said work, and of the district to be assessed therefor.

The Council of the City of Glendale determines that serial bonds shall be issued to represent assessments of twenty-five ($25.00) dollars or over for the costs of said work or improvement; said serial bonds shall extend over a period ending nine (9) years from and after the second day of January next succeeding the date of said bonds, and an even annual proportion of the principal sum thereof shall be payable by coupon on the second day of January every year after their date until the whole is paid; and the interest shall be payable semi-annually by coupon on the second days of January and July, respectively, of each year at the rate of seven per cent per annum on all sums unpaid until the whole of said principal and interest is paid.

Said bonds shall be issued in accordance with the provisions of an Act of the Legislature of the State of California, entitled "An Act to provide a system of street improvement bonds to represent certain assessments for the cost of street work and improvements within municipalities and also for the payment of such bonds," approved February 27, 1893, and of all Acts supplementary thereto and amendatory thereof.

And thereafter, to-wit: On the 20th day of September, 1923, awarded the contract for said work to the lowest regular responsible bidder, to-wit: City of Glendale, at the prices specified for said improvement in its proposal, on file for said improvement, to-wit:

Cast Iron Pipe, as per plan....$5008.12

And that said award has been approved by the Mayor, pro. tem., of the said City of Glendale.

Clerk's office, City of Glendale, California, 21st day of September, 1923.

ORDINANCE NO. 844

AN ORDINANCE OF THE COUNCIL OF THE CITY OF GLENDALE ESTABLISHING THE GRADE ON A PORTION OF CERRITOS AVENUE AND GARDENA AVENUE, ALL WITHIN THE CITY OF GLENDALE.

BE IT ORDAINED BY THE COUNCIL OF THE CITY OF GLENDALE:

SECTION 1. That the grade of Cerritos Avenue from the northeasterly line, and its extensions, of Gardena Avenue to the northwesterly extension of the southwesterly line of Lot 16, Block 5, Tract No. 910, as per Map recorded in Book 16, Page 133 of Maps, Records of Los Angeles County, California, be and the same is hereby established in accordance with the following elevations:

Along the northwesterly grade line of Cerritos Avenue the grade shall be as follows:

At its intersection with the southeasterly extension of the northeasterly line of Gardena Avenue 431.19
At its intersection with the southeasterly extension of the southwesterly line of Gardena Avenue 430.70
At its intersection with the northwesterly extension of the southwesterly line of Lot 16, Block 5, aforesaid Tract No. 910 ..... 431.30

Along the southeasterly grade line of Cerritos Avenue the grade shall be as follows:

At its intersection with the northwesterly extension of the northeasterly line of Gardena Avenue 431.01
At its intersection with the northwesterly extension of the southwesterly line of Gardena Avenue 430.50
At its intersection with the northwesterly extension of the southwesterly line of Lot 16, Block 5, aforesaid Tract No. 910 ..... 431.30

That portion of the northwesterly grade line above mentioned lying southwesterly of Gardena Avenue is ten (10) feet southeasterly from and parallel to the northwesterly line of Cerritos Avenue, as Cerritos Avenue is located southwesterly of Gardena Avenue, and that portion of the northwesterly grade line above mentioned lying northeasterly of Gardena Avenue is fourteen (14) feet southeasterly from and parallel to the northwesterly line of Cerritos Avenue, as Cerritos Avenue is located northeasterly of Gardena Avenue and that portion of the southeasterly grade line above mentioned located southwesterly of Gardena Avenue is ten (10) feet northwesterly from and parallel to the southeasterly line of Cerritos Avenue, as Cerritos Avenue is located southwesterly of Gardena Avenue, and that portion of the southeasterly grade line above mentioned lying northeasterly of Gardena Avenue is fourteen (14) feet northwesterly from and parallel to the southeasterly line of Cerritos Avenue as Cerritos Avenue is located northeasterly of Gardena Avenue.

That between the above designated points of elevation the grades shall conform to the uniform grade joining said points.

The top of the curbs to be constructed shall conform to said grades hereinabove established on the same side of the streets.

SECTION 2. That the grade of Gardena Avenue from a line drawn at right angles to the southwesterly line of Gardena Avenue from a point therein four (4) feet northwesterly, measured along said southwesterly line from the most westerly corner of Cerritos Avenue and Gardena Avenue to a line drawn at right angles to the southwesterly line of Gardena Avenue, from a point therein four (4) feet southeasterly, measured along said southwesterly line from the most southerly corner of Cerritos Avenue and Gardena Avenue, be and the same is hereby established in accordance with the following elevations:

Along the southwesterly grade line of Gardena Avenue the grade shall be as follows:

At its intersection with a line drawn at right angles to the southwesterly line of Gardena Avenue, from a point therein four (4) feet northwesterly measured along said southwesterly line, from the most westerly corner of Gardena Avenue and Cerritos Avenue 430.67
At its intersection with a line drawn at right angles to the southwesterly line of Gardena Avenue from a point therein four (4) feet southeasterly, measured along said southwesterly line from the most southerly corner of Gardena Avenue and Cerritos Avenue 430.43

Along the northeasterly grade line of Gardena Avenue the grade shall be as follows:

At its intersection with a line drawn at right angles to the southwesterly line of Gardena Avenue from a point therein four (4) feet northwesterly, measured along said southwesterly line from the most westerly corner of Gardena Avenue and Cerritos Avenue 431.30
At its intersection with a line drawn at right angles to the southwesterly line of Gardena Avenue from a point therein four (4) feet southeasterly, measured along said southwesterly line from the most southerly corner of Gardena Avenue and Cerritos Avenue 430.90

The southwesterly grade line of Gardena Avenue is a line fourteen (14) feet northeasterly from and parallel to the southwesterly line and its extensions of Gardena Avenue, and the northeasterly grade line of Gardena Avenue is a line fourteen (14) feet southwesterly from and parallel to the northeasterly line and its extensions of Gardena Avenue.

That between the above designated points of elevation the grade shall conform to a uniform grade joining said points.

The top of the curbs to be constructed shall conform to the grades hereinabove established on the same side of the street.

All elevations given in this Ordinance are in feet above the City Datum Plane heretofore established.

SECTION 3. The City Clerk shall certify to the passage of this Ordinance and shall cause the same to be published by one insertion in the Glendale Daily Press, a daily newspaper of general circulation, published and circulated in the City of Glendale, and the same shall take effect and be in full force immediately upon its passage.

Adopted and approved this 20th day of September, 1923.

S. A. DAVIS,
Mayor, pro. tem., of the
City of Glendale.
Attest: A. J. VAN WIE,
City Clerk of the City of Glendale.

STATE OF CALIFORNIA)

CITY PRINTING

NOTICE OF AWARD OF CONTRACT

Pursuant to Statute and to Resolution of Award of the Council of the City of Glendale, California, adopted the 20th day of September, 1923, directing this notice, notice is hereby given that the said Council, in open session, on the 6th day of September, 1923, opened, examined and publicly declared all sealed proposals offered for the following improvement, to-wit:

The first alley east of Louise Street, between Lexington Drive and Doran Street, and portions of Kenwood Street, Doran Street and Louise Street in the City of Glendale

as described in Resolution of Intention No. 2002, passed by said Council on the 5th day of July, 1923, to which said Resolution reference is hereby made for a description of said work, and of the district to be assessed therefor.

The Council of the City of Glendale determines that serial bonds shall be issued to represent assessments of twenty-five ($25.00) dollars or over for the costs of said work or improvement; said serial bonds shall extend over a period ending nine (9) years from and after the second day of January next succeeding the date of said bonds, and an even annual proportion of the principal sum thereof shall be payable by coupon on the second day of January every year after their date until the whole is paid; and the interest shall be payable semi-annually by coupon on the second days of January and July, respectively, of each year at the rate of seven per cent per annum on all sums unpaid until the whole of said principal and interest is paid.

Said bonds shall be issued in accordance with the provisions of an Act of the Legislature of the State of California, entitled "An Act to provide a system of street improvement bonds to represent certain assessments for the cost of street work and improvements within municipalities and also for the payment of such bonds," approved February 27, 1893, and of all Acts supplementary thereto and amendatory thereof.

And thereafter, to-wit: On the 20th day of September, 1923, awarded the contract for said work to the lowest regular responsible bidder, to-wit: C. L. Hill, at the prices specified for said improvement in his proposal, on file for said improvement, to-wit:

Paving, per square foot, including grading ..... $ .18
Curb, "Class B," per linear foot ..... .50
Cast Iron Pipe, complete 2340.00

And that said award has been approved by the Mayor, pro. tem., of the said City of Glendale.

Clerk's Office, City of Glendale, 21st day of September, 1923.

A. J. VAN WIE,
City Clerk of the City of Glendale.

PUBLIC NOTICE

NOTICE OF THE RECORDING OF THE ASSESSMENT AND DIAGRAM FOR THE LAYING OUT AND OPENING OF GARFIELD AVENUE FROM THE EASTERLY LINE OF MARIPOSA STREET TO THE WESTERLY LINE OF ADAMS STREET, IN THE CITY OF GLENDALE.

Notice is hereby given that the assessment and diagram for the laying out and opening of Garfield Avenue, from the easterly line of Mariposa Street to the westerly line of Adams Street in accordance with Ordinance No. 440, was recorded in the office of the Street Superintendent of the City of Glendale, on the 21st day of September, 1923.

The date of the first publication of this notice is September 22, 1923.

All sums levied in said assessment are due and payable immediately and payment of said sums is to be made to me in my office at the City Hall, No. 619 East Broadway, in said City, within thirty (30) days after the said date of the first publication of this notice.

All assessments not paid before the expiration, of said thirty (30) days will become delinquent and thereupon five (5) per cent upon the amount of each assessment will be added thereto, and the property advertised for sale as provided for by law.

BEN F. DUPUY,
Street Superintendent
of the City of Glendale.
9-22-23—10t

PUBLIC NOTICE

WHEREAS, The City Council of the City of Glendale, has heretofore by Ordinance No. 529, established certain Residential, Industrial and Commercial Districts in the City of Glendale; and

WHEREAS, pursuant to the provisions of Section 2, Article XV of the Charter of the City of Glendale, a petition has been filed with the City Clerk of said City by E. W. Wolsey and others, asking that the Commercial District established by said Ordinance No. 529, be amended and changed so as to include in said Commercial District said property described in said petition and more particularly hereinafter described; and

WHEREAS, said City Clerk has presented said petition to the City Council; and

WHEREAS, before any change can be made in said Commercial District as requested in said Petition it is necessary under said Section 2 of Article XV of the Charter of said City, and said Council has directed that public notice of a hearing upon said petition be given by the City Clerk by one publication in the official newspaper of said city, at least ten days before the time of such hearing.

NOW, THEREFORE, and pursuant to the requirements of said Section 2, Article XV of the Charter of the City of Glendale, and the direction of said City Council,

PUBLIC NOTICE IS HEREBY GIVEN

that at the hour of 7 o'clock P. M. of the 4th day of October, 1921, at the Council Chamber in the City of Glendale, a public hearing will be given and had on said proposed amendment or change of said Commercial District, when and where all persons having any objections to said amendment or change in said Commercial District, may appear before said City Council and present any objection, or objections, which they may have to said proposed amendment or change in said Commercial District. Any person having an interest in any of the frontage of property which will be directly affected by said proposed amendment or change, may file with the City Clerk a written protest or objection to said proposed amendment or change in said Commercial District. Said protest must be filed not later than the hour set for hearing, when all protestants may appear before the Council at said hearing, either in person or by counsel, and be heard in support of their protests or objections.

That property described in said petition and sought to be excluded from said Commercial District, is described as follows:

Beginning at a point in the easterly line of Lot 6, M. M. Lynch Tract, as per Map recorded in Book 16, Page 65, of Maps, Records of Los Angeles County, California, where said line is intersected by a line drawn one hundred forty-five (145) feet northerly from and parallel to the northerly line of Palmer Avenue; thence easterly along said line so drawn to an intersection with the westerly line of Lot 6, Tract No. 4716, as per Map recorded in Book 50, Page 28, of Maps, Records of said County; thence southerly along the westerly line of said Lot 6 to the northwesterly corner of Lot 5 of said Tract 4716; thence easterly along the northerly line of said Lot 5 to the northeasterly corner thereof; thence southerly along the easterly line of said Lot 5 to the northwesterly line of Adams Street; thence southwesterly along the northwesterly line of Adams Street to an intersection with the northerly line of Palmer Avenue; thence westerly along the northerly line of Palmer Avenue to the easterly line of Lot 6 of said M. M. Lynch Tract; thence northerly along the easterly line of said Lot 6 to the point of beginning.

The petition above referred to is on file in the office of the City Clerk of the City of Glendale and is hereby referred to for further particulars.

This notice shall be published once in the Glendale Daily Press, the official newspaper of said City, at least ten days before the date of the hearing hereinabove mentioned.

Dated, September 21, 1923.

A. J. VAN WIE,
City Clerk of the City of Glendale.
9-22-23—1t

RESOLUTION NO. 2102

A RESOLUTION OF THE COUNCIL OF THE CITY OF GLENDALE ORDERING CERTAIN IMPROVEMENTS TO BE MADE ON PORTIONS OF FOURTH STREET, WINCHESTER AVENUE, JUSTIN AVENUE, AND OF CERTAIN STREETS AND ALLEYS INTERSECTING OR TERMINATING THEREWITH, IN THE CITY OF GLENDALE.

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF GLENDALE:

SECTION 1. That the improvement herein described is required by the public interest and convenience, and the Council of the City of Glendale, State of California, hereby orders the improvement to be made on portions of

FOURTH STREET, WINCHESTER AVENUE, JUSTIN AVENUE

and of certain streets and alleys intersecting or terminating therewith, in the City of Glendale, described in Resolution of Intention No. 2043, passed by said Council on the 6th day of August, 1923, to which Resolution reference is hereby made for a description of said work.

SECTION 2. The district to be assessed to pay the cost and expenses of said work and improvement is described in said Resolution of Intention No. 2043, to which said Resolution reference is hereby made for further description of said assessment district.

SECTION 3. Bonds will be issued as provided for in said Resolution of Intention No. 2043.

SECTION 4. The Glendale Daily Press, a daily newspaper of general circulation, published and circulated in said City of Glendale, is hereby designated as the newspaper in which this Resolution and notice inviting street work proposals shall be published in the manner and form and by the persons required by law.

SECTION 5. The City Clerk of the City of Glendale is hereby directed to post conspicuously for five days on or near the chamber door of the Council, in the manner and form required by law, a notice with Specifications, inviting street work proposals or bids for doing said work; and said City Clerk is hereby directed to publish for two days in said newspaper hereby designated for that purpose as aforesaid, in the manner and in the form required by law, a notice of said work inviting sealed proposals or bids for doing said work, and referring to the Specifications posted or on file.

Said notice shall require all proposals or bids offered to be accompanied by a certified check or bond, either, as prescribed by law, and for an amount not less than ten per cent of the aggregate of the proposal. Said City Clerk is also hereby directed to published this Resolution for two days, in the manner required by law, in said newspaper designated for that purpose, as aforesaid.

Adopted and approved this 20th day of September, 1923.

S. A. DAVIS,
Mayor, pro. tem., of the City of
Glendale.

ORDINANCE NO. 843

AN ORDINANCE DEDICATING FOR PUBLIC STREET PURPOSES CERTAIN REAL PROPERTY OWNED BY THE CITY OF GLENDALE, ACCEPTING THE SAME FOR THE USE OF THE PUBLIC AND NAMING THE SAME CERRITOS AVENUE.

BE IT ORDAINED BY THE COUNCIL OF THE CITY OF GLENDALE:

SECTION 1. The City of Glendale hereby appropriates and dedicates that certain real property owned by it, situated in the City of Glendale, County of Los Angeles, State of California, and described as:

All of Lots 14 and 15, Block 5, Tract No. 910, as per Map recorded in Book 16, Page 133, of Maps, Records of Los Angeles County, California, to the City of Glendale and to the public use for public street purposes, the same to become a part of and to be named Cerritos Avenue.

SECTION 2. That certain real property hereinabove described is hereby accepted by the City of Glendale for the public for public street purposes, and the same is hereby declared to be a part of and is hereby named Cerritos Avenue.

SECTION 3. The City Clerk shall certify to the passage of this ordinace and shall cause the same to be published once in the Glendale Daily Press, the official newspaper of said City, and it shall take effect and be in force on the thirtieth day after its passage.

Passed by the Council of the City of Glendale on the 20th day of September, 1923.

S. A. DAVIS,
Mayor, pro. tem., of the
City of Glendale.
Attest: A. J. VAN WIE,
City Clerk of the City of Glendale.

Be sure to give seedling plants growing indoors all the light possible. They will reach up for it, if they must, and thus become weak and spindling.

MEMBERSHIP LIMIT REMOVED IN K. C.

In deference to a recent resolution of the board of directors of the National Association of Real Estate Boards, condemning the placing of arbitrary limitations upon membership in its constituent boards, the Kansas City Real Estate Board is engaged in removing its numerical bounds. As the membership limitation of the Kansas City board has been enlarged from time to time it has never, in practice, been restrictive.

Disapproval of a numerical limitation policy for local boards by the National Association is based on the belief that since there can be only one member board in any city the shutting off of any persons of character, proved ability, and moral responsibility from the benefits of membership in a constituent board would be incompatible with the best interests of the real estate pdofession.

Forget the thermometer when the ground is ready to work. Sow radishes, lettuce, beets, carrots, spinach and turnips without regard to late frosts. Smooth-seeded peas may also be planted.

A romance of reel life: The average fish story.

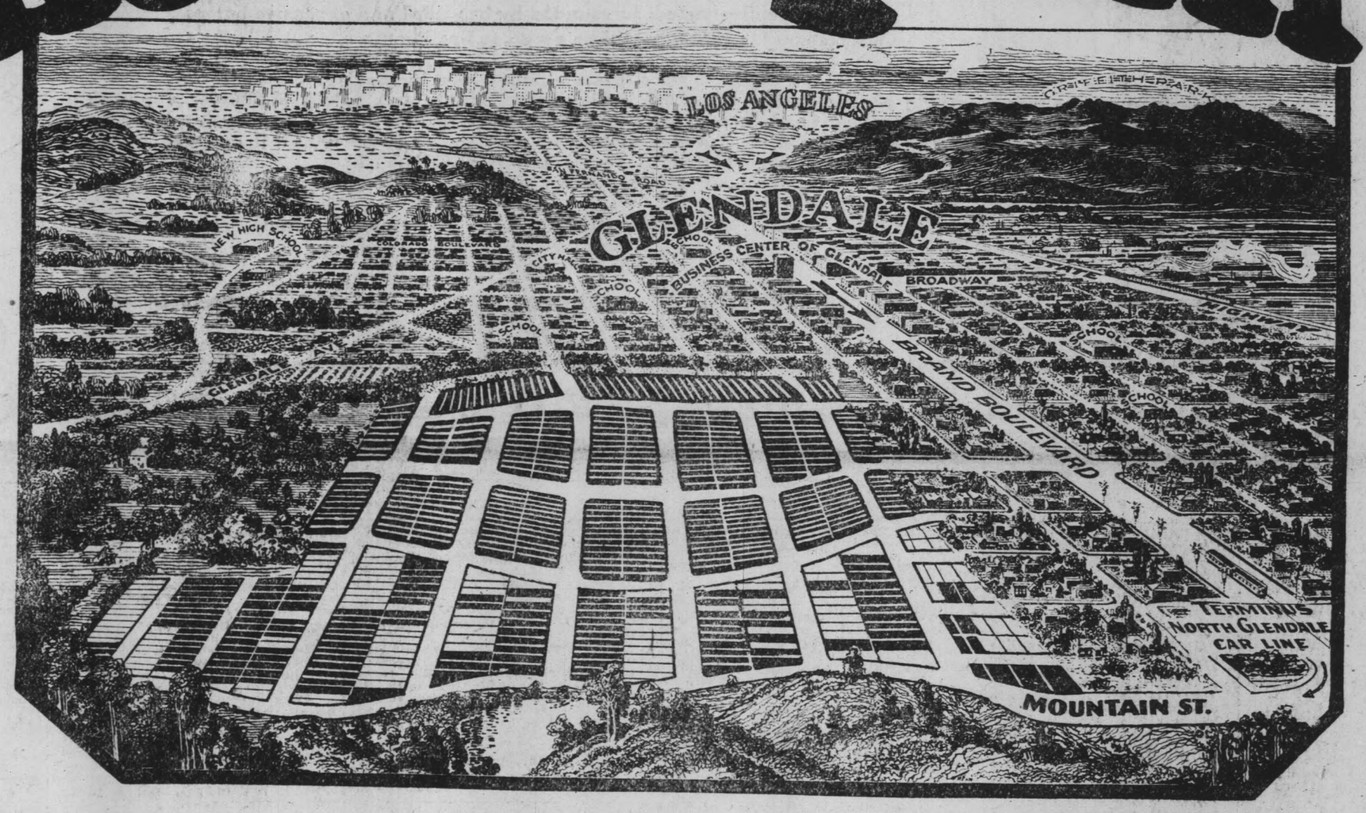
Announcing
to Glendale only
Clean up sale of
Bellehurst Park

Your last chance to buy Bellehurst Park lots



It's here TODAY—right at your door—the greatest real estate opportunity you have won! It will never come again—it can't last long—

It calls for IMMEDIATE ACTION!

For Bellehurst Park, the most magnificent and successful residential tract ever opened in Glendale, is nearly gone.

Just a handful of these beautiful level tree-clad lots remain unsold today—just a small part of the great old orchard-clad estate, still in our hands as a result of our own mistake in underestimating the record-breaking demand that gobbled up the entire first unit within six weeks of our opening day last Spring—a demand that would have eagerly taken these lots, too, if we had foreseen the rush and if our engineers could possibly have prepared them for sale at that time.

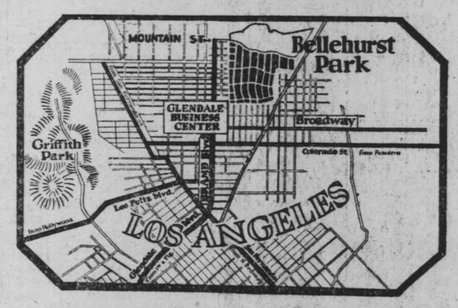
Since then, lot after lot in the beautiful elevated second unit has been sold. All Summer long a steady stream of buyers, until TODAY, right at the start of the MOST ACTIVE REAL ESTATE MARKET ever known in Southern California, we find ourselves with **LESS THAN 14%** of this great tract still in our hands.

Imagine the opportunity to you.

Beautiful tree-clad level lots with magnificent views, right in the finest elevated section of a 200-acre residential park with all city improvements almost completed and with more than 650 enthusiastic neighbors, many of whom are already starting to build, with values advancing faster and faster and yet still for sale to you at opening prices, lower than all surrounding values six months ago, doubly low today in view of the tremendous development of this central residential section of Glendale since that time.

You know Glendale's wonderful growth; you know this great tract in the heart and center of the city; we know that you will consider these few remaining Bellehurst Park lots the most sensational bargain you have ever known even in this magic community.

Come out at once before they all go; put everything else aside until you have secured your choice at CLEAN-UP PRICES, in the best tract in the fastest growing city in America.



BELLEHURST PARK
in the center of Glendale

BY AUTOMOBILE—Drive to Glendale via Los Feliz Boulevard, Glendale Boulevard, San Fernando Road or Colorado Boulevard until you reach Glendale's principal street, Brand Boluevard. Then turn north (toward the mountains) on **BRAND BOULEVARD** and continue through Glendale's business district to Mountain Street, then three short blocks to the right to Bellehurst Park.

BY PACIFIC ELECTRIC—Take **FRONT CAR** of **GLENDALE LINE TRAINS**, anywhere on 6th Street between Main and Figueroa. Get off at Mountain Street in Glendale and walk three short blocks East.

Tear this ad out and bring it with you, or if you prefer, telephone Glendale 3160 for a representative to call for you with a car.

MODERN LIFE IS JUST DOING THINGS

"What seems to me to grow fairer as life goes by is the love and grace and tenderness of it; not its wit and cleverness and grandeur of knowledge — grand as knowledge is—but just the laughter of children, and the friendship of friends, and the cosy talk by the fire, and the sight of flowers, and the sound of music."—Anon.

Is this a fair picture to the modern generation which rushes from one activity to another, to its work, to its lessons, its clubs, its amusements? Where can be found any cosy firesides or any gathering around the "family lamp" for an evening of reading?

We have a few professional thinkers whose brains are for sale to their government, their business associates, their church, or their lecture platform, but not many non-professional thinkers. They are too busy just doing things.

When grease has been spilled on the grass matting, cover the spot thickly with powdered chalk and moisten with a few drops of benzine. When this has evaporated brush off the chalk and the spot will have disappeared. Do not bring a light into the room until the benzine is thoroughly evaporated.

Columbus Girl, Chosen Again at Atlantic City as "Miss America," and Washington's 1921 Winner

Repeating her triumph of last year, Miss Mary Catherine Campbell, 17, of Columbus, Ohio, won the bathing beauty honors from 74 intercity competitors. She is the daughter of Mr. and Mrs. Herman Campbell. She has golden brown hair and is athletic. She is shown here (at left) with King Margaret Gorman of Washington, D. C., the "Miss America" of two years ago.

FLARING SKIRTS PAINTED FACES, FASHION SAYS

[By Associated Press]

LONDON, Sept. 22.—Smartly dressed women of the future must wear "flare" skirts, modified leg-of-mutton sleeves, well-defined waist- lines, and must make up in "doll" fashion, according to London fashion experts. The "doll" make-up consists of a dash of red high on each cheekbone, and another dash in the middle of the forehead. This gives the fair wearer the appearance of a Dutch doll.

Skirts of the coming season, the London fashion judges have decreed, shall be so made that when the wearer walks the skirt will fill out like a balloon, but when she stands in repose her draperies will enfold her as in a sheaf. The ultra-long skirts, so much in vogue during the last season, will be abandoned. The new circular "flare" skirts are shorter than those of last year.

With the return of the flare to the dress, the waist line, so long ignored by fashion, reasserts itself, and the effect produced by skirt draperies that flare is further accentuated by the tendency of the upper part of the dress, the blouse or corsage, to pouch slightly over the waist.

The leg-of-mutton sleeve, an old style in which the upper part is large and the wrist close fitting, has been brought back by some London dressmakers, and another effort to popularize the high collar is being made.

Olive green will be the predominant color this winter, say the fashion mentors, with an autumnal shade of brown as second favorite. Some dressmakers incline to soft Persian red and vivid hues. Extraordinary embroideries, landscape zoological, and carpet, according to choice, will, however, lighten up the browns and other more or less neutral colorings. An ornamental pond with swans and water-lilies and a background of rushes and trees, all worked in natural colorings, is not considered too flamboyant a decoration for some gowns.

Among the hats, big picture shapes, close-fitting toques, little Breton and tam-o-shanter shapes are among the most popular for the coming season. All hats will be worn well down on the head. The fashionable colors will be brown, chestnut and havana. Only trimmings are bright.

The new autumn and winter hats are made of moire, satin, panne, velvet, crepe de chine satin, and felt. They may be trimmed with ribbon, feathers, ostrich tips, long ostrich plumes or cocks' feathers that sweep the neck.

There will be much black millinery, brightened by trimmings of silver, gold and gay colors, but trimming will not be overdone. Neatness is a foremost quality of modern millinery, but it may develop into hardness, and then a veil or scarf of tulle, velvet or soft satin is a desirable corrective. Hats will not be light.

Chops can be baked in the oven on ironing day when it is desired to keep the top of the stove clean.

ABOUT FRIENDS

"Learn to greet your friends with a smile. They carry too many frowns in their own hearts to be bothered with yours."—Mary Allette Ayer.

"Friendship is the great luxury of life."—Edward Everett Hale.

CHRISTMAS GIFTS FOR WEALTHY FRIENDS

The most expensive confections on the market are candied fruit and the reason is not far to seek. The making of candied fruit is a pottering job which does not appeal to the average candy maker. To the skillful cook who has more time than money and who perhaps is already racking her brains to know how to provide Christmas gifts acceptable to rich relatives or friends without the money to buy them, the manufacturing of candied fruit offers an opportunity. Pears are well adapted to the purpose, as are also peaches and oranges, especially the kumquat or little orange. But par excellent for a confection of this sort is the fig. Following is a recipe:

Fruit which is to be candied should be washed, peeled and pared, then cut or sliced into small pieces. Drop fruit into boiling water for two or three minutes, drain well and cover with syrup made by boiling together one pound of sugar for each pound of fruit, with one cup of water. Boil fruit rapidly in this syrup for 15 minutes. Remove from fire and let stand over night. Repeat heating and cooling for four to six days, according to how rapidly the water is drawn out and the syrup absorbed. When the fruit is transparent and bright, lift from syrup and dry in sun or in cool oven.

Kyanize

Motor Car Enamels

Add value to your car

A Beautiful Weather and Waterproof Coating

For an afternoon of real accomplishment take a good brush and a can of *Kyanize* Motor Car Enamels. Off with the lid and give the old car a new dress.

The surface thoroughly cleaned, apply the smooth-flowing, creamy enamel just as it comes from the can.

Ten striking colors, ready to apply, each producing a sturdy weather-proof lustre that will not crack, chip or peel off.

No laps, ridges or brush marks. In forty-eight hours your car is ready for the road.

Free to Motorists: Our booklet, "How to Paint Your Automobile," with complete instructions will be given *free of charge* to any motorist who will call for it at the store named below. Get *your* copy today—it's FREE.

FASHION'S FREAKS

Knitted Dress for Autumn

The knitted dress is more popular than ever this fall and there are many new models to choose from. A smart little frock with more than a suggestion of autumn is made of brick red and beige knitted together to give a more subtle color. The dress is a one piece affair with a becoming little cape just across the back, and an interesting design from neck to hem in both back and front.

Quaint Earrings of Red Coral

A pair of the most unusual earrings are of red coral in the shape of long and slender urns with delicately carved wreaths. The effect is indescribably quaint.

Chinese Influence in Hats

The Chinese infuence is very strong in clothes this fall and the designers have shown much ingenuity in adapting it to modern wear. A hat of beige velvet is made upon the lines of a coolie hat and finished with a tassel of the same color. There is a band of unique embroidery around the edge.

Wool Burlap School Frocks

School frocks of much charm are made of a rough and ready material called wool burlap in a becoming green. They are finished with small collars and cuffs of tan linen. A novelty ribbon of blue and green is used in an unusual way upon the waist of one of these frocks. The threads of the burlap are drawn and the ribbon is threaded through and forms squares.

Little Poke for the Little Girl

Kate Greenway lives again in a little poke of brown taffeta that is trimmed with bands of brown velvet and one yellow chrysanthemum at the side. Nothing could be more delightful for the child of six or seven.

Attractive Nursery Lights

Surely any normal little child will love the nursery lights that are on sale at one of the shops. A wooden trumpet is brightly painted and finished with a small shield of white with a bar of music painted across the surface. Another is in the shape of a lighthouse and still another is a pot of funny leaves that has a large inverted flower to form the shade. The electric wiring is included with the lamp.

Crystal Chandeliers Coming Back

The old and stately chandeliers of crystal are having a revival. One of the shops is showing novel lamp shades and chandelier shades of chiffon and festoons of cut crystal. These crystal or cut glass ornaments can be bought separately

For the Nursery Tea Party

The nursery tea party for one's best beloved dolls can be strictly up to date if one uses a white and blue tea cart with a glass try and a gayly painted picture of Jack Horner underneath the glass. These toy tea wagons come in white and blue and cream and blue.

A beautiful little table especially designed to take care of the precious bibelots that one hates to put away and which are not safe when left lying about upon tables, is round and finished with a glass top. Inside there is a deep depression that is lined with velvet and makes an excellent background for small objects. The table is of the Louis 16th period.

RETURN TO FAVOR BLACK SATIN GOWN

Never long absent from fashion's ranks, the frock of black satin has returned. Everywhere one sees it worn by the smartest women and in each shop is displayed a collection of gowns of varying degrees of simplicity or elaborateness. These qualities, of course, being dependent upon the type of frock and the occasion for which it is intended.

Those designed for street wear are amazingly chic, fashioned upon lines of infinite grace, and with their long tight sleeves they are a refreshing change from the ubiquitous sleeveless frock.

Far from being old or too sombre in appearance, the black frocks of the new season are delightfully youthful with their coquettish frills of lace at the sleeves and their collars or tiny gilets and guimpes.

One has only to watch a parade of mannequins at a fashionable modiste or shop to quickly discover that for the present at least flounces are an important feature of the most interesting models. They are pleated or gathered, set straight across the skirt or arranged to give a diagonal line. And there is more than a circular suggestion in many. Sometimes they extend all the way around. In just as many instances they reach around toward the back but do not meet, thus leaving quite a space unbroken from neck to hem.

An extremely good model for immediate wear is sketched. This is fashioned of heavy satin finished crepe and has a long basqus wrinkled about the waist. The collar of exquisite Irish lace is narrow in front but shaped to extend in points down the back. It is tied at the back of the neck with black velvet ribbons. A narrow frill of lace finishes each sleeve.

ALL AROUND THE HOUSE

Next to husband children the interest of women in general centers in their homes and first of all in their houses.

To maintain a perpetual interest and zest these should not be unchanging in decorations and furnishings. An old house may be made to have the effect of an altogether new one by redecorating and refurnishing. But even when such wholesale, sweeping treatment is not resorted to an innovation now and then to keep pace with the rest of the world is very stimulating.

Following are a few suggestions for all around the house:

The vogue of colored shades and curtains in adding richness or carrying out a decorative effect is now practiced extensively and has led to the creation of an infinite variety of schemes. The psychology of color is evident. If the natural light of a room is cold or dreary, thin curtains in a yellow or golden tone and a harmonizing translucent window shade of light tint will enliven the entire atmosphere of the room. Rose tints will lend warmth and coziness to a room. On the other hand, if the window openings are of such expanse as to give prohibitive intrudence of light, then cool greens or lavenders or blues in opaque shades and drapes will modify and soften the effect with very pleasing results.

In order to satisfy a man, give him what he thinks he wants.

Special for Monday only at $4.45

Calfskin Sandles at $3.50
In all colors and sizes. See them.

STREET CLOTHES EXHIBIT MORE FORMALITY

In its newest version the street frock of navy blue is, if anything, smarter than ever. It has all the practical qualities of the old blue serge dress, but is given greater charm and decidedly more originality by the various materials used in its development. One sees the most alluring models fashioned of repcloth, of twill and of the new supple material called charmeen. Then there are stunning frocks of knitted fabrics designed for country wear. They are as becoming as they are smart.

There is a most ingratiating formality about the street clothes of autumn. After a summer—when color and sleeveless effects prevailed—one welcomes the sophisticated primness of long tight sleeves and slender trim lines.

On many of these new models a touch of bright color is introduced in a most subtle fashion, while others are given character by an adroit use of black braid or of buttons.

For street wear in early fall nothing could be a wiser selection than a frock modeled on the one sketched.

It is made of midnight blue charmeen cut on the lines of a coat. For decoration there are flat self-covered buttons edged with a bit of silver.

The cape which extends just across the back is lined with grey crepe. A belt of grey suede carries out the color scheme.

Cleopatra was testing certain liquids. As each slave's name was called a drink was passed and he drank it. Some cut curious capers, others rolled on the floor. As they rolled Cleopatra surveyed them thoughtfully. The wise men were sent for, stood around and looked wise. Tradition has handed down to us this scene, and you have doubtless seen pictures of it.

Cleopatra shook her head.

"No," said the queen; I don't think I want any more stuff from this bootlegger."

A LECTURE ON CHRISTIAN SCIENCE

Entitled

CHRISTIAN SCIENCE APPLIED TO MANKIND

By

A. Hervey-Bathurst, C. S. B,

Member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

"To those leaning on the sustaining infinite, today is big with blessings." With these words Mary Baker Eddy, the Discoverer and Founder of Christian Science, commences the preface to her textbook, "Science and Health with Key to the Scriptures," and the presence of this audience affords sufficient proof that these blessings have come, and still continue to come, into the experience of those who are students of this vast subject upon which it is my privilege to speak to you today.

THE DISCOVERER AND FOUNDER

It is not only interesting, but it is gratifying to notice how mankind is awakening to appreciate Mrs. Eddy and the movement she founded—a movement which, in less than fifty years, has encircled the globe.

In the year 1866 Mrs. Eddy made the discovery which she named "Christian Science." It came about as the result of her instantaneous recovery from the effects of a severe accident which the physicians had declared must terminate fatally. Mrs. Eddy had always been a deep and constant student of the scriptures, and it was therefore natural that, in her extremity, she should turn to the Bible. It was then she proved, through her instantaneous recovery to perfect health, that the method of healing taught and demonstrated by Christ Jesus was the natural fulfillment of divine law—a law just as operative and consequently just as available in this age as it was nineteen hundred years ago.

For three years after making her discovery Mrs. Eddy studied the Scriptures and the Scriptures only, and proved, by healing a large number of cases—many of them pronounced incurable by the physicians—that she had discovered the scientific rules whereby the sick had been healed, the sorrowing comforted, and the sinner reformed nineteen hundred years previously by Christ Jesus and his disciples. The result of her devoted and consecrated study of the Bible was her publication in 1875 of "Science and Health with Key to the Scriptures," the Christian Science textbook, upon which every Christian Scientist depends for his enlightenment and guidance.

HEALING.

On page 2 of "Rudimental Divine Science," by Mrs. Eddy, we read: "Healing physical sickness is the smallest part of Christian Science. It is only the bugle-call to thought and action in the higher range of infinite goodness." Nevertheless, the great majority of people turn to Christian Science because they have failed to find relief from physical suffering, in spite of having tried many of the innumerable material methods and remedies practiced or advertised today. Were I to ask you what you think the world is most in need of at this moment, you would probably reply, "Good health." Think for an instant and you will realize how great a proportion of the conversation one hears is on the subject of health, or rather ill-health. Now, Christian Science shows us, not only how we have a right to, and can obtain, good health, but how we can retain it.

Broadly speaking, there is, and I think you will agree, no difference between what mankind needed in Jesus' time and what mankind needs today. The remedy also is exactly the same now as it was then. Was there not sickness and suffering in Jesus' time? Was there not also envy, hatred, malice, dishonesty, deceit? Were not exactly the same conditions or claims of evil apparent among men in those days that we see today? And were not all these conditions healed by Christ Jesus and his disciples? Did not the Master reveal the only remedy, and is there not abundant proof that the remedy was successful? Why, then, was that remedy ever dropped, and others substituted which have failed of success? Is it not time that the practical nature of Christianity, as it is demonstrated by Christian Science, be universally recognized?

Do not think, however, that Christian Science is merely a system of physical healing. Indescribable wonderful as is the experience of physical healing which it brings, it is a small thing when compared to the spiritual regeneration which is inseparable from its physical healing.

The question which naturally arises at this point is, How is physical healing brought about by Christian Science treatment, and without drugs or recourse to materia medica? To find the answer to this question we must go back about two thousand years when the humble Nazarene declared that he had not come to destroy but to fulfill the law and the prophets. He showed that the fulfilling of God's law consisted in the healing of sickness and the destruction of sin, sorrow, fear and all discord, through the correct concept of God and man.

Remember also that Jesus not only healed the sick and accomplished all his other works alone with God, but taught his disciples to do likewise, and it is sufficiently clear from the New Testament history how successful they were.

Let us consider this question for a moment. I believe you will agree that the law of God, which Jesus fulfilled, has not changed. If, therefore, it was not in accordance with the law of God nineteen hundred years ago that a man should be sick or bound by sin and the understanding of the law of God at that time healed the sick and reformed the sinner, surely the understanding of that same law will accomplish similar results today. In order that we may understand the law of God, we must, however, first understand God. Before we can understand God, we must desire and be willing to learn—be willing to pray in the words of the Psalmist, "Shew me thy ways, O Lord; teach me thy paths. Lead me in thy truth, and teach me."

The healing through Christian Science is brought about through spiritual understanding, or the knowledge of the truth. Just as the knowledge of the fact that three times three are nine corrects the mistake of some child who says three times three are eleven, so the knowledge of the truth about man in his relation to God will heal the mistaken belief that man is separated from God or can suffer from some physical trouble.

Mrs. Eddy writes in Science and Health (p. 467): "We reason imperfectly from effect to cause, when we conclude that matter is the effect of Spirit; but a priori reasoning shows material existence to be enigmatical." Christian Science teaches and proves, therefore, that truth or reality can only be attained, or the healing accomplished, to the extent that we are clear as to what cause is, and therefore as to what effect is. How do you think Jesus and his disciples healed the sick and did the many other mighty works? Did Jesus accept as true what the physical senses were arguing? He understood the unity of God and man. He recognized man's birthright, his true heritage—his likeness to his heavenly Father—and he likewise knew that no arguments or suggestions of the carnal or mortal mind could prevent him from fulfilling God's law, or demonstrating or proving what he knew. It was the true or exact knowledge of God and His creation, or cause and effect, which enabled Jesus to fulfill his mission and rouse a dormant world from the mesmeric belief that man is a hopeless sufferer, subject to circumstance, buffeted by evil, controlled by sickness, sorrow, death.

THE WORKS MUST BE DONE

The question here arises, Are not we, you and I, and not only all Christian Scientists but all Christians to heal the sick and do the other works that Jesus and his disciples did? The answer is most emphatically, Yes. Did not Jesus say, "He that believeth on me, the works that I do shall he do also?" Now, the day when people were willing to accept blindly whatever was told them, whether from the pulpit or anywhere else, is past. This is said to be essentially a practical age; therefore people are demanding proof rather than mere statement, practice rather than theory. This is why so many, in the hour of misery, disappointment, or sickness, turn to Christian Science. They know perhaps of friends who have been comforted, or healed of some serious physical trouble through Christian Science treatment, and so have been given a practical understanding of God as a very present help at all times and under all circumstances.

This is why there are so many Christian Scientists today—why so many Christian Science churches are springing up all over the world—because the understanding of Christian Science includes the recognition or proof of the powerlessness of evil, and necessarily means the destruction, removal or healing of discord.

Why, it may be asked, is any one ever ill, if evil is powerless? Not because they like it? Rather is sickness the result of fear, perhaps an unconscious fear, or a universal false belief. It will be found that fear is practically at the bottom of all difficulties and is the origin of nearly every discordant condition, whether manifested in the form of sickness; discord in the home or the community; strife between political parties; disagreements between statesmen; international difficulties, or their possible outcome, war.

By revealing God as the one creator or the great First Cause, fear, this bugbear of mankind, is destroyed and so proved to be powerless. In Christian Science we learn to reason correctly. We begin to understand causation, and consequently gain a true concept of creation or affect. But in order to perceive the metaphysical facts revealed by Christian Science, we must have a genuine desire for Truth; and faith or spiritual understanding. "Faith," the Apostle Paul wrote, "is the substance of things hoped for, the evidence of things not seen." That is the faith we need,—a faith as simple and trustful as that of a little child.

In speaking on this matter, I will assume that we all accept the following, which is one of the tenets of Christian Science: "As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life" (Science and Health, p. 497).

GOD

Perhaps the most familiar reference to God in the Bible is that wonderful statement, I John 4:8, "God is love." Yet how many people still look upon God with fear, and still feel that any reference to the Deity must be made with bated breath. Is it logical, I would ask you, is it practical, to fear Love? How few people realize that God is the greatest, the best friend they have, the best guide, adviser, and comforter. The prophet Jeremiah wrote: "Am I a God at hand, saith the Lord, and not a God afar off? Can any hide himself in secret places that I shall not see him? saith the Lord. Do not I fill heaven and earth? saith the Lord."

The beloved disciple stated clearly that God is Love, and Jeremiah indicates with equal clearness the omnipresence, or all-presence, of God. Is it not logical, then, to state that a correct understanding of God includes the recognition and demonstration of the omnipresence of divine Love? And does it not inevitably follow that such an understanding must finally eliminate the belief in hate? Let us amplify this statement. Picture to yourself a locality where no one is hating, no one is feeling even uncharitably toward his neighbor. Would not the happiness of those individuals be assured in such circumstances? Would it not mean for them the elimination of misery? And if a sufficient number of individuals ceased entertaining any thought of hatred through their recognition of the omnipresence of divine Love, would it not mean the overcoming of strife, the end of war,—war or conflict between individuals, between communities, between nations?

Therefore through a Christianly scientific or demonstrable understanding of God, attained through Christian Science, we get rid of what might be described as the basic error or the carnal mind as St. Paul calls it, or mortal mind as Mrs. Eddy defines it.

Christian Science supplies a satisfying, scientific, and therefore practical answer to the question, What is God? On page 587 of Science and Health, Mrs. Eddy gives the following definition of God: "The great I am; the all-knowing all-seeing, all-acting, all-wise, all-loving, and eternal; Principle; Mind; Soul; Spirit; Life; Truth; Love; all substance; intelligence."

Perhaps the synonym for God most frequently used in Mrs. Eddy's writings is "divine Mind," defining the "all-knowing, all-seeing," ever present God, or good. Could the great First Cause or creator be unintelligent or less than intelligent? Surely not. Can intelligence be better defined than by the term "Mind?" And could you conceive God inactive or unconscious or less than all-knowing, or omniscient? What better term, then could be used than "divine Mind" to define God, the omnipotent, omnipresent, omniscient good? If not all, doubtless the majority of us here, accept the usual definitions of God as Love, Spirit, to be holy, all-powerful, and ever present. You believe that God is omnipotent; that is what Christian Science teaches. Christian Science also teaches that God is Love, Spirit. Therefore the teaching of Christian Science is not in conflict with what you believe about God; on the contrary, it is based upon it, or agrees with it. Therefore that there is but one God, one cause or creator, we all agree. Consequently, there is but one divine Mind, knowing all,—all-inclusive,—and the effect of the great First Cause or creator must be like it, for does not like invariably produce like? We see, then, that this one and only cause could not create anything, or could not be expressed or reflected in anything, unlike itself. Therefore we have a perfect God or creator; perfect cause and perfect effect, manifestation or creation, including man.

SALVATION FROM EVIL.

Since this is true, the opposite must be false or untrue. What is the opposite? It is the belief that God causes sin, sickness, evil, and death, and that His universe, including man is liable to express these discordant conditions. Now this belief (and please note that I use the word "belief") is untrue, and Christian Science affords the only way of salvation from this mistaken belief. Think, then, what such a message must mean to the invalid who has turned to Christian Science for healing. Many of you have doubtless experienced the indescribable joy that comes with that message, that it is not God's purpose you should suffer and you need no longer be limited by an opposite and false belief. Hope begins at once to spring forth with the result that every Christian Science practitioner knows so well.

You will remember that St. Paul says in his epistle to the Romans 8:6, "The carnal mind is enmity against God." He went even further than that when he said, "To be carnally minded" (or, as the Revised Version has it, "the mind of the flesh") "is death; but to be spiritually minded" (or "the mind of Spirit") "is life and peace." It is, then, the carnal or mortal mind that declares sin and sickness to be true. The less therefore, we have to do with the carnal mind or the flesh, the better.

The first step, then, is to refuse to believe the testimony of the carnal mind, refuse to accept the arguments of sin, sickness, discord, death, which emanate from this so-called mind. St. Paul shows us how we can do this when he says, "Whilst we are at home in the body, we are absent from the Lord." The way, therefore, is as he further states, "to be absent from the body, and to be present with the Lord." In other words, it is to understand and prove that the one divine Mind, God, is omnipresent and omnipotent.

TESTIMONY OF PHYSICAL SENSES UNRELIABLE

How you may say, can you expect me to reject what the physical senses say? To such a query I would reply: Are yon not already doing that every day? I need quote but the familiar illustration of the sun appearing to travel across the sky from east to west, whereas, you know it is the earth which is revolving. So, then, astronomy has revealed the unreliability of the physical senses with regard to the sun; but Christian Science has shown us how this unreliability is very much more far-reaching than would at first appear to be the case.

Christian Science shows that the belief that man need sin, suffer, or be controlled by sickness, vice, or any form of discord, is a mistaken or false belief. A false belief or a mistake can only be corrected by the knowledge of the truth. It is, then, the truth about God and man demonstrated, that corrects these mistaken beliefs. Jesus said, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." No man is "free" so long as he is bound by sickness or sin or fear and the freedom from the bondage of sickness, sin, fear and all discord is the healing which is so widely recognized throughout the world today—the healing by Christian Science treatment through the understanding and demonstration of the truth about God and man.

If, then, Christian Science brings to mankind the fulfillment of this promise of deliverance from all the ills the "flesh is heir to," is it not surprising that there should be nt surprising that there should be opposition to, or even reluctance to accept the teachings of Christian Science?

SIMPLICITY OF CHRISTIAN SCIENCE

While I would emphasize the simplicity of Christian Science, I would remind you that Christian Science affords no exception to the rule that anything worth having is worth making an effort to acquire. Some one here may be familiar with the remark, "I don't understand Mrs. Eddy's book. I cannot apply what she teaches." To such an one I would say that Christian Science is as simple as primitive Christianity; in fact, it is primitive Christianity, rediscovered or given back to us in such a manner that all can again understand and practice it, and if we will but persevere we will certainly succeed. You need only have a degree of honesty sufficient to enable you to accept and practise what alone will regenerate you and all mankind. Mrs. Eddy defines, in the Christian Science textbook, honesty to be "spiritual power," and the student who is honest with himself or herself will most certainly succeed ventually. The fact is, we must love God, love Truth for Truth's sake, and not merely turn to God from the selfish motive of desiring more ease in the senses, or merely freedom from some physical trouble.

As you begin to take in, through practical application of them, the teachings of Science and Health you realize that a transformation or reformation is taking place. A new light is dawning, and you feel and declare, in the words of St. Paul, "Behold, all things are become new." Why? Because you are being "born again;" because you are beginning to recognize the truth about God, man and the universe; because you are beginning to understand that God is indeed at hand, here and now, with you, "a very present help;" that man, created by God, is the image of God or Godlike; that man is not separated from God, but is now at-one with his Father-Mother, God.

You are beginning to understand, also, that it is not necessary for man to implore and beseech God to do something He has not done. In recognizing the truth, we begin to see that the statement of the perfection of God's creation, found in the first chapter of Genesis, is not only true but demonstrable.

PRAYER

This brings us to the question of prayer. What is prayer? In my experience, as it is in the experience of innumerable others, one of the greatest blessings and revelations of Christian Science is the understanding of how to pray aright. You may say, What is there to pray about if God, Principle, or divine Mind, is infinite, all, and man is His expression? The answer is, Just so long as there is any belief in the presence, power, or effect of evil, will it be necessary to "pray without ceasing." Prayer is not only the desire for the knowledge of the truth, but it also exemplifies or demonstrates it. For example, suppose you understand something about Christian Science, and have demonstrated the truth of what you understand by healing yourself or others of some physical troubles. Some one then comes to you and says, I am suffering and I want you to help me—to give me a Christian Science treatment. You have learned at least something of the truth regarding God and man, and by reason of your knowledge, you can prove or demonstrate it. In asking for treatment, the patient is reaching out for Truth. His honest desire is prayer, but it is probably rather along the lines of blind faith. The Christian Science treatment given by the Christian Science practitioner would be prayer based upon understanding—the understanding or knowledge of the truth about man as the reflection of God. That knowledge of the truth frees, because it destroys the erroneous or false belief about man and the patient is healed.

Desiring, recognizing, accepting, and affirming these divine facts about God, man, and the universe constitutes prayer:

Pray'r is the heart's sincere desire,
Uttered or unexpressed;
The motion of a hidden fire
That trembles in the breast.

Pray'r is the simplest form of speech,
That infant lips can try;
Pray'r the sublimest strains that reach
The Majesty on high.

Pray'r is the Christian's vital breath,
The Christian's native air;
His watchword overcometh death
He enters heav'n with pray'r.
(Christian Science Hymnal, p 91.)

Such prayer is answered. Why? Because the old, false beliefs, refuted by the knowledge and affirmation of the truth, die of their own inanition, and that which we declare to be real is proved to be a present actuality, and God's will is done—"in earth, as it is in heaven."

In this way, through Christian Science, we learn and prove that man has dominion,—dominion over all the earth, over all that is unlike God.

AVAILABILITY OF CHRISTIAN SCIENCE

Can you imagine a greater privilege, a greater blessing, than to be able to go to some sufferer who has appealed to you for Christian Science treatment—can there be any more glorious privilege than to be able to say to such an one: Fear not, our Father is indeed a God at hand and not afar off, a very present help in trouble? The same God who healed the sick, comforted the sorrowing and raised the dead through Christ Jesus nearly two thousand years ago, is doing the same today.

Did not Jesus Christ and his disciples not only teach but demonstrate the healing that is the inevitable outcome of a correct understanding of God? That same teaching is as available and as demonstrable today as it was then, and it is consequently just as much within your reach now as it was available for the man let down through the roof on his couch, or the woman "whom Satan hath bound," or the man with the withered hand.

The Christian Science practitioner having a reason for the faith that is within him, can speak with authority—the authority born of experience, and the patient being receptive, or desirous of the truth, is healed; for, in those grand words of Whittier:

The healing of the seamless dress
Is by our beds of pain;
We touch Him in life's throng and press,
And we are whole again.

MESMERISM, SPIRITUALISM, AND SO FORTH, FOREIGN TO CHRISTIAN SCIENCE

The healing through Christian Science is brought about, then, through a correct, scientific, or demonstrable understanding of God, or divine Mind. Therefore Christian Science is the true Mind-healing, and has nothing whatever to do with the manipulation of the human or mortal mind. There is nothing in the nature of mesmerism, hypnotism, spiritualism, or any other "ism" in Christian Science. No Christian Scientist could adopt such methods. Were he to attempt to do so, he could no longer practice Christian Science, for he would be attempting to work from a basis, that is not a true basis, and would sooner or later awake to realize this. At the same time, history has a way of trying to repeat itself, and just as Jesus was accused of casting out devils by Beelzebub, so Christian Scientists today are accused sometimes of working with mesmerism, or in some way which is really the absolute antithesis of Christian Science.

I have heard it said, You must have a very highly trained brain or an unusually fine intellect to be able to be a Christian Scientist. What a misunderstanding of the simplicity and purity of Christian Science that shows. Did not Jesus say, "I thank thee, O Father, Lord of heaven and earth, because thou hast hid these things from the wise and prudent, and hast revealed them unto babes."

Also, it is well to remember that the first people to hear and accept the teaching of the Master were the humble fishermen, who could not scarcely be classed as highly educated. Let me add also, that with all its simplicity, Christian Science is the greatest thing in the world, for it reveals the truth, the facts of being. There is not a moment when Christian Science cannot be practiced; there is not a place where the truth cannot be demonstrated; there is no problem however small—however great—that Christian Science will not solve. It is your privilege to commence, from this very moment to practice what you now understand of Christian Science, by refusing to be party to or accept a lie, or whatever is not true with regard to God, man and the universe. You will be as gratified by as you will be grateful for the wonderful blessings that you will reap as the result of your honest efforts. Through Christian Science we begin to recognize reality; we change nothing, but we get rid of false concepts. We stop deceiving ourselves or allowing ourselves to be deceived. In other words, we begin to find heaven, not a distant far off place, but here at hand, or heaven on earth, for we begin to understand what Jesus meant when he said, "The kingdom of God is within you." (Luke 17:21).

IMPORTANCE OF LOVING OUR NEIGHBOR

With this new birth, this awakening to see the powerless of evil, think how we can begin intelligently to fulfill our duty towards our neighbor, especially perhaps, in connection with the social and labor unrest, and other similar problems with which we are all familiar. Does not Christian Science afford the solution—the only solution—for are we not beginning to see, through Christian Science, how the universal brotherhood of man is no longer a dream, perhaps never to be realized but a present possibility, may I not say, reality? Let us no longer limit the power of God, or good. Suppose we go from here and hear some one enlarging upon the illness of some one else, or complaining because of bad times which they declare are leading to financial disaster. Cannot we commence at once to apply the remedy by refusing to admit that God, the loving Father, ever gave authority to evil? Then as we persist in practicing this right thinking, this acknowledgement of God's omnipresence and omnipotence, we shall witness wonderful results, for Truth is power; error is impotence and cannot stand.

Take also the daily newspapers. You read them, or should do so, intelligently, and you already know how much better off the public would be if a great deal of what is printed had never been published. The press or journalism is, therefore, in need of transformation, and you begin immediately to help along these lines. So take your daily newspaper and read it henceforth, first with a great desire to help mankind, and, secondly with a clear concept of the power of right thinking.

THE CHRIST REVEALED THROUGH CHRISTIAN SCIENCE

Is not the recognition and demonstration of the presence of God, which is made possible through Christian Science, a wonderful experience? Is it not indeed the "new birth?" Jesus said, "I will pray the Father, and he shall give you another Comforter, that he may abide with you forever; even the Spirit of truth." He said also, "But when the Comforter is come, whom I will send unto you from the Father, even the Spirit of truth which proceedeth from the Father, he shall testify of me."

Now Christian Science, or the knowledge of Christ, Truth, is surely testifying of Jesus the Christ. This awakening to the recognition of the facts of being is the coming of the Christ, which Mrs. Eddy defines as "the divine manifestation of God, which comes to the flesh to destroy incarnate error" (Science and Health, p. 583). It is the recognition of what Jesus referred to when he said, "Before Abraham was, I am." That was his true spiritual self-hood. Then, since Jesus, who revealed the Christ, is the Wayshower, have not we also to demonstrate our divine sonship, our true spiritual selfhood? And is not Christian Science showing us how to do it—how to "have the mind of Christ," as the Apostle enjoins us? And as we recognize the Christ, Truth, the Christ is again made manifest in the flesh through the healing of sickness and the destruction of sin, the Comforter taking away the sins of the world. And yet the carnal or mortal mind is still poosed to the Christ, as it was opposed to Jesus. Today, however, the Christ may be rejected by some; but the final revelation of Truth has come, and the day is hastening on when, as we was prophesied by Isaiah, "they shall all know me (God), from the least of them unto the greatest."

That knowledge constitutes the atonement or at-one-ment, or unity of Father and son, God and man. It does away with the unfortunate teaching of man being a "miserable sinner," it revals man's true nature, and shows him how to avail himself of his God-given birthright, his divine sonship. It shows man how to be, what he really is, what God made him, and shows the foolishness of his believing in what he is not.

St. John declares, "Now are we the sons of God." Now, not some day. We have therefore to wake up and learn to demonstrate what we really are, the image and likeness of God, the expression or reflection of divine Mind, expressing the love, power, joy, freedom, and satisfaction which are inseparable from God.

I know no language that can adequately describe the peace and happiness that come with this awakening. It is what occurred to the prodigal son who "came to himself," gave up feeding on the empty husks of materiality, the belief of pleasure and, equally, of pain in the senses or matter, and went to his Father, took up again, or recognized his true sonship, and was welcomed while he was a long way off.

That experience has been the experience of thousands of men and women who today owe all to Christian Science, for through its teachings they have found God, have found themselves as children of God, have proved the hollowness and emptiness of the false beliefs and delusions of the lies of the carnal mind, and met with a welcome and found a present sense of heaven far beyond anything they had ever imagined possible.

CHRISTIAN SCIENCE THE WAY OF SALVATION

Christian Science, then, is a tree known by its fruits. Truth is invariable, unalterable—can never change. Is Christian Science the way of salvation? It is. I can give that affirmative answer with conviction and joy—as the result of experience.

Did not Jesus say, "The kingdom of heaven is within you?" Every student of Christian Science is demonstrating this divine fact in the measure that he discerns it.

Since Christian Science is the way of salvation, the final revelation of Truth, should we delay to walk in that way that has been so clearly pointed out by that great and good woman, Mary Baker Eddy, who was sufficiently awake and alert, spiritually to discern the truth and the practical, scientific way of practicing it?

In our household affairs, in our business, and in whatever may be our profession, we are practical enough—most of us. Why, then, where our religion is concerned, should we be satisfied with what we do not understand or by what does not afford definite and practical proof of its efficacy?

With the first insight into this great subject we begin to recognize and reject the claims of evil more readily. We think less of evil, we begin to understand what God is, what man is in his relation to God, what we are. Then we begin to recognize who our neighbor is, and we awake to the fact that his true self is just as Godlike, or is our own real self, then we find no difficulty in loving our neighbor as ourself. But how can we do so, so long as we do not know, have not yet found, ourself?

Now every one of us in this hall knows more of God, His omnipotence and omnipresence, than we did an hour ago. Every one of us can commence, from this moment, to benefit by that knowledge and put it into practice. Don't think you have to wait. Then, with the success that will attend your every effort, you will be able to repeat or sing with the fervor and gratitude born of actual experience those beautiful words of Mrs. Eddy's Communion hymn:

"Saw ye my Savior- Heard ye the glad sound?
Felt ye the pow'r of the Word?
'Twas the Truth that made us free,
And was found by you and me
In the life and the love of our Lord."

Christian Science is primitive Christianity rediscovered and revealed to this age. It shows mankind the savior from all the ills the "flesh is heir to" by revealing the true or practical nature of God, and consequently of man in His image and likeness. Christian Science reveals the truth which the Founder of Christianity declared "shall make you free," and the knowledge of the truth about God and man affords the solution of all the problems with which mankind may be faced. The understanding of Christian Science reveals the presence and power of God, or good, not only where health is concerned but also with respect to the innumerable questions with which mankind is coping today, whether financial, labor, social, political, national, or international. Above all, Christian Science is preeminently simple and, as was indicated in an earlier part of this lecture, the demonstration of the teachings of Christian Science depends mainly upon the willingness of the student to recognize or understand the great First Cause, or God, to be Spirit, and His creation, including man, to be spiritual.

In conclusion I will read these words from page [illegible] of the Christian Science textbook: "The prophet of today beholds in the mental horizon the sign of these times, the reappearance of the Christianity which heals the sick and destroys error, and no other sign shall be given. Body cannot be saved except through Mind. . . . Beyond the frail premises of human beliefs, above the loosening grasp of creeds, the demonstration of Christian Mind-healing stands revealed and practical Science. It is imperious throughout all ages as Christ's revelation of Truth, of Life, and of Love, which remains inviolate for every man to understand and to practise."

FARMER-BANKER CONFERENCES THROUGHOUT NATION DEVELOP WAYS TO AID AGRICULTURE

Collective Marketing, Diversified Farming, Promotion of Agricultural Education and Use of Bank Instead of Mercantile Credits Chief Lines of Suggested Action.

By D. H. OTIS,

Director, Agricultural Commission, American Bankers Association.

D. H. Otis

Four lines of action to improve the business of farming stand out in the discussions that have occurred at a series of farmer-banker conferences now being held throughout the United States. They are collective marketing, diversified farming, the promotion of agricultural education and the use of the more economical bank credit rather than mercantile credit. At many points active steps to foster action along these lines have been taken.

The conferences were initiated by the Agricultural Commission of the American Bankers Association to the end that the condition of the man on the farm be improved. The first conference was held in conjunction with the Wisconsin College of Agriculture at Madison. An important point of contact for the work of the Commission was established at this meeting in the form of co-operation with the agricultural colleges.

In five other states—California, Washington, Oregon, Idaho, and Utah—it was agreed at subsequent conferences that bankers' agricultural committees would meet at the state agricultural colleges and, in co-operation with the college officials, work out a program that they would recommend to the banks.

The Texas Plan

It was at the Texas conference that it was developed that the officials of both the bankers' association and of the state college felt the big problem for that state was the establishment of a system of collective, orderly marketing. In order to bring this problem effectively before the farmers and bankers it was agreed to hold a banker-farmer meeting in December. Efforts will be made to get from 200 to 250 bankers to attend, each banker to bring with him several representative farmers of his community. The program and demonstration will emphasize the need of meeting the marketing problem and point ways to a satisfactory solution.

At Athens, Georgia, the conference recommended that the State Bankers Association take steps to raise a fund for assisting deserving students to complete a college course in agriculture or home economics. This conference, recognizing the valuable work being done by county agricultural and home demonstration agents, also went on record as favoring the employment of agents in each county.

At the Raleigh, North Carolina, conference the pressing problem, in addition to loans for worthy students, was held to be encouragement of the farmer to practice greater crop diversification. The conferees felt that the first big step was to get farmers at least to produce sufficient vegetables, fruit, milk, meat and poultry to live on. Many farmers, it was brought out, now depend entirely on the cotton crop, and buy the products named for their own tables.

More Economical Credit

At the conference at Ithaca, N. Y., those participating felt that a better understanding between farmers and bankers would be beneficial to both. At present a large amount of the credit used by farmers is in the form of mercantile credit, which, it was pointed out, is much more expensive for them than bank credit. It was felt that a campaign of education is needed to acquaint farmers with banking facilities. The conference, therefore, recommended that the Agricultural Committee of the State Bankers Association, the agricultural college and representatives of the Farm Bureau and the State Grange get together for the purpose of working out programs and plans for further meetings to be held in the various counties of the state.

At a conference held at Amherst, Massachusetts, there were representatives from Vermont, New Hampshire, Massachusetts, Rhode Island and Connecticut. Emphasis was placed on the importance of the Boys' and Girls' Club work. The New England conference also felt that the importance of bank credit over mercantile credit should be stressed. A resolution was adopted and is being sent to agricultural committees in each State urging that they get in touch with their agricultural colleges and map out a program for educating the farmer in regard to the importance and the economy of bank credit over mercantile credit.

The emphasis on this resolution came not so much from the bankers present as it did from the representatives of the agricultural colleges and the farmers.

GLENDALE, CALIFORNIA, SATURDAY, SEPTEMBER 22, 1923

GLENDALIANS GIVEN FIRST CHANCE IN CLOSING-OUT SALE

NEW JEWETT MODEL IS EXHIBITED TO MOTOR FANS IN AND AROUND GLENDALE

Advance Showing of the Latest Output of the Jewett Factory Takes the Motor Enthusiasts by Storm—The Car's a Beauty

LATEST OFFERING IS REAL UTILITY CAR

All Refinements of Jewett Line—and Some Others—Are Included in This New "Dream Car"—It Is "Ace High" With the Most Exacting

There's a dream car in Glendale.

The new Jewett brougham is here.

The advance showing of the classy 5-passenger Jewett brougham, the very latest production of the Jewett manufacturers, is now being given to the discriminating automobile buyers of Glendale and the surrounding territory, at the headquarters of Ralph P. Bliss, 306 East Colorado, agent for the Jewett and Paige automobiles in this section.

This showing is being made in advance of the general announcement of the Jewett company of this car. There are only two or three of these Jewetts on the Pacific Coast at this time and this is one reason why this car is making such a big hit in Glendale.

"This car is complete in every detail," said Mr. Bliss this morning. "Its regular equipment carries tire, tube and cover, trunk and trunk rack, sun visor, cowl ventilator, windshield wiper and the same interior refinements that has characterized the Jewett for the past few years.

"This new machine is a utility car. It can be used for every-day business or for the opera. It is also so equipped that the back seat may be reversed when it makes an admirable camping car, the seats forming the bed. The change can be made in five minutes.

"This car comes with standard cord tire equipment, baked enamel finish, etc. This car has the famous Jewett motor, which has won every hill climb in which it has engaged in the east this year.

"Its power makes driving in traffic easy as very little shifting is required. Timken axles are used. The oil consumption is practically nothing and 20 miles per gallon is the average for gasoline. The mechanical spring construction is the exclusive Paige idea, this giving wonderful riding qualities.

"The only trouble we have with the Jewett is in getting cars. We can sell them faster than the factory can let us have them. This new model is a wonderful seller, many orders having been booked in advance."

New Jewett Brougham Makes Bow in Glendale

Miss Patricia Oliver of Hollywood, places the first or der for a new 5-passenger Jewett Brougham

MANY VISITORS CALL ON CALIF.

Staggering figures in regard to the number of auto parties visiting the southern part of California from the east and northwest have just been issued by the Auto club of Southern California showing that approximately 234,000 autos carrying 936,000 persons will arrive here this year.

During the peak of transcontinental motor car travel, which is in July, it is estimated that more than 20,000 automobiles arrived in a period of 30 days in the southern part of the state.

This makes an average of 19,500 motor cars carrying about 78,000 people arriving in the southern counties of California every month.

It is estimated by the Auto club that more than 1,000,000 people will arrive in Southern California next year by motor car.

Transcontinental auto travel is one hundred per cent higher this year than it was last year, and it will be nearly one hundred per cent higher next year. Improved conditions on the transcontinetal highways accounts for this ever increasing flood of travel, says the club.

ROADS IN OREGON BETTER THAN IN CALIFORNIA

"Compard with our California highways, the Oregon roadbuilders are constructing for the great future instead of the immediate present, and much of their engineering work indicates a permanency comparable with that shown by photographs of the old Roman roads that have been in use for centuries," said P. H. Greer, a popular automobile man of Los Angelesfi who with Mrs. Greer recently returned from a motor tour which took them as far north as British Columbia. Continuing, he said:

"One thing that impressed me greatly is the thoroughness with which the roads north of the California line are built. The roads average wider than those in California, and are heavier. In fact, some of them are eight inches in thickness, reinforced with steel.

"The mountain curves are bordered by very substantial curbs and protecting rails. Beautiful examples of this masonry are to be found along the famous Columbia River highway. Oregon is entitled to the greatest of credit for the thoroughness of its road building campaign. I sincerely hope that in the future our road funds may be ample enough to provide the most thorough construction with greater protecting masonry on mountain curves.

"Travel over the entire Pacific Coast is very heavy and we were in a constant procession of cars equipped with California licenses. In fact, it would be safe to say that on the Pacific highway through Oregon, every second or third car bore a California license. The percentage is not quite so great in Washington, but they are numerous there. The Pacific Northwest has been doing rather extensive advertising in our California newspapers with a distinct appeal to the vacationist. It pays to advertise!

"This was my first real vacation since I entered the automobile business twenty years ago last May, and was probably brought about through the inflence of my wife who thinks all work and no play is not the best policy.

"Our trip which took us as far north as Nanamino, seventy-six miles north of Victoria on the island of Victoria, covered about 2200 miles and consumed over three weeks, with no longer drive than 200 miles."

WHAT'S YOUR TIME?

Is the time-piece on the dash of a motor car a public clock? If so, it looks as though motorists will be easy pickin's for the Pennsylvania and Connecticut authorities who have degreed it illegal to display other than standard time. Better regulate that dash clock, Mr. Motorist—or get busy on a repeal of the cuckoo-clock law.

(Copyright, 1923, by The Ullman Feature Service)

MAKING HIGHWAY PAY FOR ITSELF

General T. Coleman DuPont, who built and presented to the state of Delaware a magnificent concrete boulevard, says that the two fundamental principles of road building are: First, "the only thing which can possibly be permanent about a road is the location." Therefore, urges the distinguished road builder, "get the location right, remembering that a straight line is the shortest distance between two points."

The second fundamental principle, according to General DuPont, is concerned with its financing. He says, "Acquire extra land along the road, to be leased at a low rate of interest, the income to be devoted to road purposss first and general purposes afterwards."

Had the city fathers of the metropolis acquired a one hundred foot strip along the two sides of Broadway, the rentals from those strips would have paid for the entire running expenses of New York from its beginning, built all its bridges and subways, and supported its parks, police, fire department; in fact, made New York a tax-free city. As it is, the rentals from those two one hundred foot strips of land along the most expensive street in the world go into private pockets, the owners of the land.

All roads are Broadways in embryo. The country lane of today may be the busy city street of a hundred or a thousand years hence. But even if the lane is forever a lane, the land on each side of it has value, and brings in rental to some one. When that "some one" is the road building state, the state will no loger have to levy taxes for roads.

THERE'S REASON FOR VALVE CAP

Many car owners consider the valve cap, which screws down over the mouth of the inner tube valve, as more or less of an ornament. At least, so it would seem, judging from the contempt with which they regard that really useful little article. When lost they are frequently not replaced, or they are screwed on in haphazard fashion.

The valve cap is designed to accomplish two distinct purposes—first, to prevent foreign matter from entering the valve, and second, to prevent the escape of air from the inflated tube should the valve leak. Without the valve cap particles of gravel or other foreign substances are apt to become lodged in the valve and prevent it from functioning effectively.

The valve cap should be screwed on tightly so that it may prevent leakage of air from the tube in case the valve inside is damaged or faulty. The cap on the interior is reinforced by vulcanizing little brass cups into the rubber washer, and is so constructed as to be effective, independently of the valve inside, in hermentically sealing the air within the tire.

KEEPING THE BUS IN GOOD TRIM

Defects in the power plant are seldom contributing causes or accidents, but there are a number of things about the power plant that the average driver should know.

To locate a "dead" cylinder run the engine and open the cylinder pet cooks one at a time. If the cylinder is dead, the gases will not be exploded in the cylinder and there will be no loud report heard coming from the open pet cock. If there are no cylinder pet cocks, touch the end of a screw driver (one with an elektricaly insulated handle) to the cylinder casting and the side of the screw driver to the top of a spark plug. If sparking between screw driver and the engine casting at any cylinder does not diminish the speed of the running motor (determined by careful listening), that cylinder is the one which is dead.

Back firing is caused by (a) a mixture too lean in gasoline, (b) no gasoline or defect in gasoline system, (c) engine inlet valve not seating properly, (d) water in carburetor (due to condensation in gasoline tank).

Engine may start hard or refuse to start at all because of (a) defect in ignition circuit, (b) dirty spark plugs, (c) broken porcelain in spark plug, (d) flooded carburetor, (e) water in gasoline (due to condensation in gasoline tank), (f) points of spark plug too close or too far apart, (g) improper timing of electric spark, (h) cold engine, (i) improper mixture of gasoline and air, (j) lack of gasoline, (k) excessive corrosion on battery terminals, (l) ignition switch not on.

Engine may miss because of (a) improper adjustment of carburetor, (b) broken poreclain or improper adjustment of spark plug points, (c) carbonized spark plugs, (d) too much carbon in engine or in valves, (e) cold engine (only at starting), (f) defect in ignition circuit, (g) improper adjustment of valves, (h) weak compression (due to leaky valves or piston rings, scored cylinders, or loose spark plugs, valve caps, or priming cups).

Engine may lack power because of (a) carbonized engine or valves, (b) improper adjustment of valves, (c) improper timing, (d) insufficient lubrication, (e) overheated engine, (f) defect in ignition circuit, (g) dragging brakes, (h) air leakage in connections between carburetor, manifold or cylinder blocks, (i) excessive friction in transmission or differential, (j) lack of traction (caused by wet roads or roads with loose surface), (k) weak compression.

If Henry Ford would only dope out a way to make money enough to buy cars as quickly as he makes money selling 'em life would be worth living.

OBSERVATIONS

If some of the wiseacres who undertake to prophesy the immediate future of the automobile business were as successful prophesying the trend of the stock market an awful lot of good money could be lost in double quick order.

CAMP CLEANUP LEAGUE IS FORMED

A movement of national importance was recently launched with the organization of the Motorist's League for Countryside Preservation. The purpose of the league is to call attention to a habit which prevails among thoughtless motorists the country over—that of leaving miscellaneous litter along the highway where rests have been made for luncheon or supper or where camp has been made for the night.

The organization of the league was announced in the March issue of Motor. On the executive committee, which is now in process of formation are: Henry C. Wallace, secretary of agriculture; Luther Burbank, naturalist; James Newton Gunn, president of the United States Rubber company; Nelson Doubleday, Doubleday, Page & company; George C. Diehl, president of the American Automobile association; W. C. Durant, president Durant Motors, incorporated; Thomas H. MacDonald, chief, bureau of public roads, department of agriculture.

There are no dues for membership in the league other than those which a local chapter may wish to assess for the erection of road signs, etc.

If every motorist will sign up the pledge of the Motorist's League for Countryside Preservation and will live up to that pledge, a work of public service will have been accomplished. A membership card in the league and a copy of the pledge may be obtained by addressing the secretary at the league office, 119 West 40th street, New York.

GOOD ROADS ARE SURE TO COME

The bigger the body, the slower the movement. The greater the movement must be, the longer it takes to get under way.

The United States is a large body, almost entirely surrounded by good motor cars and poor roads. It is moving slowly, but surely towards a condition when it will have only good roads. The movement is slow because the body is so large, and has so many heads—110,000,000 of them.

Improving our almost three million miles of highways is a huge task. The movement is enormous. Therefore, it takes time to get under way. It is like a monster freight train, starting up a grade, requiring many locomotives to begin the travel and slowly getting up speed. But once the train is in motion, it has an enormous force for going ahead; one locomotive can keep it moving and it is difficult to stop!

So will it be with our road building program; slowly but surely the movement for better roads than Federal aid can give, for more roads than states alone can build, is gathering momentum. When it gets up speed, nothing can stop it.

Meanwhile the individual who needs a good road and needs it now, must not lose courage. It was said the Panama Canal couldn't be built in a generation. It was built in a few short years. At the rate we are at present building Federal aid roads it will take some hundred and fifty or two hundred years to improve our road system.

PSENNER BROS. NOW OFFICIAL TESTERS

Word of the appointment of the firm of Psenner Brothers, 601 South Brand boulevard, as official headlight testers has just been received by that concern from the Motor Vehicle department of the State of California.

The members of this firm are reminding the motorists of California that the motor officers of the state are at this time conducting a campaign against defective headlights. They are stopping motorists in all parts of the state and demanding their registration certificates. The only way to play safe, said the manager of this company, is to have the lights adjusted. It will save time, money and annoyance.

GIGANTIC GROWTH IS MADE BY CHEVROLET

July continued the big business started in March, which has upset all traditions in the automobile industry and made new records almost monthly for Chevrolet, according to C. L. Smith, corner Orange and Colorado, local dealers for the Chevrolet. Sales in that month, in United States, Canada and export fields, reached the fine total of 40,335 units, a 60 per cent increase over July last year when 25,236 units were sold.

This brings the total sales for seven months of 1923 to the new high figure of 272,302, which is a 101 per cent increase over the corresponding period of 1922, when 135,628 units were sold.

Compared with May and June of this year, July shows a slight decline, due to production conditions and the uncertainty which always prevails at the time of signing new contracts. May sales in United States and Canada were 44,375 and June, 44,059.

July, however, not only showed a big increase over the same month of last year, but it showed a very fine increase over the biggest month of last year—June—when 28,708 units were sold. The increase amounts to 40.5 per cent.

Figures published by Automotive Industries show that the Chevrolet Motor company is performing much better than the automobile industry as a whole.

The total production of motor vehicles for the first seven months of this year is 2,344,000, an increase of 63 per cent over the corresponding period of last year. The Chevrolet increase, as given above, is 101 per cent, or 38 per cent above the general average.

Note, too, that Chevrolet sales amount to more than 11 per cent of the total produced by the entire industry so far this year.

Production of the whole industry for July, 1923, exceeded July, 1922, by 29 per cent. The Chevrolet increase for July over July last year was 60 per cent, or more than double the average for the industry.

These figures show Chevrolet's standing in the industry better than words.

SURELY THIS DON'T APPLY TO YOU

What would happen to the engineer of a locomotive—

If he were discovered sitting at the throttle with a pet dog in his lap, adjusting his glasses with his hands and reading the billboards along the way—while traveling 40 miles per hour?

If he took his twelve-year-boy along with him on Sundays and permitted him to run it?

If he discussed his golf score with the fireman and missed a number of signals along the way, even though "nothing happened"?

He'd lose his job, if not his life. But the "engineer" of a motor car is supposed to be "different." He is excused on grounds that he ought to know better.

FROM THE PACIFIC TO MISSOURI IN A 'FLIV' GOES THE REID PARTY

Truly Wonderful Are the Experiences of These Glendale Residents Who, Notwithstanding the Beauties Seen, Are Glad to Be Back Home Again

GRAND CANYON AND LAKE TAHOE VISITED

15,000 Miles of All Kinds of Roads Traveled Between June 4 and August 31, the Destination Being Carrolton, Mo.—Memory Will Always Linger

"To Missouri and back in a flivver," might be the title of a little story that could be written by S. J. Reid of 212 North Cedar street. And it would be from experience, too.

Mr. Reid, in company with Mr. and Mrs. Harry Reid and their daughter, Eloise, of 1011 East Acacia street, started from Glendale on June 4, their destination being Carrolton, Mo., where they have many friends and relatives. Almost three months they were away, returning to Glendale August 31.

Whil eaway, Mr. Reid informs the Press, all members of the party had the times of their lives. Many points of interest were seen and visited during the jaunt, each of which served to add pleasure to the trip.

While away the party covered about 15,000 miles, every one of which had its appealing feature.

"We started from Glendale over the National Old Trails route on June 4," said Mr. Reid, this morning.

Out through San Bernardino, we went, over the Tejon Pass, to Needles. At Williams, we branched up to the Grand Canyon, where we stayed two days. The return to the N. O. T. was made at Flagstaff, from which point we continued east to Holbrook. At this point we took the south loop to Secora, New Mexico. Our party then continuel east on the N. O. T. to La Junta, crossing the Raton Pass, which was one of the most delightful part of the trip, the roadway being especially good.

"From La Junta we went north as far as the Missouri Pacific railway, when we branched east to Great Bend. At La Junta, Colorado and Scott City, Larned, Kansas, we visited relatives for several days.

"From Great Bend the trail to Tonganoxie, Kansas was followed and then on to Leavenworth, where friends and relatives were visited. From this point we continued on to Kansas City. At this city the leading sights were seen. Then the trip to Carrolton, Mo., where we visited until August 13.

"While at Carrolton I had the extreme pleasure of several weeks' farm work. During that time I plowed corn, hoed weeds and helped in the harvesting and threshing work. This was just a touch of old times, and the many things that I elected to do carried me back to the days when I was just a "kid" on the farm.

"This work on the farm was the bright spot on the trip for me. I got some sure-enough callouses on my hands and a mighty good coat of sunburn on my cheeks. Talk about sweat—I'll say it's hot back there.

"And say, we had some storms while back there. On the evening of July 3, we had a terrible electrical storm. It rained about 3 1-4 inches in one night. The experience with the lightning was not overly pleasant, especially to Harry and Mrs. Reid. It was the worst they had ever seen, and made them wish they were back in Glendale.

"The return trip was started August 13. The route taken going east was retraced as far as Kansas City, where our party too kthe nearest route for Denver. From that city we went to Laramie, Wyoming, where the Lincoln highway was encountered. The party continuing to Ogden and Salt Lake.

"From Salt Lake the shortest route to Ely, Nevada, was taken, after which we journeyed on to Carson City, and on to Lake Tahoe. From the lake we went to Sacramento via Truckee, the trip down the Truckee being unusually delightful. From Sacramento our party went to Stockton, where friends and relatives were visited, and then took the coast route to Glendale, arriving August 31.

"So far as scenery is concerned the Grand Canyon was the most wonderful thing we saw on the trip, Lake Tahoe coming in for a great deal of praise. The petrified forest was grand, and there were many other points of interest that will remain in our memories for the remainder of our lives."

TICKETS FOR $500 TO BE GIVEN AWAY

Tickets for five hundred dollars in prizes will be dropped from the "Overland Red Bird" on Saturday afternoon, September 22, at 2:30 o'clock.

Promptly at 2:30 o'clock the Overand Red Bird will fly over Glendale, gliding so low that the explosions from its exhaust will be earily heard. While on the trip over the city the pilot will drop several thousand tickets. Some of these will be prize-tickets, and those securing them will be given the amount of the prize by presenting them at the Smith-Sloan, Inc., 228 South Brand boulevard.

But the "Red Bird" Overland automobile is making just as big a hit as the "Red Bird" airplane could possibly make. Its wonderful lines, its economy and its endurance are winning it many friends.

Nothing has been omitted from the list of equipment made standard on the new Overland Red Bird, but what is necessary and convenient for the motorist who demands something out of the ordinary and who at the same time does not want to plunge into reckless extravagance in having his ideal satisfied.

Included in the equipment are bumpers front and rear, wind shield wiper, scuff plates, door grips, spare rim and tire carrier, beside the usual dash light, speedometer and other accessories.

Glistening nickeled radiator with bar cap, nickeled head lamps, wind shield stanchions, outside door handles, scuff plates and back curtain window frame are admirably set off by a khaki top with red binding and welts.

Red Spanish grained upholstering leaves a pleasant impression when blended with the superb and rich, gleaming Mandalay maroon, a shade that is exciting much interesting comment, affording to the eye as it does a delightful sense of sprightliness, artistically subdued to a tone of agreeable refinement.

The Red Bird has a roomier body, riding on a lengthened wheel base of 106 inches and a spring base of 136 inches. This specification alone insures extremely comfortable traveling at all times and under the most adverse conditions. When the patented triplex springs, adopted by Overland engineers are further considered it will be readily understood that restful riding is one of the many outstanding merits of this new car.

Straight side, Fisk cord tires, 30 by 3½ are also standard equipment on the Red Bird, enhancing its value to the purchaser and adding to his motoring satisfaction.

The engine is larger and more powerful and in every way adapted to maintain that far-reaching reputation of creditable, economical performance gained by the Overland motor. Speed, flexibility, quick pick-up and low cost operation are established and proven facts.

THIS IS THE WAY CARBURETOR WORKS

The carburetor vaporizes the gasoline and mixes this vapor with air in a certain proportion to form an explosive mixture. For use in automobile engines this mixture is about fourteen parts of air and one part of gasoline vapor. (Parts are determined by weight.) If the mixture contains too much gasoline it is too rich; this wastes gasoline, deposits excessive carbon, dilutes the oil in the crank case, and prevents the oil from properly lubricating the engine. If the mixture contains too little gasoline, it is too lean.

This proportion of gasoline vapor to air can be regulated by certain adjustments on the carburetor. These adjustments are very sensitive and after they are once made properly, there is little if any need for change. Only properly qualified and experienced persons should attempt to do anything or to make any adjustments on the carburetor.

No gasoline or air can enter the engine cylinder without first passing through the carburetor. This air passes by the spray nozzle and sucks out some of the gasoline which is thus vaporized forming an explosive gas.

The amount of gasoline and air entering the cylinders is controlled by the throttle valve (sometimes called a butterfly valve) located just above the carburetor in the pipe leading from the carburetor to the engine. The opening and closing of this valve is controlled by the hand throttle lever on the steering post, or by the foot accelerator, or by both. Opening the throttle valve admits more gasoline and air and speeds up the engine. Less gasoline and air are admitted and speed is lowered by moving the throttle toward the closed position.

The engine must ordinarily be cranked or turned over several times before it will start. This is because a charge of gasoline and air must first be drawn into the engine, then compressed and fired.

If the air drawn into the carburetor, or the mixture of air and gasoline coming from the carburetor is heated before it enters the engine cylinders, the cylinder walls are not unnecessarily cooled, and the engine will operate more economically.

The daily waste of gasoline is enormous. If the drivers in our country were more careful they could save a million gallons of gasoline a day, simply by having the carburetor adjusted properly, operating the car only when necessary and shutting off the engine when standing still.

The villagers were interested to know how the squire's son was getting on in "Lunnon," and at last the chauffeur at the hall vouchsafed the information that Master Montague had been "called to the bar."

"Called to the bar" exclaimed the landlord's pretty daughter. "Why, from what I remember of Master Montague, he didn't need much calling!"

WHEN IN STRANGE TOWN

When puzzled as to traffic regulations in a strange town, and if you are fortunate enough to have cars directly in front of you so that you can play follow the leader, learn to look ahead to the next crossing. Invariably you will find cars in process of making turns, and it will be at once evident how you should proceed when you reach that point. It may mean going a block of two out of your way, but that's preferable to being annoyed or making a blunder.

(Copyright, 1923, by The Ullman Feature Service)

SUPPLY STORE SIGNS

Some of these days the shingle over automobile supply stores will read, "Auto Necessities," the accessory feature being relegated to the limbo of the forgotten. The supply houses may handle a lot of frills, but the backbone of their business is made up of those articles which a motorist never knows he needs until he has gone ahead and made the investment.

(Copyright, 1923, by The Ullman Feature Service)

DID YOU KNOW—

That some of the knocking in an engine may be due to too lean a mixture? With too lean a mixture for the load, an engine must labor, thus resulting in knocking of its weakest and loosest parts. This may be in the form of a piston slap, a piston pin knock or a bearing knock, depending upon the condition of the engine. When it is seen that to this disadvantage must be added the fact that laboring serves to inflict further wear on the engine, the saving in gas through using a lean mixture may prove to be very costly in the long run.

That there is a point in hill climbing where it is more economical, from the standpoint of the gasoline consumption of the engine, to shift into "second" rather than open the throttle wide with the car in "high." But "second" inflicts wear upon the gears, so in climbing a hill it requires good judgment on the part of the driver to know when he is truly economical.

IS YOUR AUTOMOBILE A CAGE OF BIRDIES? ASKS MANAGER OF WESTERN AUTO

If So, Get on the War Path; Provide Yourself With a Hunting Knife and Gun and Go After the Chirper With a Will

TAKE A CAN OF GRAPHITE GREASE ALONG

Spueaks Take a Great Deal of the Pleasure Out of Riding—A Careful Search Will Reveal the "Nerve Breakers"—The Rest is Easy

Have you a little birdie in your car? If so, you are lucky in having only one, and not a nest of these songsters that insist on entertaining you with their merry chirps and peeps as your car rolls along the highway.

"Every season is open season on these pests, and game laws d onot govern their destruction," declared Claude Roudebush, local manager of the Western Auto Supply company. "Every car owner should take it upon himself to go hunting for these canaries that sing in his car. In preparing for the shoot, the hunter must, of course, provide himself with a gun and hunting knife. Not a shotgun—but a weapon that shoots grease instead of bullets, and a knife with a long thin blade. Another asset to the hunter is an investment made for prying the leaves apart in search of the elusive birdie. His ammunition—a can of grease, oil and graphite compound.

Donned in a conventional khaki hunting suit (a pair of coveralls) our hunter gaily sallies forth to stalk the way singers that warble under his car and take the joy out of Sunday afternoon's joyride. After a careful search he at last discovers the exact habitat of his game. Some—he finds nestling in the spring shackles, some, choose to roost in the wheel spokes, while others have long built their nests in the springs, and chirp noisily about in the leaves as the car is being driven. Quickly inserting the jack under the frame of the car to relieve the spring tension, our hunter is ready for the wholesale slaughter of the feathered chatter-boxes.

A little contrivance called a spring leaf spreader is then brought into play. It is clamped on the spring and as it is tightened the spring leaves gradually spread apart, leaving the tenants of the spring leaves entirely to his mercy.

Dry rust between the spring leaves provides an excellent spot for the noisy canaries to gather and carry on their vocal efforts. Our hunter then takes his knife, covers it with a liberal amount of graphite grease and works it between the spring leaves. Some hunters prefer covering the springs with a heavy film of oil as this method is equally as discouraging to those who would build their nests between the leaves. This operation is then repeated until all of the springs have received the same treatment. The car shoud then be thoroughly oiled and greased, all loose bolts should be tightened and an inspection of the wheels be made to determine whether or not the spokes have loosened during the hot, dry summer months. Loose spokes may be remedied by inserting a few drops of spoketite between the spokes."

"This operation is so simple that with modern tools and equipment it requires but a few minutes time to dislodge the noisy warblers that have a tendency to become old established residents in spots about the car that the motorist has neglected to oil or give the proper amount of attention," concluded Mr. Roudebush.

VENTURA MOTOR SHOW OPENS OCT. 3

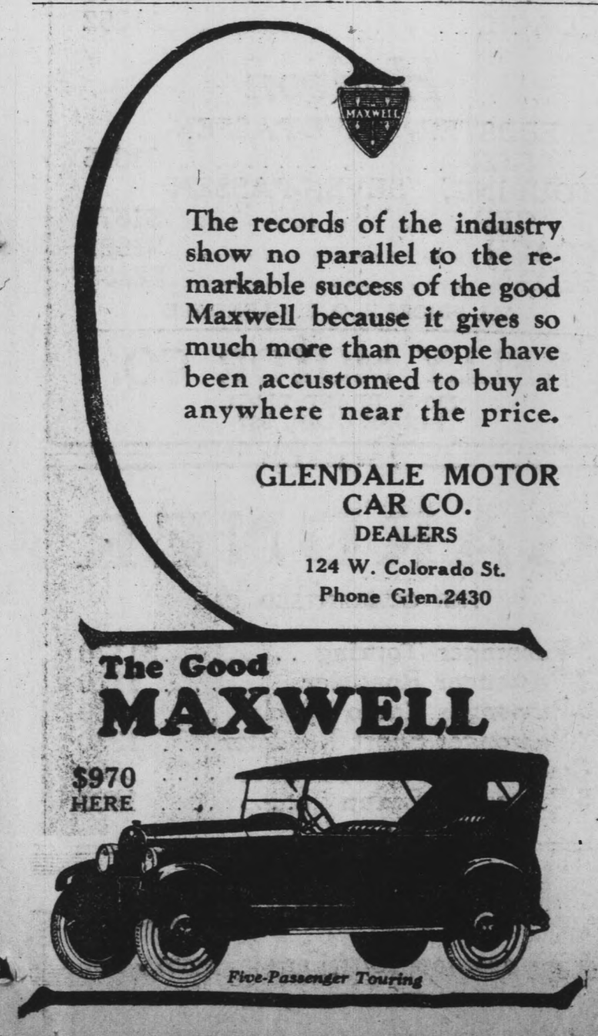
The automobile show to be held at the Ventura County Fair, Seaside Park, Ventura, October 3 to 6 inclusive, promises to be the largest exhibit of automobiles seen in previous years if not the largest in the state.

Paul Hutchinson, chairman of the automobile, truck, tractor exhibit, says that practically all the space has been spoken for and with all the new models on the market, people will have something to look at this year which they have not had the opportunity to do in past years, as all the models have come out later in the season heretofore.

The automobile tent will be almost twice as large as last year, being 500 feet long and 100 feet wide. The contract for the decorations has been let and, according to Mr. Hutchinson, the tent will be decorated better than in past years. The music will be from a well known Los Angeles orchestra, including some of the best artists in jazz music in Los Angeles. Mr. E. O. Smith, who is assisting Paul Hutchinson in putting on the exhibit, was in Los Angeles last week calling on a number of dealers, and he says that most dealers are short of new cars, but no doubt will receive enough by October 1 to make a very attractive show.

FOR BETTER STARTING

A better start can usually be had by cranking the engine over a few times with the starter before switching on the ignition, rather than the reverse process of switching on the ignition before cranking. When the cylinders have an opportunity to load up with a stronger charge of gas the firing of but one cylinder when the ignition is turned on will usually serve to send the engine off with a snap. Care should be taken not to crank too long before switching on the ignition, as the engine will present starting trouble if it gets flooded with gas Just a few turns of the shaft, and then snap on the ignition.



The records of the industry show no parallel to the remarkable success of the good Maxwell because it gives so much more than people have been accustomed to buy at anywhere near the price.

Five-Passenger Touring

Looking for the "Canaries"

This is how one pair of motorists goes after the "music makers" of the auto. Good grease and oil do the trick

DON BARTON IS WITH HUP AGENCY

It is announced by Bartlett & French, Hupmobile dealers at 111 West Harvard street, Glendale, that they have been so fortunate as to secure the services of Don Barton as manager of their service and repair department.

Mr. Barton, who with his brother, King Barton, conducted the well known Barton Brothers' garage, 212 West Broadway, has been in the automobile business in Glendale since 1914, and there is probably no one better or more favorably known in either the sales or repair departments of the business in this territory than he. For some time he and his brother were the Hupmobile dealers for this territory.

The High School system of Los Angeles has been negotiating with Don Barton to join its teaching staff, and he was about to become professor of motor mechanics at the Jefferson High school when his decision was made to remain in Glendale and take charge of the Bartlett & French shop.

All Hupmobile service will be given personal attention and labor by Mr. Barton, as will all automobile repair work which is placed in his hands.

AUTOMOBILE IS AN OPPORTUNITY SAYS CLARK

"Any automobile is nothing more or less than an opportunity," says Lyman P. Clark of the Glendale Motor Car company, 124 West Colorado street, Maxwell and Chalmers dealers.

"Some men make the most of it—others fail to improve more than a fraction of the opportunity for comfort, convenience and pleasure that the car builder has put into their hands.

"Getting the most out of an automobile depends large upon the local facilities that exist for meeting the daily needs of car ownership. Unless the local car dealer provides these the owner finds it difficult to obtain them. And his opportunity for satisfaction in car ownership is enhanced or diminished exactly as the dealer meets or ignores this responsibility."

The big item in operating cost is depreciation. If the cost of the car can be spread over five years of service, it returns more for the investment than if it must be traded in or sacrificed at the end of two years.

Some cars show little actual depreciation even after speedometer totals reveal that the owner is riding "on velvet" as it were. Such cars have been carefully handled. They have always had every needful thing the instant the need appeared.

You usually find that such cars came from a dealer who constantly maintained complete, up-to-date service facilities, and made them economically available to all owners.

The later model Maxwell cars today stand the highest of any car in their class in re-sale value and back of this car is one of the largest service and distribution organizations in the world. This company recognizes and accepts their obligations to Maxwell and Chalmers owners. The purchaser of one of these cars is safely guarded by our investment in parts, service facilities, accessories and skilled men. said Lyman P. Clark.

BOOTH SUPPLIES AUTO INSURANCE

Automobile insurance is the motorist's friend. It is the safe-guard against misfortune. It eliminates worry and adds greatly to the automobile jaunt. When a fellow knows that whatever happens he is protected, the knowledge is sure to add to the pleasure of operating the machine.

There is an insurance man in Glendale who takes care of the local motorists along this line—Clinton Booth, 116 West Colorado, who has been distributing insurance in this city for years. The companies he represents are the strongest in the world and have a reputation of paying "on the dot."

Mr. Booth has a blanket insurance that takes care of every detail in connection with the automobile. He has been a resident of this city for years, and has a reputation of taking unusual care of his clients.

REAL SERVICE IS RENDERED BY OLDS

C. H. Hunter of the local Oldsmobile Agency was commenting on service, and says that when an automobile is sold that the dealer's responsibility is not over. He must, to be successful, maintain a first-class service station and along those lines Mr. Hunter says he has given much thought. Having been in the automobile business over 19 years in various capacities, he has had an opportunity to observe the effects of good and poor service, and has noticed that good service always helps sales. With that thought in mind, he secured the services of Mr. William MacGree for service manager, who was foreman of the Grand Central garage in Los Angeles for the past two years. Mr. MacGree learned his trade in Europe, working on European cars in European shops, where only first-class work will be tolerated, and is familiar with all makes of American cars, and the Olds especially. Thorough overhauling is one of MacGree's specialities.

WHEN ALL ELSE FAILS

The following suggestion is not recommended for all motorists, but it has worked occasionally and is, therefore, worth considering when everything else has failed.

Should the car develop a chronic squeak, and greasing of every part of the chassis fails to remove it, the chances are that the wood framework of the body has dried out. This is especially likely to happen to a car which is seldom washed, provided it is seldom out in the wet. Under these circumstances it is advisable to remove the seat cushions, tools and the floor mats and wash the car inside and out. This method, while rough, has been known to remove many a persistent squeak. It does not have to be done in such a way as to damage the trimmings or the mechanical units of the car, simply enough to eliminate the dryness from the woodwork.

CAD COMPANY IS WORKING AT CAPACITY

Canadian automobile plants are operating at capacity and a survey of general business conditions throughout the Dominion warrants motor car manufacturers in expecting an increasing market, according to a statement made by Edward J. Weil, of the Cadillac Motor Car company of Canada, Oshawa, Ontario, while in Detroit attending the annual summer convention of the Cadillac organization.

"The agricultural outlook is the best in Canadian history, with the exception of the rye crop, which is disappointing," states Mr. Weil. "This favorable condition is particularly the case with the wheat crop, which is estimated at 500,000,000 bushels, as compared with 400,000,000 bushels in 1922. Oats and barley are the other major crops for which the outlook is particularly good.

"In pulp production, Canada leads the world," Mr. Weil continued, "and this industry is operating at capacity. Further revenues for our railroads have recently been asured by the bill passed by parliament placing an embargo upon the exportation of pulp. One carload of pulp turned into paper in Canada means four carloads of freight going into and coming out from the mills, besides increased volume of manufacturing.

"While two thousand freight cars were recently ordered by two railroads, there is still a shortage of rolling stock to handle the expected crops. Iron and steel business, although still below normal, is gaining each month, recent increased business being due to railroad orders."

The Cadillac is handled in Glendale by The Court Motor company, 235 South Brand.

WHERE ARE WE?

One of the most unsatisfactory things in touring is to pass through town after town without knowing their names. "Where are we?" you ask, searching the scenery for a clue as to your whereabouts. But hanged if you can tell. You are traveling with an out-of-date card, and you probably wouldn't have gotten the towns straight even if you had tried to take them in order.

Why don't these modest, retiring towns advertise a bit? "This is Slickville," has greeted many a puzzled motorist, but when you come to study the situation carefully such enterprising towns are few and far between. In most localities the motorist has to stop and ask a native for the necessary information.

Occasionally a store will be enterprising enough to announce the name of the town, and if your eyes are abnormally keen you may be able to decipher the weather-worn shingle hanging above the door of the postoffice. With these two possible exceptions every good town is just like the one before to the man who is traveling; and it isn't good business for the towns.

Neatly painted signs welcoming the motorist and asking him to boost the town by driving carefully, are excellent advertising. The cost is nominal. It's a good plan for the motorist to suggest the idea to townspeople when stopping off for information. The chances are that when he passes through next season a bright, new sign will greet his eyes.

It is said that no two men ever think alike—yet a great many widows remarry.

MESA GRANDE IS A WONDERFUL COUNTRY

Lifted high above the surrounding valleys of Warners and of Santa Ysabel, Mesa Grande, in the back country of San Diego county enjoys a seclusion that comes only in these days where through travel by automobile does not pass. It is easy to get to Mesa Grande by automobile, and the hospitable Powam Lodge, presided over by Ed Davis, draws many visitors, but travel to other resorts of San Diego county does not pass through Mesa Grande. On the dirt roads of that high table land are many more tracks of horses and buggies than of automobiles, which is something that is rarely to be seen in traveling these days.

The Mesa Grande Indians have not yet been generally converted to the automobile as a mode of transportation. On Sunday morning, the quaint little white adobe chapel on Mesa Grande is surrounded with horses and rigs of every description, as were all the country churches of two decades ago.

There are three ways of reaching Mesa Grande, according to the Dixie Packard company, 510 East Broadway, local Packard agents, a member of which company visited Powam Lodge last week. The road muost traveled goes into Santa Ysabel from Ramona, and thence north on the Warner road to a point about two miles north of Santa Ysabel and then climbs the east side of Mesa Grande. Another road climbs out of the Warner valley, up the north side of Mesa Grande, while the Black canyon road, most scenic of all, comes up from Ramona on the southwest. But the visitor who goes into the San Diego back country and does not take one of the three is missing one of the most picturesque and beautiful spots in Southern California, and one that is particularly delightful with the coming of the fall weather and the autumnal color on the trees.

TRANSPORTATION IS FARMER'S PROBLEM

Senator Arthur Capper, Kansas farmer, who, if anyone, should know the facts about the farms, says that transportation is the greatest problem the United States has to solve. The Senator not only says it, but proves it in a few words. He says:

"In Kansas today the farmer has to pay 22 cents a bushel for shipping his wheat to Chicago. He gets about $1.25 for it there, allowing him something like 80 cents a bushel for wheat which really means a loss of about 40 cents on every bushel grown and sold at that rate. The railroads, meantime are getting twice as much for freight as they did five years ago when the farmer was selling his wheat for $2.26.

"Today the situation is 10-cent bread or higher for the consumer, while the farmer, the producer, gets but 80 cents for the wheat which costs him not less than $1.20 to grow. The same situation prevails, of course, in the beef industry. The railroads get high freight rates, while the grower gets a minimum.

"The people of this country are being brought to see that basically, if this country is to enjoy stable prosperity the condition of the farmer must be better than it now is. There is no getting away from the age-old truth that 'As for the earth, out of it cometh forth bread.'"

When every trunk line railroad is paralleled by a broad, smooth, well graded national highway, strong enough to support trucks of five or even ten ton capacity, the railroads will not get 22 cents a bushel to take wheat from Kansas to Chicago!

The transportation problem neither begins nor ends with railroads. The highways problem daily becomes more and more vital. The making of automobiles is today a larger industry than the running of railroads; making of roads for automobiles and trucks is inevitably to become the greatest single industry of the country. When it has been so long enough to provide three hundred thousand miles of highgrade roads (about the railroad mileage of the Nation) there will no longer be an acute transportation problem.

Old Mechanic Says—

"Ever since my oldest daughter started in takin' singin' lessons I've had a thought for the folks who drive cars. There are any amount of points to be picked up from other lines, but this is about the best I've found.

"When my daughter aims for a high note her teacher tells her to go at it as though she hoped to hit a low one. 'When you're after a low note,' he says, 'make believe you're aimin' for a high one.'

"That sounded like practical psychology to me, and I commenced wonderin' whether it wouldn't work if more drivers wouldn't work out in drivin' up hill and down with a car. It occurred to me immediately that if more drivers would go into 'second' when goin' downhill. Most drivers unintentionally do their speedin' downhill, because they think they can't help it. Uphill they crawl the way they should go downhill. Reverse the process.

"Speed uphill is not only practical and convenient, but safe. A car goin' thirty-five uphill can be stopped quicker than a car going 20 on the level. And you don't have to run risks passin' cars either; just take it easy on the approach until the folks who struggle with the hills are out of your way. Then hit your high note the way you used to rush down hill."

"SOME" REASON FOR WORRY

A small dog, barking loudly, chased madly after a passing express train up a country railroad station platform.

"What makes him run after it?" asked a traveler of the station agent, owner of the dog.

"I dunno," answered the agent, thoughtfully. "But that never bothered me so much as what will he do with it if he ever catches it!"

There are many communities which talk loudly about the need of good roads, the value of good roads, the use of good roads. They talk themselves into a bond issue, or a road tax, and build, one, two, ten miles of good roads. Too often those miles neither begin anywhere, nor end anywhere; do not connect with any good road at either end. Travelers wonder what they will do with their good roads now that they have caught them?

There is no magic in a few miles of paved highways. The farmer who must haul produce through mud to get to a paved highway, and over ruts and stones after leaving it to get to market, experiences no real economy. The economy and benefit of improved highways comes when they are improved for all their length. A chain is no stronger than its weakest link. A regiment is no faster than its slowest soldier. A road, for economy of horse flesh or motor capacity is no more economical than its worst mile.

SWEETWATER GIVES GOOD BASS FISHING

Due to the previous scarcity of lowland fresh water lakes and running streams in Southern California, bass fishing, until very recently, has been a sport that Californians by choice have indulged only in memories of their old homes in Missouri, Wisconsin and other sections of the Middle West and East. What California lacks, however, she usually creates, and so it has been with bass fishing. Like most of our lakes where such fishing is now available, Sweetwater Lake is of artificial creation. It was made to create a water supply by damming up the canyon outlet of a great valley through which flowed the Sweetwater River. To keep the water clean and pure the lake was stocked with bass. For several years no fishing was permitted. The fish literally overran the lake, which is now open to pleasure anglers.

For the privilege of fishing there the angler contributes 50 cents per day to the water company that created the fishing, and the 50 cents he pays is usually rebated to him by the food value of the fish that is ordinarily landed with the second or third cast. Angling is restricted to rod and reel. Artificial flies, lures and bait may be used. The angler is asked not to pollute the water, because others have to drink it. There are no other restrictions. Some excellent catches of bass are made from the shores, but the majority prefer to fish from boats, which may be rented for a nominal sum from the custodian of the property. It is 150 miles from Los Angeles to Sweetwater Lake via San Diego and National City. It is all paved road except the last four miles, which are of good adobe surface, free from heavy grades. There is a comfortable automobile camping ground on the shore.

Thoughts in Passing

After any complicated collision one can always truthfully state that it's all over but the doubting.

The world may be waiting for the sunrise, but the sunset looks pretty good to the motorist on a transcontinental tour.

Judge Edward J. Jeffries of Detroit says that the slow driver gums up traffic and is thus a menace, but he failed to explain why. The slow driver encourages others to attempt to pass at illogical points, and that's where the trouble starts.

A driver's record is always before him. Read this twice!

From results it seems that the reckless driver is invariably the "wreck more" sort.

The price of gas never could compare with the price of carelessness in using it.

New tires are a great attraction to the car—and tothe tire thief.

"To be careful or to be more careful"—that is the question.

The last word in motoring is invariably "Have we got gas?"

The automobile recently celebrated its twenty-fifth birthday. Did you notice twenty-five million headlights on the birthday cake?

Never strike a tire when it's down.

(Copyright, 1923, by The Ullman Feature Service)

FOR LEGISLATORS MAINLY

Why many of our motor laws are fast becoming ornaments among the automotive statutes may be explained by the attitude of a British Lord who recently pointed out that one of the difficulties in the way of proposed changes in rules of the road was that uniformity could not be enforced by legislation. His further opinion that enforcing a rule often causes confusion should be of interest to those who are forever springing new and entirely unnecessary regulations upon thirteen million drivers who are endeavoring to drive in such a way that driving is clear to each other.

When Installing Electrical Devices

When buying an electrical accessory, the purchaser is generally instructed to connect one wire to the battery and the other to the ground for the single wire system, or both wires to the battery for the double wire system. Such instructions, though essentially correct, are not conducive to giving the purchaser the best indication of the reliability of operation of the accessory installed. In the case of stop lights, unless a check light is installed as part of the equipment, there is nothing to indicate to the driver whether the light is in working order or not. In the case of other accessories, excessive current may be drawn without any notice being given of the defective condition. The proper manner in which to install any electrical accessory is to make connections in such a manner that all current drawn must pass through the ammeter, and if possible, to give each accessory the added protection of a fuse. In the original wiring plan of a car, all current drawn, except that consumed by the starter, is registered on the ammeter. The feed wire is generally connected to the live side of the starter switch and runs from there to one side of the meter. The electrical equipment is either directly or indirectly connected to the other side and all current, either drawn from or delivered to the battery, must register its value on the ammeter. By connecting the wiring of all electrical accessories to this side of the meter, an accurate check can be kept on the condition of any installation. The driver soon becomes accustomed to the amount of current consumed by each circuit and any defective condition can readily be detected. The application of the brakes will cause a fluctuation of the meter needle if the stop light is in perfect condition: a short-circuit, ground or an excessive current consumption will immediately make itself known by an excessive discharge reading. It is therefore a good policy to connect the wiring of all accessories so that the current consumed will flow through the ammeter and then—to watch the meter.—Automobile Digest.

FAVOR THE RIGHT SIDE

The right side of the car is the one which is most critically examined by the all-seeing eye of the public. When the car is parked in front of the hotel it is the right side of the car that engages the attention of those who unconsciously judge you by the appearance of your car. When you come to trade in the car, or sell it to the highest bidder, the car invariably stands at the curb with the right side telling the story of the care the machine has received. It's just a gentle hint to give attention to the right side of the car first if one's time is limited.

Some times a weak tire gets more fresh air than those folks who go out driving for it.

SUCCESS TEST LIES IN ONE'S ABILITY TO SAVE

By S. W. STRAUS

President American Society for Thrift.

IF IT were possible to interrogate each man of outstanding business success in this country today as to the chief reason for his success, his answer would undoubtedly be some such statement as the following:

"I owe my success fundamentally to my ability to save money."

It requires more ability to save money than it does to earn it.

S. W. STRAUS

The entire educational or mental equipment of most men has been built up with the objective of acquiring wealth. Learn to earn. This is the admonition that has been dinned into them almost from the earliest period of understanding.

But in the matter of saving, the average person today has the advantage of a most limited educational background. Furthermore, the temptations to indulge in extravagant ways are both subtle and deceptive. It is always easy to run into debt, to contract obligations that seem well advised but which can be avoided in the interests of economy, to fritter away money for absolutely useless purposes, to trust to luck, to hazard funds without full knowledge of the circumstances involved.

That is why it is so much harder to save than to earn, and why in the race for success the winners in the long run always prove to be men who can enforce economy on themselves and on those under their guidance.

This is perhaps the most useful and practical lesson one can learn today. But it is not an easy one by any means.

In personal affairs it often means the gravest self-denial; in business administration it means discipline, resourcefulness, courage, and a genius for firm decisions.

Follow the rule that success depends on your ability to save. You will soon taste of the fruits of its wisdom.

BUILDING OF CAMP SITES BIG HELP IS CLAIM

The development of motor camp sites in the United States to the point where there are now 1,927 for the benefit of the week-end and cross-country tourists is one of the greatest boons to "See America First" movement the country has known, according to C. J. Nephler, general sales manager of the Oakland Motor Car Company.

"In fact the tremendous camp site development has been an endless circle of all around good," he states. "It enables those of moderate means to take long trips without the necessity of remaining at a hotel over night.

"It takes whole families with cars out into the open as never before, affording healthful living at a minimum of expense. It enables Americans to see their own country—a practice which previously had only been the privilege of the wealthy.

"And for the communities supporting such camps, it means all that additional revenue which the motorists spend for their needs while camping at these stopping places.

"It means also another additional use for the automobile to bring health and happiness to humanity.

"As might be expected, those states having the largest number of motor cars per capita have likewise the largest number of free camp sites. For instance, California leads in both the largest number of cars per capita and also in the largest number of camp sites with 193. Michigan tied at ninth place among the states for the largest per capita number of motor cars, stands in tenth place with 74 free camp sites.

"The movement which is as yet in its infancy, deserves the support of all public organizations in every community."

The Oakland is handled in Glendale by Thomas W. Ricketts, 219 West Colorado street.

DID YOU KNOW—

That an engine will sometimes heat up on a hill for lack of oil, depending largely upon the position of the pump, the type of oiling system and the condition of the oil? The pressure on the bearings during a pull uphill makes greater demands upon the oiling system, and if the bearings do not receive the proper amount of oil they will heat up, and perhaps stop the engine.

That the flickering of the oil pressure gauge when descending a steep hill is simply due to oil in the crankcase flowing away from the oil pump in cases where it is located at the rear of the engine? There is no particular danger if the pressure is affected in this way, since the engine is usually not under its own power in descending such hills, and therefore, does not need a constant high pressure of oil to its bearings.

After changing a tire, spin the wheel to see that it runs true. If the wheel wobbles it will wear rapidly.

(Copyright, 1923, by The Ullman Feature Service)

SHOULD HONOR COUNTRY'S FLAG

"Honor the flag; it is the sylbol of your country. There is no better, nor can there be one better."

Thus are children taught, and truly. But they should also be taught that while no man may improve the flag, all men may strive to improve the country for which the flag stands. Why should this, the greatest nation, have the worst roads? Why should the children of the most enlightened nation have the greatest difficulty of getting to the best idea in education the world has ever seen, the public school?

The children of today are the voters, the legislators, the officials, one of them the president, of tomorrow. Building an adequate system of national highways for the United States is not to be accomplished over night. It is a matter of years—years and education.

Therefore, teach children not only to honor the flag which all revere, but to make the country for which it stands even more worthy of honor, by building good roads through its length and breadth that all may have the social, moral, economic and humanitarian benefits which come from quick, easy, inexpensive and rapid transportation.

IS GAS TAX "PAINLESS?"

A set of tires costing one hundred and fifty dollars may run for ten thousand miles on average roads. The same set will run double the mileage on improved highways. The average car travels ten thousand miles per year. Therefore, the average tire cost, supposing average size and quality of tires are purchased, is $150 per year on dirt roads and $75 on fine roads.

Ten thousand miles of running, at an average of 15 miles to the gallon, requires 666 2-3 gallons of gas. If gas is taxed 2 cents a gallon, the average runner of ten thousand miles pays $13.33 per year in gas tax. In a state where there are 100,000 automobiles (which is less than the average, California, for instance, has about a million), the net income from the gas tax, above outlined, would be $1,333,000.00.

At twenty-five thousand dollars per mile, that sum will build fifty-three miles of improved highways. If there are a million cars, five hundred and thirty miles of improved highways could be built a year from the tax.

If the gas tax was 4 cents, 106 or 1,060 miles a year, respectively could be built.

Where the roads are unimproved, the 100,000 car owners spend $7,500,000 a year on tires, which they otherwise would save. The million car owners would spend $75,000,000 on tires they otherwise would save.

Proponents of the argument say that a tax on gasoline, spent on roads is the one and only "painless tax."

A TRAFFIC THOUGHT

Congestion is a paradox. It makes little difference whether cars go helter-skelter or follow the most exacting order, one can always consider traffic and say, "United we stand, divided we crawl."

Packard

If you are seeking the things the Packard stands for and deliver in the Single Six, you are literally left no choice.
